as second-class matter. INVESTIGATE!

Congress has now been in session, says the New York World. nearly two months. We are told that the appropriation bills are approaching completion The Committee of Ways and Means is supposed to be engaged in perfecting some tax reform. Mr. Sherman has measured off two or three yards of bloody shirt preamble, and the Senate has appointed a committee to investigate an election row in Copiah county, Mississippi, and a fight between negroes and white men at a post town in Virginia. But as yet we have heard of no proposition in the Democratic House to investigate the assaults of the Republican party on the very life of republican government.

The Committee on Expenditures in the Department of Justice, of which Mr. Springer is Chairman, has in the pursuance of its duties found it necessary to inquire into the Star route prosecutions. It is met at the threshold by the pretense that any informa tion supplied by the departmen to the committee would "defeat the ends of justice," as prosecutions are still pending. The people know that the prosecutions already undertaken have been barefaced frauds designed to facilitate the escape of the defendants and used as a means of still further plundering the Government under the cloak of legal fees to assistant counsel. They know that Garfield commenced and Arthur continued the protection of Dorsey, the agent who had done the practical work in purchasing their election, and of Brady, the Star Route official who had squeezed the bribery fund out of the pockets of the dishonest contractors on the strength of Garfield's begging letter. Hence the people are fully aware that an Administration in league with the Star Route thieves and a beneficiary of its frauds can have no honest intention to prosecute any Star Route suits to a successful issue. Yet it is evident that the whole power of the President, of his Cabinet and of a convenient District Court is to be used to embarrass and defeat the inquiries of Mr. Springer's Committee.

This makes it all the more necessary for Congress to start investigations without any further delay into abuses and outrages which concern not a Mississippi county or a Virginia post town but the people of the whole United

It has been admitted by the ex Secretary of the Republican National Committee that in the election of 1880 the State of Indiana was carried for the Republicans by bribery and corruption. Investigate!

It has been admitted by Republicans that a corruption fund of \$400,000 was raised in New York Ctty, which was carried to Indiana and used to "induce men to change their opinions and their votes." Investigate!

It has been charged that the present United States Minister to France bought his appointment with the snare he contributed to that fund and his efforts in securing other subscriptions. Investigate!

It has been charged that two preminent speculators interested in suits before the Supreme Court of the United States involving millions of dollars paid did not meet again for fifty-eight years. \$100,000 towards Garfield's election expenses in consideration of the pledge to make appointments to that Court acceptable to them, and that a Judge friendly to them was actually appoint. ed in conformity with the bargain. Investigate!

Investigate it, because, if true and capable of proof, it shows that the very foundation of the Government, the high court which is the final arbiter of the Constitution, is tainted and unworthy of the public confidence,

Surely it is more important to ascertain if the President holds his office by fraud and if seats on the Bench of the United States Supreme Court are sold for money than it is to inquire who is responsible for an alleged election outrage in Copiah County, Mississippi, Surely the people are more interested in inquiring whether the diplomatic offices of the Government are made the reward for money supplied to corrupt the ballot box, whether the officers of justice are bribed to let public robbers go free and whether our Federal courts. marshalships and commissionerships are filled with thieves, than it is to ascertain whether negroes or white men were drunk when they commenced the Danville fight.

It would have appeared in much taste if ex Speaker J. Warren Keifer had cleared himself of the graye imputation of giving false testimony in regards to his own difficulties, before he undertook to decry the merits of

his soldiers and countrymen for these many years, while Kelfer is sinking lower and lower in public estimation with each succeeding day. And he deserves' all that he receives. His political life has been so corrupt that his own party, have nothing but contempt for him, and when a Republican politi can gets so low as to bring upon himself the distrust and dislike of his party, there is not much further distance for him to fall. The great danger arising from the fall of such men is that they may take it into their scheming heads to form a new party composed of kindred spirits. Colfax, Hayes, Robeson, Chandler and Keifer might be able to do considerable damage in this way, but we hope that they may be kept under control until the last three are relegated to the same obsurity as the first two, there to remain the re mainder of their days.

It seems probable that Mr. Michael O'Connor, of Galesburg, Ill., is not related to the celebrated Charles O'Connor He says: "Samaritan Nervine oured me of dyspepsia and general debility."

What is a Blood Corpuscle?

A blood corpuscle is one of the smallest things on earth. It is a flat ittle disc, not exactly round, but nearly so, and not quite the thirteen undredth part of an inch long.

Blood corpusles are closely laid alongside of each other in your blood. They are of a bright red color. They owe this color to the iron that is in them. But for this red color of the corpuscles, the blood would be a colorless fluid.

As the blood rapidly goes its rounds through arteries and veins, driven by the heart, the corpuscles go with it, forming a very important part of it.
