Advertising rates low and liberal. Addressing letters will report any and all failures to receive their paper regularly.

THE DAILY REVIEW.

VOL. VII. WILMINGTON, N. C., FRIDAY, SEPTEMBER 21, 1883. NO. 225

The late frosts and continued rains have ruined the hop crop of New York. The Philadelphia papers say that all indications point to a healthy fall trade. Georgia's taxable property has increased \$20,000,000 within the past year. The New York *Herald's* latest advice is that Mahone will be defeated in Virginia next month. Gen. Von Molke is at the head of the most formidable temperance movement ever begun in Germany. It is said that Mr. Gladstone is in better health than he has been since 1880, and that he has no thought of resigning. Mrs. Lucy Stone expressed the opinion that Governor Butler is in favor of woman suffrage. Of course. Isn't he a widow? South Carolinians boast that their no fence law will, in ten years, put their State ahead of Georgia in agricultural improvement. Chattanooga is elated at the organization of a new blast furnace, most of the capital for which went from Georgia and Tennessee. Gen. Grant, ex-Secretary Everts, Gen. Newton, of New York, and others of the Villard party arrived in St. Paul, Minn., Tuesday morning, and left East in the afternoon. Ex-Senator David Davis has purchased a large tract of land near Fayetteville, and will spend most of this fall there, superintending the making of improvements thereon. The voting population of the State of Indiana now numbers 499,833, an increase of 48,607 in six years. The colored voters have increased about 25 per cent., and number 10,298. The *Picayune* contends that the higher price for free trade Hawaiian sugar at San Francisco is proof of the doctrine that tariff reduction does not inure to the benefit of the consumer. Ex-Governor Sprague bought the first bale of new crop cotton that came to Providence, and sent it out to the Quindnick mills, showing that he is still "interested" in manufacturing. In New York city 100,000 children earn their own living. Many of them not only earn their own living but also the living of drunken parents. W. H. Scheffelin & Co., of New York, have been awarded the gold medal on their exhibit at the international exposition at Amsterdam. The Cincinnati *News-Journal* has been sued for \$100,000 damages for libel by General Andrew Hickenlooper for printing the Decamp scandal a few days ago. In New York, on Monday, Emanuel Cleaver, a boy 7 years old, was awarded \$2,500 damages by a sheriff's jury for injuries inflicted by a dog owned by Joseph Lamprill. At a meeting of the board of trustees of the town of Lake, Ill., Tuesday, in reference to alleged ring frauds, special examiner Gaunt reported that he had found a deficiency of \$75,000 in the water department. Great success has been achieved during the past year in restoring the levee system of Louisiana to a high state of efficiency. The embankments resisted the floods last year better than even the most sanguine could have expected. The New Orleans Times-Democrat has fitted out an expedition which will start from Jacksonville October 15th, to explore the Everglades of Florida. It is under the charge of experienced and competent men, and much interesting information is expected to be gained from them about this almost unknown region. The colored politician of Boston held a meeting Monday and appointed delegates to the National Convention at Louisville. An address was adopted declaring that the colored population of the South is disfranchised, and that the violation of their civil rights by innkeepers and common carriers calls for redress.

Captain Ericson, the inventor, has been working for the past year on an engine to be run by solar heat, and thinks he has succeeded. He says that he is satisfied he can construct an engine which will run by solar heat any bright sunny day, and give about a five horse power. In St. Petersburg, Russia, the telephone was introduced only a year or so ago, but the most distant parts of the city now connect with the centre, and numerous public stations have been established, at which persons can converse with each other at the small cost of 2d. per message. Mr. Gladstone has held the office of premier for a longer period than it has been held by any statesman except one in the course of Queen Victoria's reign. The exception was Lord Palmerston, who was prime minister for nine years and three months. Next after Mr. Gladstone comes Lord Beaconsfield, who was premier six years and ten months. Mrs. Trevino, wife of General Trevino, and daughter of General Ord of Texas, is slowly dying, and it is said that her baby, "the international baby," will die, too. General Diaz, the child's god-father, gave him a valuable estate. The reason of his generosity lies in the fact that both he and Trevino were at one time rivals for the Mexican presidency. The big cotton crop in the South, says the Philadelphia *Record*, is an evidence of the improved condition of labor, and the improved condition of labor is an evidence of better understanding between whites and blacks. After the Southerners get their own people trained to work at cotton spinning, as well as cotton raising, there will not be a more prosperous or a more independent people anywhere on the footstool. Lady Gay Paget, who was married recently to Lord Windsor, a young nobleman with the comfortable income of £80,000 sterling a year, was accompanied on her bridal tour by a white cat. A novelty in wedding costumes was also exhibited at this notable marriage. While the bride was attired in the richest satin and displayed a wealth of pearls and diamonds, Lord Windsor wore a morning suit of mixed gray and white tweed, without the slightest approach to what the English call "smartness." **Not Behind the Best.** LOWELL, MASS.—The *Citizen* says the most distinguished people of the country have given testimonials to benefits derived from the great pain-cure, St. Jacob's Oil. The citizens of Lowell know its great virtues. **LOCAL NEWS.** YATES—School Books JOHN L. DUDLEY—Bids HEINSBERGER—School Books F. C. MILLER—Florida Water, & W. E. SPRINGER & Co.—Rice Planters W. E. DAVIS & SON—Birds Shipped in Ice Read Reamy's triple-column ad. on 3d page W. H. GREEN—Wholesale and Retail Druggist Now is a good time to sacque your wife. The latest thing out—the man with the latch-key. Society conversation is tortured by an epidemic of puns. The watermelon crop will be an utter failure by Thanksgiving. Eggs are scarce and are retailing from the stores at 25 cents per dozen. A fine assortment of Guns and Pistols at JACON'S Hardware Depot. Wood is quite plentiful in this market and is retailing from the flats for \$3 per cord. The star spangled banner was flying over the entrance to the City Hall today. Mr. C. W. Yates, who has been in New York for several days purchasing goods, is expected home to-night. The tides continue to be very high in the Cape Fear, although they were not quite so high to-day as they were yesterday. Rev. Dr. Gregory, of Charlotte, will preach at the First Baptist Church in this city next Sunday morning and again at night. The prophet who thinks everything will turn out according to his expectations should try turning out molasses from a cold jug. Steamboatmen report a plenty of water in the Cape Fear, the rise having been about 20 feet with a prospect of "more a coming."

