WILMINGTON. N. C.

MONDAY, SEPTEMBER 22, 1884 intered at the Postoffice at Wilmington, N. as second-class matter.

The fastest sea-going war vesse affoat is the new Chilian cruiser Bsmeralda, that recently obtained the mean speed of eighteen and one-quarter knots perer Isis, hitherto the fastest man-of-war, per hour; she is. however, unarmored and comparatively lightly armed. The Esmeralda may be described as a casemated monitor with high freeboard and every essential to make her seaworthy for any voyage. She carries 10-inch. breach-loading, very longrange bow and stern guns that sweep through more than 180 degrees of the horizon, protected with shields and capable of penetrating twenty inches of iron armor. Besides these she carries on each broadside three six penetrating eleven inches of iron armor. These powerful guns are worked by the most perfect system of labor-saving hydraulic machinery yet devised. The Esmeralda carries in addition to the above Hotchkiss' revolving cannon. Gardner and Gatling repeating guns, French Window Glass. mounted in every available place, even in her tops (mastheads,) all protected with steel shields. These latter weapons are mainly for detence against torpedo boats. The striking features works its way up through of the Esmeralda are her moderate size and her comparatively light armor and her small draugt of water, her high speed and her powerful armament. It is an open secret that she was designed with especial reference to the possibility of trouble between the United States and Chili, and to the opportunity afforded to raid our defenceless Pacific ports. Compare the Esmeralda as she is with the Chicago as she is promised. Esmeralda could as easily whip the tions under them. Chicago as the Merrimac did the old war. By the way, how does the Chicago

> It must seem the very irony of fate to the Blaine managers, says the News & Courier, that the great Northwest, which they had counted on so confidently as their own under all circumstances, should be the very section where Republican revolt against their candidate has given the death-blow to his chances of success. The Independent rising in the East, formidable as it is admitted detection among the Republicans in some of the Western States. This is especially true of Wisconsin, which has of the strength of the anti-Blaine Republican vote. That there was such a vote there had been known previous to Mr Schurz's arrival, thobody dreamhis reception has shown it to be. The State has been counted as safely Republican for many years. Mr. Tilden is sitting still, steadfastly gazing at came very near carrying it in 1876, nothing, his wite has not a word to say when Mr. Hayes' majority was only to him; but as soon as he picks up a 2,960 over all, and his plurality over long breath and almost drowns him Mr. Tilden only 6,000. Garfield carried with an avalanche of questions. it by a plurality of 29,000, but in the last State election, in November, 1881, while the Republican candidate for Governor was elected by a plurality of 11 000, he lacked more than 8,000 votes of a majority over all opposing candi- nation possible of the essential prindates. The Prohibition vote in that ciples of those vegetable curatives To all who are suffering from the errors election reached 13 000. In the Congreater than the Republican vote, time curing these who had despaired and the Prohibition vote was nearly 14,000. These figures show a steady growth in the Democratic vote and in the Prohibition vote, both increases being drawn from the Republican party and-both traceable to the entrance of the temperance question into politics. The great advance in the Democratic vote, from less than 70,000 in 1881, to nearly 104,000 in 1882, was due almost entirely to the accession of the German vote. In the present campaign the as an artist in Bos on, where he has Germans are not only solidly for Cleve-land, but are working as novembefore. With his father he is now engaged on a land, but are working as never before sketch for a statue of Theodore Parker, for Democratic success in order to Walt Whitman, alluding to the reavert the danger with which the pro- cent earthquake, said the other day: gress of Prohibition menaces their brewing interests. Their activity has had the natural effect of increasing the Everything is delusive, evasive and zeal of the Prohibitionists, and of shaky." strenghtening their determination to act independently. The Prohibition candidate, St. John, has had the largest and most enthusiastic meetings which sion, although the area is so scant. He the party has ever held in the State. The Prohibition vote is likely to be unprecedentedly large, and to cut down the Republican vote on one side as badly as the Germans will cut it down on the other. 'When, in addition to these two disturbing causes, it is remembered that there is in Wisconsin a distinct anti-Blaine Republican revolt, entirely

separate from the Germans, numbering

in Milwaukee alone about 5,000 voters.

it becomes evident why the Democrats

are claiming the State for Cleveland by

10,000 majority.

Commander Gorringe has written letter with regard to ships' lights which should receive the careful attention the subject and the writer's reputation de-

serve. The inability of the officers of the Tallapoosa to tell the course of the coal scow that sunk her is only the latest of thousands of illustrations of the defects of the present system of arranging the lights on shipboard. The red and blue lights are mistaken for each other by men who are color-blind, and sometimes by those who are not colorblind. It is possible, Commander Gorhour on a sea-trial The British cruis- ringe says, for a vessel to alter its course 60 degrees without revealing that change has a maximum speed of eighteen knots to an observer by any alteration in the appearance of its lights. Collisions are constantly occurring through the

fault of the present system.

a remedy for this state of affairs Com-

mander Gorringe proposes that vessels shall carry four range lights instead of the side lights of red and green now in use. Forward he would put a white light, and a red light aft of it and somewhat higher. The after lights should be a red light and a white light, but here the red light should be the lower. By this arrangement Commander Gorinch breach-loading rifles, capable of ringe thinks it would be easy to tell the exact course held by any vessel, and to detect immediately any variation in it. These are the views of one of the ablest seamen that our navy has produced,

and the manifest superiority of range

lights over side lights should secure the

adoption of the system he recommends.

On the Sky. Cunning, deceitful, treacherous and sly are the attacks of malaria. ponds -stagnant imperfect plumbing from unwholesome drains. Many miserable victims of malaria sit down in their grief, thinking nothing can be done for them. Brown's Iron Bitters can restore them. Dr. J. L. Myers, of Fairfield, Iowa, says. "Brown's Iron Bitters is the druggists. best iron preparation I nave known in my thirty years of practice."
