SATURDAY, JANUARY 26 1884

Ketered at the Postoffice at Wilmington, N. C. as second-class matter.

"DIVERSIFIED FARMING.

During the past twenty years, says the Petersburg Index Appeal, the writer only embrace every kind of cultivated has seen or read perhaps a thousand newspaper articles on the general and variety of product, including stock. very broad subject of "diversified farming." Yet, at this time, he cannot call to mind a single one in which the subject was treated as it is purposed to treat in this article. With most writers, and readers too, the term diversified farming seems to be synonymous with all such land be devoted to what apa variety of crops to be grown od the same farm. Every individual farmer! is urged to increase the number of his er may find his favorite soil. Then the products to the greatest extent compatilive stock man and the cotton planter ible with his means and opportunities, would be neighbors. They would ex-To a certain extent the advice is good change products, perhaps, or, better enough. It is not always best to risk still, exchange labor at certain busy

practice to be a difficult matter to carry would be naturally beneficial on many branches of farming at the around. But as it is now, where over and got off hand before another farmer can fall back on, outside of his requires attention. Secondly, our peo- own farm and family to help him over ple are specialists by training and inclin a difficult place; and there is little or no nation. They have been taught how to exchange of products between farmers, manage one or two products only as there would be it one made one thing which they generally do . well, and they and another made another. do not know much about any others | Again, it is certain that this kind of four or five great staples that are much more property to tax, and taxa made the money crops of the sec- tion would be far more generally distion, and either one of these is of such tributed. Not only would agriculture a nature as to absorb almost the whole be much diversified, but trades and time and resources of the planter for an | manual occupations would be increased entire season, and hence practically Ali industries would thrive. Roads shuts out attention to any other crop, would be improved, schools, increased tune. as readily command, and will always and thrift, enterprise and intelligence to marry a female physician?" "Cer continue to command, quick sale at would prevail in many places where tainly; she is charming." "Yes; but to be thus exposed to a continual danger?" Fourthly, these leading staples are such and supported, churches would be filled, remunerative prices in the markets of their antitheses prevail now.

ample home supplies of corn, polatices. This is the diversity that we advocate vegetables, fruits, west, milk and butter; and a little of all these can be observe this rule has been the one glaring defect in the management of many a Southern planter. We rejoice to be lieve that a better order of things is beginning to prevail.

What, then, becomes of diversified farming? The diversification that we allude to, and which we advocate, is no diversity on the same farm, but diversity on the same farm, but diversity in the same section each for itself. That is, all farmers should not be corn, or cotton, or tobacco, or ·ugar cane, or peanut planters, as the case may be, but that one man should make one is he that the ailment for the treatment branch of farming his specialty, and of which he journeyed thither has disanother man another branch! If this appeared. were the rule, each section of country The German screw corvette Olga, would raise a variety of staple crops; Capt. Baron von Seckendouff, arrived and, as in this case, the soil of his tarm in Bermuda on the 13th instant. The and his location/would determine a Olga has been cruising in South Ameriman's leading crop, the country would board Prince Heinrich, of Prussia, secbe worked nearer up to its capacity, and son of the Crown Prince of Gerand the aggregate amount and value of many and Prussia. its products would far exceed the pres- Miss Loula Hurst, the marvelous mag ent figures. It is well known that netic girl of Polk county, Ga., recently every county has a great diversity of gave an exhibition of her powers in the soil. There is not a county in which Rome, Ga. She took hold of a large wheat, some to corn, some to cotton, with the tips of her fingers and lifted some to tobacco, and some perhaps to peanuts than to anything else. What is the sense, then, in trying to make without apparent effort. The girl is 15 one crop the staple for the entire conun- years of age, five feet tall and of woty? - Ha man's farm is better suited manly figure. to wheat, that is a good crop and will always sell. Let him grow wheat. It another man's farm suits cotton better pining away all the time for years, the than anything else, it would be foolish to try to make money on tobacco. And so on through the list. Each farmer deed! how thankful we should be for should find out what erop he can grow that medicine."

and handle to best advantage, and he should erect, build and arrange his farm or that especial branch, and cultivate only enough ground in trucks, &c., to meet the home consumption.

This is the kind of diversity that we mean, and this variety if carried out to the full capacity of a county and a State. would make that people immensely rich, practically independent, and humanly speaking, proof again't famine and want. This diversity might not crop common to the latitude, but every poultry, honey, fish and game. There is much land not suited to any tilled crop, but which may be well adapted to some class of live stock or poultry. This is profitable business. Men have made and are making money at it. Let pears to be its natural use. A few miles away the cotton or tobacco plant seasons that would come to both. But there are several reasons why a The cotton planter would know where farmer, especially a Southern farmer, to go to get help when the grass was should not attempt to diversify too growing fast, and the stock man know much. In the first place, however well where to turn for assistance in driving it may sound in theory, it is found in his cattle to market. The diversity same time, without having some of follow the same branch of farming, them conflict in season and labor. Un- none can get any help during a busy less the space devoted to each crop is time but his own. There is no reserve very small, one crop cannot be worked force whatever, nothing that the

Thirdly take the Southern States diversity would greatly nerease the whole, and there are only revenues of a people. There would be

inducement enough to their cultivation into some profitable use every foot of doctor. to cause the majority of farmers to our soil. There would be no common continue it, well knowing that the land. Even the forests, streams and peculiar circumstances of location, meadows would be leased and farmed climate and intelligent tabor, which for stock, game and fish. A few hous a difficulty, her third husband was are our special advantages, will practis dred acres of forest land might be divorced and her fourth husband having cally exclude the rest of the world from found as profitable in the raising of entinterposing any material competition (tle, sheep or hogs, as many a farm for Fifthly, it is less expensive, and lar less the growth of corn or wheat. A few trouble to carry on one leading branch miles of marsh or river shore, secured other Japanese cities. American trade of farming as a money source toan it by lease and protected by llaw. might is to conduct several at the same time pay as well in game, tish or oysters as It takes less buildings, less machiners, many a large plantation of cotton. - and aerated waters taken by the Amer-Hanting and fishing would be legalized lean plan, on a straw." But having said this much in let of in such a way as to benefit the State at of special crops, let it are be undersood large instead of a few put hunters, as