One of the sweetest pictures of domestic economy is a poet blacking a white stocking so that it won't show through a fissure in his boot. The *Little Giant* engine was out for awhile this morning for the purpose of exercising the horses and getting accustomed to the work which they will have to perform. It is the dog that has the "pants" and the young man the pantaloons, but it is not infrequently the case that before the young man can get safely over the fence it is he who has the "pants" and the dog the pantaloons. Brunswick county Superior Court will convene at Smithville next Monday. There are several important criminal cases upon the docket for trial, and it will be a busy week for the lawyers and court officials. Prof. Van Laer, who has been in New York and other Northern cities for several weeks selecting a stock of pianos and organs and other musical merchandise, is expected to return to the city to-night. During the present week Venus becomes an evening star, and in a few weeks she will be seen glittering like a diamond in the twilight, and during the coming winter she will continue to approach the earth and grow brighter from day to day. There was a great amount of rejoicing at the appearance of pleasant weather this morning, but, without wishing to hurt the feelings of any one, we don't believe it will last 48 hours, while at the same time we hope that we may prove a false prophet. The Fayetteville *Observer* says: Mr. Galloway, of Goldsboro, an official of the Atlantic Coast-line Railway Company, was in Fayetteville a few days since. Mr. Galloway has been going over the line of the Wilson & Florence R. R., securing the right of way, and he states that work on the road will certainly soon be commenced. **City Court.** There was only one case before the Mayor this morning, which was a charge of disorderly conduct preferred against Fennell May, colored. He was found guilty and the sentence of the court was that he pay a fine of \$3 or be confined in the city prison 10 days. He went below. **Poor Cattle.** There are a plenty of big cattle (so-called) in the market, but the most of them look as though they had been fattened upon hoop poles and barrel staves. Why will the farmers in the country persist in driving to market such apologies in the shape of beefs? It would not cost much more to have them in good condition and it would be much more satisfactory to themselves, to the butchers, and would make the consumers shout for joy. **No Light.** Within the last few days we have heard much complaint from our citizens, especially those residing in the Eastern section of the city, regarding the lighting of the street lamps—rather, the utter inattention of those who are presumed to attend to the matter, to that duty. The complaint is abundantly sustained for, although the lamps are sometimes lighted, it is so seldom done that darkness has become the rule and light the exception. We hope that the matter may be attended to. **The New Comet.** The new comet has been seen from the great observatories of the North and West, and this much can be said at present: Owing to its slow motion its precise path cannot yet be predicted, but it is a great distance from the sun and earth; will reach its nearest point to the sun about March 15 of next year, and then be about 70,000,000 miles from that luminary. These particulars, coupled with the fact that it is visible and shows a star like a point at its centre, make the probability very great that we shall have this winter a notable object in the heavens. To one familiar with this subject, these points call to mind the first observation of Donati's comet of 1858, which was discovered four months before its perihelion, was only visible to the naked eye two months after discovery, and only then presented traces of a tail. Its nearest approach to the sun was 40,000,000 miles, and it was distant 240,000,000 miles when discovered. The celebrated Fish Brand Gills Twine is sold only at JACON'S Hardware Depot.

