

THIS PAPER published every evening, Sundays excepted by JOSH T. JAMES, EDITOR AND PROPRIETOR. SUBSCRIPTIONS POSTAGE PAID: One year \$4.00. Six months, \$2.00. Three months, \$1.00; One month, 35 cents. The paper will be delivered by carriers free of charge, in any part of the city, at the above rates, or 10 cents per week. Advertising rates low and liberal. Subscribers will report any and all failures to receive their paper regularly.

The Daily Review has the largest bona fide circulation of any newspaper published in the city of Wilmington.

Ten electric lights are to be placed on the top of the Washington Monument.

Maine has three Mormon churches and more than a dozen Mormon preachers.

The Roman Catholic clergy no longer oppose cremation which is becoming very common in Italy.

The Thetis has stood admirably the preliminary test of a rough and icy voyage from Dundee to New York.

As another proof that the world moves, we may mention the fact that a glove fight has been stopped by the police in Chicago.

The electric lights on the high masts at Los Angeles, Cal., can be distinctly seen from the island of San Clemente, eighty miles out at sea.

Old London is said to be fast disappearing. Quaint old fifteenth century mansions are being demolished to make room for modern structures.

Speaker Carlisle receives the largest mail of any member of Congress. Mr. Morrison, Mr. Randall, and Perry Belmont in the order named.

A resolution has been adopted by the Congressional church of Wallingford, Conn., forbidding the members to drink liquor of any sort except hard cider.

Herr Most is a most inviting leader. He calls upon his followers to "press on with the black flag of famine ahead," and to plant their standard on the "ruins of palaces." But if famine is ahead, they can't eat the ruins of palaces!

It is extremely probable that Bismarck would now ask some of the American pork packers to dinner if they should go over there. But they probably wouldn't accept unless he agreed to keep raw German pork off his table.

Prince Orloff, who has been the Russian Minister to France since 1872, and who now goes to Berlin, has presented his letters of recall. The French journals express sympathy and regret at his departure.

Senator Sabin, chairman of the Republican Executive Committee, discussing the Presidential question, says that "a nomination brought about by machine influences will be of no value whatever." These are fateful words for Mr Arthur.

It is now charged that a former Board of Commissioners of the District of Columbia is "short" about \$3,500,000 of the public money, "unaccounted for." "Well, why should this excite surprise? Why should Congress bother itself about such a trifle?"

The people of Sedgewick county, Kansas, have sent a train of forty cars loaded with corn and beautifully decorated, to the flood sufferers of Cincinnati, in return for charity extended when they were suffering from a plague of grasshoppers. The grain is worth \$11,000.

The Poet Laureate has thus snubbed a person who sent him a notice of his lordship's self: "Lord Tennyson is much obliged to Mr. Henry Romeike for his inclosure, but such notices do not interest him; so he begs Mr. Romeike not to take the trouble of sending him any more."

An ordinary Cabinet Minister soon sinks into insignificance in England when he retires from office; even Mr. Milner Gibson, to whom the penny papers are under enormous obligations, seeing that no one did so much to repeal the paper duty, was scarcely known by name to the present generation until his death occurred last month.

Europe's population was estimated to be 244,000,000 in 1857, and there were 255 horned cattle to each 1,000 inhabitants. In 1890 the population was 278,000,000, but there were only 331 horned cattle to each 1,000 inhabitants. and our beef growers base their expectation of a continuously increasing demand by Europe for American beef on these statistics.

We understand that seal-skin coats are going out of style, and in consequence, coats are increasing among the fair sex. How fortunate there is such a remedy as Dr. Bull's Cough Syrup!

Now is the time to give Smith's Worm Oil.

THE DAILY REVIEW.

VOI. VIII. WILMINGTON, N. C. WEDNESDAY, MARCH 26, 1884. NO. 73

The fame of Longfellow is becoming world-wide, as it should and must. It is not by any means confined to countries in which the language in which he wrote is known and used. The poet gave to English literature much that had been written in other tongues, and in return his own poems have been translated into every language which has either a literature or a reading population. From the emperor of Brazil a liberal contribution has been made to a Longfellow memorial, and this contribution, we are told, "heads a long subscription of Brazilian gentlemen."

The receipts of cotton at this port today foot up 134 bales
New moon to-morrow morning at 34 minutes after midnight.

The buds on the trees and blossoms on flowering plants have developed remarkably within the last few days.

For Flower Pots and Hanging Baskets call at the 5 and 10 Cents Store, No. 16 South Second street.

