FRIDAY, NOVEMBER 16, 1883

Entered at the Postoffice at Wilmington, N. C., as second-class matter.

Dr J H Zukertort, in New York, Saturday began twelve simultaneous games of chess "blindfolded" with as many different players. Games were won by Messrs. Isaacson, Merian, Rice, Pinkham and Fisher. The Doctor beat Messrs. Simonson, Sheigle, Parnell and Schieffelin, His games with Messrs. Hyde and Osborne were drawn.

Six bakers held in New York, charged with violating the Sunday law by mix ing their dough on Sunday, were discharged on Saturday by Justice Gardner, of New York. He remarked that there had been a decision of a higher court that running a blast turnace on Sunday was a work of necessity, and he believed the labor involved in baking bread was as much if not more a work of necessity than running a blast fur-

The Washington Star, which is in a good position to know, says: "It is evident that the tariff is to play a prominent part in the coming Speakership contest. Mr. Carlisle hastens to define his position on the question, and talks to use, prevents the possibility of toothin a conservative vein. He repudiates the charge that he is 'a rank free trader,' and asserts that he would deal how much improvement defective teeth operation. carefully with vested interests in any reformation of the tariff. He thinks it impracticable to sweep away the whole internal revenue system at this time, and favors a 'little' tariff bill cutting off thirty or forty millions from custom receipts."

There will be grand times in New York ou the 26th inst., Evacuation Day. In speaking of this eclebration. Washington. He lives in Florida. the Mail and Express says:

Fine weather is all that is needed to insure one of the finest displays witnessed in New York in recent years, a week from next Monday, the day for the centennial celebration of the evacuation of New York. The military parade from Central Park to the Battery will undoubted be magnificent, and the ceremonies in Wall street, at the unveiling of the statue of Washington on the steps of the Sub-Treasury, will be very impressive. But the most novel display of the day will be the parade of steam vessels off the Battery. a fleet of 472 boats having already been promised. The lower part of the city will be crowded by those who wish to see a company of men dressed as British redcoats escorted down the bay by the monster fleet, and the noise of the whistles will be something whose equal New York has perhaps never yet heard. It is gratifying to know that our citizens are to generally close their places of business and make November 26 a gala day, Nothing remains for the committee to do to complete the Evac uation Day pageantry, unless it be to provide for an illumination of the city in the evening.

The National Academy of Science, now holding its annual meeting at New Haven, is expected to consider some questions of the highest practical importance, and among them that of the extensive substitution of glucose for the sweets of the cane. Prof. Chandler has reported that perfectly pure glucose is harmless, although everyone knows the Blood, Liver, Kidneys. Stomach, that it lacks the fine flavor and sweetness of syrups expressed from the cane of Southern plantations. But is the average glucose harmless? That is a question which the National Academy of Science might answer greatly to the advantage af the public. It is commonly known that glucose is corn, liquified by the application of sulphuric to-day acid. If the chemical action is perfect no trace of the acid remains in the liquid; but if not, the glucose retains an element of poison. It is well for our per package. At druggists. great scientific bodies to take up practi cal questions like that of the use of glucose, and by a searching investigation determine and disclose what food adulterations are practised, and with what pernicious results to the health and to the purse of the people.

The death-rate among the colored people of Washington is almost twice as great as it is among the whites of the same city. The annual reports of the health officer of the District of Columbia contain many facts of especial interest relating to the vital statistics of the two races. There are in the city about 120,000 whites and about 60,000 colored persons. In the year ending June 30th last the death rate among whites was only 17.97, while the rate among the colored people was 30.68. The rate for the entire population was 22,33. Iu some years the death-rate among the colored people has been twice as high as among the whites, and in one year it was, if our memory serves us well, no less than 34. The rate caused by malarial fevers was, for the last five years, three times as great among the colored people as among the whites, owing mainly to the location of the houses of the colored people and their greater disregard for sanitary laws. On the other hand, the rate for scarlet fever was four times as great among the whites as it was among druggists, or by mail from J. H. Allen, the colored people. the colored people.

MISCELLANEOUS.

New Firm. 1 New Partners. Re-organization.

There were some wicked partners, and it was judged best to kick them out, for the business was of long standing, and there was a fear that the wicked partners would bring itto grief.

There was old MR. DEBILITY. In Madagascar military service is the He was a complaining fellow, always tired, and always wanting to sit down and rest, instead of doing his share of the work.

*There was little Mr. NERVOUS-NESS, a fidgety, fussy chap, constantly afraid the concern was going to ruin.

There was bothersome Mr. Bil-IOUSNESS, quarrelsome and angry. He always misunderstood everybody, and said that everybody misunderstood him.

And there was the much-despised least twelve periodical publications in Mr. BAD BLOOD. A troublesome creature was he to get along with. Tobacco is made into snuff by being He raised a commotion in the concern every day, and made myriads of enemies.

So the wicked partners had to be kicked out. The agent selected to do the business was Brown's Iron 'hung up." There is a clause in the Bitters, noted for working so pleasliquor law which operates against credit antly, so silently, and so effectually. Brown's Iron Bitters laid hold o MR. DEBILITY by the heels and gently dragged him out, laying him P. aside for future use, in case he should

> Brown's Iron Bitters worried MR. NERVOUSNESS out flat, giving him

Brown's Iron Bitters made direct war on MR. BILIOUSNESS and told him that he "must go." B. turned round and snarled something about 'wouldn't go till he had a mind to"and then made up his mind that the Mr. Simon Cameron is coming South sooner he got out the less trouble there would be in his going.

Brown's Iron Bitters then took Mr. BAD BLOOD in hand, and found that he could change him entirely. So he put into him some of that famous preparation of pure iron, and cast out all his badness, reforming his character entirely and making him anew.

The firm now consists of Health Happiness, Purity, and Viger, with Brown's Iron Bitters for special;

THE SUN.

About sixty million coples of THE SUN have

twelve months If you were to paste end to end all the columns of all THE SUNS printed and sold last year you would get a continuous strip of interesting information, common sense wisdom, sound doctrire, and sane wit, long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and then three-quar ter of the way back to the moon again. But THE SUN is Written for the inhabitants of the earth; this same strip of intelligence

would girdle the globe twenty seven or twenty-eight times. If every buyer of a copy of THE FUN during the past year has spent only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper in 1883 has afforded the human race thirteen thousand years of steady reading, night and day.
It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions

of American men and women. THE SUN is, and will continue to be, a newspaper which tells the truth without fear of consequences, which gets at the facts no matter how much the process costs, which presents the news of all the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which there fore believes that the Republican party must go, and must go in this coming year of our

If you know THE SUN, you like it already, and you will read it with accustomed diligence and profit during what is sure to be the most interesting year in its history, If you do not yet know THE SUN, it is high time to get into
