#### How Whiskey May be Given Age Within a Few Hours.

The latest and certainly the strangery of a Californian, who has succeeded in getting patents from the United States, and has at the same time interested the internal revenue commissioner to such an extent that special privi- her. leges to experiment with bonded whiskey have been accorded him. A series of trials are being conducted at a store on Washington street, between Montgomery and Sansome, under the supervision of a deputy revenue collector. The process in question is exceedingly simple, and, it all is true that is claim ed for it, it will revolutionize the liquor and wine trade. It is nothing more than a quick and cheap method of refining, that being done in from twelve to forty-eight hours, which formerly required years to accomplish.

It all that is claimed for the invention is founded on facts its proper importance upon the wine-making industry can hardly be overestimated. It will then be no longer necessary to send casks of port on sea voyages around the world, and Eastern wine merchants need no longer have recourse to the prevarication that French wine, having undergone a sea voyage, is necessarily better than the domestic product. Age, the great disideratum for California wine, can be produced by the aid of a dynamo-electric machine. Every saloon 'can own a little machine, turned by hand, dog or steam, and every person can be per-sonally convinced that the liquor which is set before them is electrically pure and old. "Give it a shock," will become as common as "A little water, please," the sting will be taken out of many a temperance speech, and mania-potu will no longer be dubbed "horrors,"-San Francisco Chronicle.

#### Another Life Saved.

Mrs. Harriet Cummings, of Cincin nati, Ohio, writes: Early last winter my daughter was attacked with a severe cold which settled on her lungs. We tried several medicines, none of which seemed to do her any good, but she continued to get worse, and finally raised large amounts of blood from her lungs We called in a family physician, but he failed to do her any good. We then called in a physician—a most skillful professor in one of our colleges-he said that she could not get well. At this time a friend who had been cared by DR. WM. HALL'S BALSAM FOR THE LUNGS, advised me to give it a trial. We then got a bottle and before she had used it all up she began to improve.