The funeral of the late Mrs. Stewart, at Smithville, yesterday, was very largely attended, quite a number of the citizens of this city being present.

The Rentz-Santley troupe, consisting of 17 persons, arrived on this morning's train, and registered at the Purcell House. They will appear at the Opera House to-night.

The Union Meeting of the Eastern Baptist Association will convene at Kinston, Lenoir Co., on Friday, the 28th inst. and continue until Sunday, the 30th inst.

For Pure White Lead & Paints, and biggest stock of Window Glass and lowest prices for good articles be sure to go to Jacob's Hardware Depot.

There was no storm of any consequence at Smithville last night, although the weather had a threatening aspect. There was a light rain, but nothing more than a gentle wind.

After the storm of last night, the weather cleared off this morning and the sun shone out cheerfully to dry up the mud and water with which nearly everything had become saturated.

The Almanac predicted frost for today, but so far as our observation has extended, their must have been a slight mistake in the calculation, as the weather has been quite warm and pleasant.

The Wilmington Steam Fire Engine, No. 1, celebrated its 15th anniversary this morning by a trial practice in front of the Engine House. There was no public display, no dinner and speeches were not in order.

It is learned that Rev. C. M. Payne, of the Campbell Street Presbyterian Church may be induced to accept the pastoral charge of the church of Concord to which he has been invited. He has suffered much recently with his eyes, and the physicians recommend a change, hoping thereby that he may receive benefit.

The "doctor woman," who has been talking in French and pulling teeth in every known language for the last week, departed last night, ostensibly for Richmond, Va. Her chariot was sent off yesterday morning, but she gave people to understand that she would remain several days longer to minister to the afflicted. It seems, however, that she changed her mind.

City Court.
The Mayor disposed of the following cases at his matinee this morning:
Hattie Priolean, colored, for disorderly conduct, was fined \$5, in default of which she was sent below for 20 days.
Alice Hall, colored, for disorderly conduct, was fined \$5, in default of which she was sent below for 20 days.

Exports Foreign.
Norwegian barque *Kepha*, Madsen, cleared to-day for Hull, Eng., with 200 casks spirits turpentine, 3,076 barrels of rosin and 1,000 barrels of tar, valued at \$9,600. Norwegian barque *Ariona*, Johnsen, cleared for Liverpool with 500 bales cotton, 300 casks spirits turpentine, 3,000 barrels tar and 216 barrels rosin, valued at \$34,300; making a total of exports foreign amounting to \$43,900, all shipped by Messrs. Alex Sprunt & Son.

The Storm.

Before dark yesterday the clouds began to assume a threatening look, indicating heavy showers, and as the hours advanced into night the clouds rolled up in great black volumes showing that a storm was impending. At a few minutes after 11 o'clock, p. m., the rain began to fall in torrents while the heavens were illumined by almost unintermitting flashes of lightning, accompanied by the ceaseless roar of thunder. At about 11:30 o'clock hail began to accompany the rain and for about half an hour, or until nearly midnight, the heavens were a scene of angry confusion, and the earth was deluged with water, while the hail beat violently upon roof and window panes, and in some instances, in exposed situations, breaking the glass. We have seldom, if ever, seen rain fall in such torrents as it did for about an hour last night, nor did we ever witness more vivid flashes of lightning or listen to more continuous peals of thunder. Those streets located upon level ground were flooded and in some instances were a complete sheet of water from one side to the other, while the gutters of those on declining ground appeared like a torrent escaping from confinement. Some idea of the volume of rain may be gathered from the fact that the total rainfall from 11 o'clock last night to 8 o'clock this morning amounted to 3.8100 inches, the larger portion of which fell in the course of an hour's time. Fortunately, there was not much wind until the severity of the storm had passed by, the maximum velocity being 19 miles per hour, between midnight and 1 o'clock this morning.

Many of the street crossings this morning were badly washed, and some of them were almost impassable in consequence of the storm. At the corner of Third and Dock streets there was a bad wash-out the flagstones were removed and the place was dangerous. There are many other places throughout the city in like condition and the street hands will have a plenty of employment for several days in repairing damages. The sidewalk for a portion of the distance between Front and Second, on the South side of Market street, was overflowed and the water deluged the floors of some of the store. At Messrs. Hart, Bailey & Co's machine works the water rushed in so that labor was suspended to-day. We have as yet heard of no very serious damage and loss, but we would not be surprised to hear that other localities suffered more severely than we did, as the storm center was evidently outside of the city.

