A LULLABY.

Enfolded in a fond embrace,
A little babe reposes;
A dreamy sweetness lights its face,
As sleep its eyelids closes,
The mother rocking to and fro,
Her fair face fondly smiling,
With lullaby so soft and low,
The cherub is beguiling.

Oh, sweetly rest thee, baby mine,
For shadows bring the even;
The sleep of peace be ever thine—
Thy dreaming be of heaven.

At last the drooping eyelids close;
In snowy robes reclining,
Dear baby rests, in calm repose,
O'er dim a single morrow.
To crib she goes with lightest tread,
To precious burden clinging,
And lays it gently in its bed,
Erewhile so softly singing.

Oh, sweetly rest, etc.

Oh! baby, rest thee sweetly now,
And may no shade of sorrow
O'ercast the beauty of thy brow,
Or dim a single morrow.
I watch thee in thy peaceful sleep,
With jealousy of lover,
And pray that angels vigil keep
And ever o'er thee hover.

Oh, sweetly rest, etc.

UNDERNEATH US.

The Great Kentucky Scientist and Cave Expert Gives His Impressions of Our Subterranean River.

The discovery of the great subterranean river under Birmingham has been the great topic of conversation the past week. Great excitement has prevailed, and so great was the interest taken in it that Dr. Jos. R. Smith, W. S. Brown, Wm. Hood, T. J. Brown, Wm. Berney, Geo. C. Kelly, J. B. Farie and other leading citizens held a meeting at which it was decided to telegraph Prof. Joseph Mulhatten, the great Kentucky scientist and cave expert, the facts in the case and urge him to come at once to give it a thorough exploration. The result was that Prof. Mulhatten arrived from Louisville on Friday evening, and a party composed of the above named gentlemen spent all day yesterday exploring the great subterranean wonder. A strong boat was quickly improvised in the cave through the narrow inlet and the party proceeded down the river for at least fifteen miles before there was any obstruction to prevent them from going forward, and that was only a narrow formation of recent origin that can be easily cleared away. The natural tunnel through which the river flows is of almost uniform width, and say about 300 feet for the distance of fifteen miles navigated, and the height is at least 150 feet, so that a steamship of the largest class could navigate it with ease; the depth of the stream varies from 45 to 70 feet. It is connected with tide water, and this will give Birmingham a wonderful and cheap direct outlet to the sea, for the products of its furnaces, its mines and industries generally.

The above is Mr. Mulhatten's first impression of the wonder, which is fully corroborated by all of his party of daring explorers. But this is not all. Prof. Mulhatten has this to say of it: "The great subterranean river recently discovered under the city of Birmingham is undoubtedly the most remarkable discovery ever made on the American continent. The river is greater in volume than the mighty Mississippi. Its vast subterranean bed is undoubtedly due to the grinding and cutting of immense icebergs during the glacial period, then at a subsequent preadamitic period, violent upheavals of the earth toppled over the mountains which forms the present grand archway through which the icebergs continued to cut, leaving it as it is now—a natural ship canal to the Gulf of Mexico. A prehistoric race undoubtedly utilized it for the transportation of minerals from this section to the sea where they were transported to various parts of the world. Furnaces on a scale scarcely so magnificent yet as satisfactory in results to these prehistoric people undoubtedly existed on the present site of Birmingham, as ruins of these, and of ancient sun temples are found in various parts of this country."

"Added to this," says Professor Mulhatten, "we discovered in niches of the cave numerous articles of bronze, also statuary, numerous masonic emblems, and mummies with sandals on their feet—all in a perfect state of preservation. We also discovered the remains of many marine monsters of the Dias or old red sandstone period, prominent among them the huge ICHTHYOSAURUS, which was undoubtedly used by these prehistoric races to drag their ships from what is now Birmingham to the Gulf of Mexico. These extinct sea monsters were docile and harmless, and were harnessed to the ships laden with pig iron, which they pulled to the sea with the greatest of ease. They were more powerful than the most powerful locomotive of the present day. Hulls of these ancient ships are scattered all along the banks of this great subterranean stream."

Further explorations will be made to day by Prof. Mulhatten and his scientific party, and their next report will be eagerly looked for by the readers of the Age as the wildest excitement now prevails over these latest developments. Thousands of people have been crowding around the entrance to the river clamoring for admission. Prof. Mulhatten saw numerous eyeless fish and eyeless saw-nosed fish and other species; also eyeless amphibious animals of the alligator and reptile tribe. He says a company should be formed at once to clear the river of any obstructions, and that boats and barges to navigate it should be constructed at once. As the entrance to it is on one of the streets of the city, it will therefore belong to the city and cannot be claimed by any private individuals.

