ence which is at once searching and cautious, does not encourage any ex-travagant ideas of the value of these phosphates. In respect to value they are much below the phosphates of South Carolina, but they are fully equal to those of France and England, which are extensively applied with very valuable results. We have found Wilmington, N. C., May 19, 1883, stopnothing as yet that can be used as a ping at the Purcell House. They will basis of a commercial fertilizer; noth- bring surgical and mechanical appliing that can be advantageously used ances, best French artificial eyes, and if it has to pay railroad transportation everything necessary for the treatment for long distances. But we have found of accepted cases. a fertilizer far richer than anything that has heretolore been known in untoubted prospect of great improve-North Carolina; in the element of phos- ment or complete restoration. Deforphoric acid, three times more so. It mities of every description, including is apparently abundant, and can be Club Feet, Diseases of the Hip, Spine and mined easily and cheaply. The de posits lie immediately on the waters Fornale and Private Diseases, Diseases of the Cape Fear, and cheap transpor-tation can be had along the branches etc., treated of that stream as far as navigable.

Having regard to these things, it may be said that we have discovered a fertilizer which can be cheaply used in the Cape Fear region at present and in other sections when freight rates shall be reduced on railroads, and which, if judiciously applied, will raise the sections which use it in the course of a few years to a high pitch of productiveness and prosperity.

This is the state of things to-day, but the matter is in the hands of Dr. Dabney, who will prosecute it with his accustomed judgment and energy .- News and Observer.