Hotel Brunswick.

The extensive and expensive additions and alterations which are being made by Mr. J. D. Sublett, in this seaside resort are fast approaching completion and when finished will make the Hotel Brunswick one of the most attractive seaside Summer resorts on the Atlantic Coast. It is expected that the new pavilion will be completed by the 5th of May, and that the hotel will be finished and ready for occupancy by the 15th of the same month. Mr. Sublett intends that no expense shall be spared in making this a first class hotel in every respect, and to give it that excellence with which he will only be satisfied, he has engaged a professional cook and baker from New York who will superintend their several departments. He has also made arrangements to have his meats shipped direct from that city, and means that his table shall be equal to that of any Northern hotel. He has also made a contract, which has been duly signed, with the famous band leader, David Kersey, for the coming season, with a band of five instruments to furnish concerts and dancing music for the guests. The pianist will be a graduate of the Conservatory of music, and has played in the concerts given by both Madame Neilsen and Mlle Patti. All this necessarily involves a large expense, but the rates of board have been fixed at \$12 per week by the season; \$15 per week by the single month; \$17 per week for less than a month, and \$2.50 and \$3 per day, according to accommodations, for transient customers, which is remarkably reasonable, all things considered.

Postmaster General Gresham and several other notables in public life have signified their intention of passing at least a portion of the season at the Hotel Brunswick.

We invite the attention of our citizens to the fact that first quality shirts are being made to order at one dollar at the Wilmington Shirt Factory.

A Wreck.

Capt. Tribon, of the steamship *Benefactor*, which arrived to-day from New York, reports having passed the wreck of the brigantine *Addie Todd*, of Calais, Me., 20 miles South of Fenwick Island, in 23 fathoms of water, with her stern out of water and her spars floating along side.

Work of the Hail.

At Mr. J. M. Hardwick's place, about three miles from the city, the hail of last night broke nearly all the glass in his hot houses and destroyed a large number of plants.

At Mrs. Harry Webb's conservatory, on Market, between Seventh and Eighth streets, a great many panes of glass were broken, but the damage to plants, fortunately, was inconsiderable.

At other places in the city and vicinity, where there were hot houses for the protection and early propagation of plants and flowers, there were many panes of glass broken and more or less damage was sustained.

A Water-Spout.

During the storm last night a water-spout burst near the mouth of Brunswick river, about six miles from this city, which carried away the bulkhead which Messrs. W. E. Davis & Son had constructed to protect their fishery, nets, boats, &c. Mr. D. J. Stubbs, the foreman of the fishery, with three employees, was in the house near by when the water-spout burst, and all were compelled to stay there, for some time, as the fall of water was so great that they could not get out. At one time the building was in great peril of being removed from its foundation, but fortunately, it withstood the strain upon it, much to the joy of the inmates.

The Fire this Morning.

At about 1:15 o'clock this morning, and but a short time after the severe storm of rain and hail had ceased, fire was discovered, in a warehouse in which lime was stored, immediately in the rear of Messrs. Chess-Carley Co's store house, on North Water street. The warehouse was occupied by Messrs. E. G. Barker & Co., and it was the second time within the last three years that a fire has occurred in the same place. About 1,200 barrels of lime were stored in the building which were totally consumed and the building was seriously damaged. The loss on the lime, which was about \$1,800, was fully covered by insurance in the North American Ins. Co., represented in this city by Messrs. DeRosset & Northrop. The building, which is the property of Mr. W. B. Noyes, and of which Mr. Alfred Martin is the agent, was insured to the amount of \$500 in the London Assurance Co., represented here by Mr. Samuel Northrop. The insurance on the building will probably cover the loss.

DIED.

POST—In this city, this morning at 11 o'clock, JENNIE JACOBS, daughter of Jas. F. Post, Jr., and Sarah V. Post, aged 4 years and 10 months.
Funeral will take place to-morrow (Thursday) morning, at 10 o'clock, from the residence of the parents on Chestnut, between Third and Fourth streets.
KING—In this city, March 26th, JOSEPH ENNETT, son of James J. and Alice T. King, aged 8 months and 9 days.
The funeral services will take place at St. Thomas' Church, to-morrow (Thursday) evening, at 8 o'clock, thence to St. Thomas' Cemetery. Friends and acquaintances are invited to attend.

NEW ADVERTISEMENTS.