This discovery is of paramount importance to Birmingham, to Alabama and to the entire scientific world, and is worthy of the greatest enthusiasm.

Platform of the Democratic Party of North Carolina.

We again congratulate the people of North Carolina on the career of peace, prosperity and good government on which she entered after the inauguration of a Democratic State Administration, and which has been unbroken for so many years since; upon the just and impartial enforcement of the laws; upon the efficiency of our common school system, and the great progress made in popular education; and upon the general improvement and enterprise manifested in every part of the State. And we again challenge a comparison between this state of things and the crimes, outrages and scandals which attended Republican ascendancy in our borders; and we pledge ourselves to exert, in the future, as we have done in the past, our best efforts to promote the material interests of all sections of the State.

Affirming our adherence to Democratic principles as heretofore enunciated in the platforms of the party, it is hereby

Resolved, That we regard a free and fair expression of the public will at the ballot-box as the only sure means of preserving our free American institutions, and that the corrupt and corrupting use of federal patronage, in influencing and controlling elections is dangerous to the liberties of the State and the Union.

Resolved, That we are in favor of the unconditional and immediate abolition of the whole internal revenue system, as an intolerable burden, a standing menace to the freedom of elections, and a source of great annoyance and corruption in its practical operation.

Resolved, That no government has a right to burden its people with taxes beyond the amount required to pay its necessary expenses and gradually extinguish its public debt. And that whenever the revenues, however derived, exceed this amount, they should be reduced so as to avoid a surplus in the treasury. We therefore urge upon our Senators and Representatives in Congress to exert themselves in favor of such legislation as will secure this end.

Resolved, That with respect to the tariff we reaffirm the life-long and fundamental principles of the party declared in the National Democratic platform and that the details of the method by which the constitutional revenue tariff shall be gradually reached, are subjects which the party's representatives at the Federal capital must be trusted to adjust; but in our opinion the duties on foreign importation should be levied for the production of public revenue, and the discriminations in its adjustment should be such as would place the highest rates on luxuries and the lowest on the necessities of life, distribute as equally as possible the burdens of taxation and confer the greatest good to the greatest number of the American people.

Resolved, That the course of the Democratic party in furtherance of popular education, by efficient public schools in all sections, and the establishment of graded and normal schools in the larger towns and accessible centers, is a sufficient guarantee that we favor the education of all classes of our people and we will promote and improve the present educational advantages so far as it can be done without burdening the people by excessive taxation.

AND WHEREAS, There is now more than a hundred millions of dollars in the treasury of the United States, wrung from the pockets of the people by unjust taxation on the part of the Republican party, therefore

Resolved, That we will accept such distribution of said surplus revenues of the government for educational purposes as may be made by the Congress of the United States; provided always, that the same shall be disbursed by State agents and not accompanied by objectionable features and embarrassing conditions.

Resolved, That it is due to the white people of our eastern counties, who have so cheerfully borne their share of our common burdens, that the present, or some other, equally effective system of county government, shall be maintained.

Resolved, That in view of the existing and increasing harmony and kindly feeling between the two races in this State and a similar condition of things which we believe to exist generally in other Southern States, we deprecate the attempt of the Republican party in its recent platform at Chicago to force civil rights as a living issue, and we denounce it as a fire-brand and a hypocritical expression of interest in the black race, a wanton insult to the whites of the South, and tending to stir up strife between the now friendly races.

A Remarkable Tribute.

Sidney Ourehadro, of Pittsburg, Pa., writes: "I have used DR. WM. HALL'S BALSAM FOR THE LUNGS many years with the most gratifying results. The relieving influence of HALL'S BALSAM is wonderful. The pain and rack of the body, incidental to a tight cough, soon disappear by the use of a speebl of directions. My wife frequently sends for HALL'S BALSAM instead of a physician, and health is speedily restored by its use."

Hardened Liver.

Five years ago I broke down with kidney and liver complaint and rheumatism. Since then I have been unable to be about at all. My liver became hard like wood; my limbs were puffed up and filled with water.

All the best physicians agreed that nothing could cure me. I resolved to try Hop Bitters: I have used seven bottles; the hardness has all gone from my liver, the swelling from my limbs, and it has worked a miracle in my case; otherwise I would have been now in my grave. J. W. MOORE, Buffalo, Oct. 1, 1881.

Poverty and Suffering.

"I was dragged down with debt, poverty and suffering for years, caused by a sick family and large bills for doctoring. I was completely discouraged, until one year ago by the advice of my pastor, I commenced using Hop Bitters, and in one month we were all well, and none of us have seen a sick day since, and I want to say to all poor men, you can keep your families well a year with Hop Bitters for less than one doctor's visit will cost.
