TURN THE RASCALS OUT: It seems to us that some prominent men in the Demogratic party are work ing with might and main to accomplish its defeat before the opposing hosts are drawn up in battle array, and there is every indication that they will be suc cessful in their efforts. They say that the tariff must be made the main issue in the campaign, and the battle must be fought with that as the slogan; that the ally reduced, and as the Democratic party is a party of reform, it stands country, and to make such reductions in the present tariff as will relieve the people from the immense burdens which they are now compelled to bear. They also claim that the party would be recreant to its duty, to its underlying principles and to all its pledges, should it refuse to make tariff reform a prominent feature of the approaching cani-

Now, we are entirely willing to admit that our present tariff laws stand in need of reformation as much as any feature of any department of the government service. Possibly it does more. A Case not Beyond Help.

Dr. M. H. Hinsdale, Kenawee, Ill., advises us of a remarkable cure of consumption. He says: "A neighbor's wife was attacked with lung disease, and pronounced beyond help from Quick Consumption. As a last resort the family was persuaded to try DR. WM. HALL'S BALSAM FOR THE LUNGS. To the astonishment of all, by the time she had used one half dozen bottles she was about the house doing her own work. I saw her at her worst andhad no idea she could recover."

## The Old-Fashioned Doctor.

It is very interesting to read the writings of some of the doctors of the OFFICE OF GENERAL SUPERINTENDENT, olden time, and see how modern science and recent discoveries have knocked to pieces many of their old theories. These good men were doing their best to relieve human distress. Many of them were working in the dark. Almost all of them were in bondage to some inherited theory as to disease and its cure. It s evident that the best of them did a great deal of guess-work. Still they looked wise, and much of their guess-work passed for solid wisdom. As late as twenty-five years ago it was the practice of many of the best physicians to bleed their patients a patient would be bied nearly to death in pursuance of this wild old custom.

out that blood was just what a sick man needed, and that he needed it pure and rich. Modern science has found that iron gives the blood its rich red color, and that if there is not enough iron in the blood, the vital fluid is pale and thin and poor. When this is the case, the whole system is enfeebled.

The doctors and the chemists experimented and tinkered a great deal with various forms of iron. Most of the early preparations of iron for the blood did as much harm as good; sometimes more. They hurt the ger coach will be attached to local freight leavteeth and injured the stomach, and worked other mischiefs. But now we have a preparation of iron in which chemical science has made a majestic triumph. It is "Brown's Wilmington, Columbia Iron Bitters." This carries the iron right to the spot where it is needed. It invigorates the stomach, enters into the circulation, enriches the OFFICE OF GENERAL SUPERINTENDENT. blood, refreshes the liver, tones the nerves, and puts the whole system in healthy condition for work. The triumphs this remedy has wrought are matter of public record throughout the United States.