FOR SALE—ONE "50 HORSE POWER HORIZONTAL ENGINE," with two feet Driving Wheels, 10-inch face, suitable for Saw or Grist Mills.
Also, ONE "75 HORSE POWER LOCOMOTIVE BOILER" with copper tubes—all in good order, connection complete, and ready for immediate use. Can be seen at any time.

Something to your Interest!

Mott's

Fire and Water-Proof Roofing Paint!

G. L. WRIGHT, AGT. FOR NORTH CAROLINA.

ELEVEN GOOD REASONS FOR USING OUR PAINT.

1. It is guaranteed Fire Proof.
2. It is guaranteed Water Proof.
3. It is a preservative of wood or metals.
4. It costs less than ordinary paint.
5. It contains no oil or acid.
6. It is an ornament to any building.
7. It will stop an ordinary roof from leaking.
8. It will not wash off or stain water.
9. It will not crack or scale off.
10. It is durable, and will last longer than any other paint.
11. It will stand and cold weather.

Why do we paint the sides of our buildings and leave the most exposed part, the roof, unprotected?

If a tin or shingle roof is leaky, do not go to the expense of newly covering, but use MOTT'S FIRE AND WATER-PROOF PAINT.

PETERSBURG TESTIMONIALS.

We, the undersigned, having had shingle and tin roofs painted with Mott's Patent Water and Fire Proof Paint, feel no hesitation in saying that so far it has given entire satisfaction, stopping leaks where nothing else did any good.

C. H. WARWICK, (shingle), Mrs. V. J. TAYLOR, (tin).

Mr. L. D. Mott, Jr.—This is to certify that I have used your Water and Fire Proof Paint on several leaky roofs, and since they were painted with your Paint they have not leaked at all. I cheerfully recommend the "Mott's Patent" as the best roof paint I ever saw.

DANIEL RAILLY, L. D. Mott, Jr., Esq.

Dear Sir—Your Water Proof Paint, used on my kitchen and stable roofs, gives entire satisfaction. Both of these roofs leaked badly, and since you applied your Paint I find no leaks, and we have had, since the work was done, some heavy rains. I take it I am but doing you justice, as well as your Paint, to say that I consider it a first-class Roofing Paint.

This Paint was, by my direction as Chairman of the Public Property Committee of this City, applied to a part of one of the Market Houses, and it gave entire satisfaction.

E. A. GOODWYN, Mr. L. D. Mott, Jr.—It is with pleasure that I add to the testimony of the excellency of your Fire and Water Proof Paint. The tin roof of my printing house leaked badly, but since you applied your Roofing Paint, it has not leaked at all, notwithstanding some heavy rains have fallen. I cheerfully recommend your Paint to all who have leaky roofs.

J. N. B. EGLE, We also refer to—J. T. Young, President Planters & Mechanics Bank; John Mann, Attorney at Law; F. Gallagher, Deputy Collector; and J. A. Warwick & Bro., Commission Merchants. (From Petersburg INDEX-APPEAL, No. 24th, 1884.)

TRIED AND NOT FOUND WANTING.—The test of the fire-proof qualities of Mr. Mott's roofing paint was made on Courthouse avenue last evening, in the presence of a large number of spectators, and the result satisfactorily established all the claims for the same. A small house made of dry pine covered with a thin coat of paint, was placed under a pile of shavings upon which six gallons of kerosene oil was poured and ignited. The flames leaped high into the air and burned furiously for forty minutes. Finally the house was raked from the debris and drenched with kerosene oil, which burned off clean, leaving the wood unscorched and as useful as usual. The authorities were not as severe as usual, was not to prove the impossibility of destroying the box by fire, but to show that the paint is an effective protection against the ordinary accidents which cause fire. This was made so plain to our mind that it has been determined to treat the roof of the INDEX-APPEAL building to a coat of it as soon as the house is remodelled. Another and in our opinion, more valuable quality of the paint is its imperviousness to water, making it a sure remedy for leaks in old shingled and tin roofs. As a test of this, a paper box for the paint on the inside and kerosene oil poured into one and water into the other without the slightest effect upon the paper. The boxes with their contents can also be seen at the Waltham hotel to-day. Persons who may have leaky roofs, or who may wish to guard against fire should give Mr. Mott a call and learn from him about the matter. We have no hesitation in saying that he has a good article which is worthy of the attention of property owners.

Orders respectfully solicited. Mr. G. L. Wright, the General Agent for the State, is at the Purcell House, and will be pleased to receive orders and give all information required.

A public test, same as that referred to in the extract above, as had in Petersburg, will be made in this city, due notice of time and place to be given.