Fruit in Tin Cans. The fruit put up in tin cans should be taken out when the can is opened for use. If allowed to remain after the can is opened the action of acid juices upon the fruit when exposed to the air may form acetate of tin, which is poisonous. Pour the fruit out into glass or earthenware dishes and the danger of poisoning is avoided. **Just Out.** We acknowledge the reception of a handsomely illustrated "North Carolina and Virginia Seaboard Air Line Handbook," which is gotten out for the benefit of proposed emigrants and to be given out at the Boston Exposition. It shows the capabilities of the country traversed by the lines of this route, from Portsmouth to Shelby, and presents a mass of matter of great and varied interest. **In Memoriam.** At the recent term of Columbus county Superior Court, which convened at Whiteville on Monday, the 10th inst., appropriate resolutions were passed in memory of the late Captain John W. Ellis, who was an eminent member of the Columbus bar. His Honor, Judge A. A. McKoy, presided and Mr. J. B. Schulken was Secretary of the meeting, and Messrs. R. H. Lyons, of Bladen, W. F. French, of Robeson, R. B. Fryser and Bruce Williams, of Pender, and S. F. McDaniel, of Columbus, were the Committee on Resolutions. **A Relief.** Mr. G. P. Macindoe, who has been a resident of this city for the last three years, but contemplates removing to Charleston, S. C., has a cavalry sabre which he will present to the Wilmington Library Association, of which he is a member, to be preserved in its cabinet of curiosities as a relic of the late war. The weapon is in no ways different from those of the regulation pattern excepting the scabbard, which is of wool, and is very neatly made and not so cumbersome as one would be led to suppose. **The Festive Mosquito.** Viewed through the microscope the mosquito presents a picture of mechanical ingenuity as marvelous in execution as it is devilish in design. In the bill alone, which seems so fragile to the unaided sight, there is a combination of five distinct surgical instruments. There is a lance, two meat saws and a suction pump. The fifth is a portable Corliss engine to run the rest of the factory with. When the insects operate on a man, the lance is first pushed into the flesh, then the two saws, placed back to back, begin to work up and down to enlarge the hole. Then the pump is inserted, and the victim's blood is syphoned up into the reservoir, carried behind, and finally, to complete the cruelty of the performance, the wretch drops a quantity of poison into the wound to keep it irritated. **Fashion's Follies.** The Winter dress goods this season are the most elegant and stylish that shoppers have seen for many a year. Any kind of a hat and every sort of a bonnet will be entirely in fashion this fall and winter. Plain white French china is coming into fashion again, it being cited that at some of the most fashionable of Newport dinner parties of late only white, undecorated china was used. Ladies' traveling suits this autumn were never prettier or more stylish, and it is a good pastime to sit down and calculate how many yards of braid it takes to trim one of them. In jewelry there are many new styles and designs, some very unique and pretty, others rather "loud," and best appreciated by people who are not conspicuous for good taste. Fall hats are ornamented with the heads, wings and breasts of birds that fly both at home and abroad, but that where some of them belong is a mystery. Something new in candlesticks is of curiously carved Swiss wood with a quotation from some poem on night out in large letters across the front. It is not every woman who can successfully wear a bustle, though this is something that in the excitement incident to fashion and style is often forgotten. Now that the season for the white dresses is drawing to an end, it is curious to note the number of conquests they have won for the wearers of all types and degrees of age and loveliness. Dressmakers just back from Paris say that reception and ball dresses are not to have sleeves and that the waists do not take a great deal of material, and that people began to say "I told you so" last winter. For Pocket Knives or Table Cutlery, go to JACOB'S Hardware Depot.

Unmailables. The following is a list of the unmailable postal matter remaining in the Postoffice in this city: Fannie J. Mercer, Winey Town, N. C.; Louisa L. Hogg, Daysville, Killingly Co.; Owen Wilson, care F. H. Bell. **The Reception.** The Reception to Wilmington Hook and Ladder Co., No. 1, tendered by Wilmington Steam Fire Engine Co., No. 1, and Howard Relief Fire Engine Co., No. 1, mention of which was made in the REVIEW of the 19th inst., has been accepted by the former, who have fixed upon Monday evening, the 24th inst., as the time. The reception will be held in the Hall of the Wilmington S. F. E. Co., and we have not a doubt that it will be *recherche* affair in every particular. **Called Meeting.** There was a special meeting of the Board of Aldermen called for 4 o'clock this afternoon, which was at so late an hour that we were unable to get the proceedings for this issue. The object of the meeting, we understand, was to take into consideration the erection of telephone poles on North Water street. At a former meeting permission was granted by the Board for the erection of telephone poles on that thoroughfare and for a few days past workmen have been engaged in digging the holes for them, on the West side of the street. Objection has been made to placing them there, and this morning Mayor Hall caused the work to be suspended until further orders. Nearly all the holes are dug and the poles are there, and the question now is, what will be done in the premises? Silver Plated Spoons and Forks, low prices, at JACOB'S. **NEW ADVERTISEMENTS** **BIRDS.** "Rice Birds and Coots" SHIPPED IN ICE TO ANY PART OF THE United States. sept 21 W. E. DAVIS & SON. **Rice Planters** GOODS OF EVERY DESCRIPTION, Muslin, Flannel, Caps, Shirts, Rice, H. Oks, Forks, Bakes, &c., Straw Twine. We can make close prices on these goods, if you mean BUSINESS.
