The day has been rather breezy and gusty, but, thank good fortune, it has not been dusty.

We are having the conventional April weather to-day with smiles and tears, the latter struggling hard for the ascendancy.

He is hopeful of the usual happy results. At three o'clock this afternoon he appeared before the House Committee on Rivers and Harbors. In the short time of five minutes he preapl 15 sented the whole case in an effective address in which he alluded to no matter embraced in the chief engineer's report. The leading features of the work, the growth of the city and its commercial rank and the national importance of the undertaking were all treated with great clearness and practical sagacity. Ac RECEIPT BOOKS, companying the speech was a large map which Mr. VanBokkelen showed the committee, explaining such points as occurred to him to be necessary or were desired by the members themselves. It seems that except four little places on the bar, and the last twelve miles lying nearest the city, there is already the depth of sixteen feet at low water. It is but little less than this at the points indicated. During the pres ent season ships carrying 5,000 bales of cotton have cleared
