NO. 58.

LOCAL NEWS.

INDEX TO NEW ADVERTISEMENTS. C W YATES—Attention F C MILLER—A Fresh Supply HEINSBERGER—Congressional Government

There was no City Court this morning.

Columbus Court is in session this week.

The receipts of cotton at this port today foot up 94 bales.

Steamboatmen report that there is good, fair boating water in the Cape Fear river.

The tramps must have all left the city as none applied for lodgings at the guard house last night.

The legislature of North Carolina have granted a charter to the Germania Mutual Insurance Company, of this city.

As you are on your way to dinner, just stop in at Dyer's, and see the beautiful suitings. They give you a good appetite.

This has been a pleasant day for the month of March, notwithstanding the threat of the storm signal. The season advances beautifully.

A beautiful rainbow was formed at this morning's fire by the sun shining upon one of the streams of water which was played through the hose.

The off shore storm signal was flying today.

Br. brig J Williams, Layton, cleared today for Newcastle-on-Tyne, with 100 casks spirits turpentine and 2,707 barrels rosin, valued at \$5,500, shipped by Messrs. Alex. Sprunt & Son.

Correspondents must bear in mind that communications should be written only on one side of the paper, leaving the other side blank. This is always necessary to ensure publication.

The Boy Clipper Plow has earned a reputation of being the best ever used and are pronounced perfect by the best farmers. Sold wholesale and retail at the factory agency, JACOBI'S Hardware Depot.

Mrs. Margaretta Vieweg was so seriously burned in Baltimore on the 27th ult., that she died shortly afterwards. Deceased was a sister of Mrs. H. C. Prempert, of this city, and an aunt of Mrs. Wm. Bonitz, of Goldsboro.

Indications For the South Atlantic States, fair and warmer weather, in the Southern portion, rising, followed by falling, temperature in the Northern portion, winds shifting to Northerly in the Northern portion and Southwesterly in the Southern portion, rising, preceded in the Southern portion by falling, barometer.

A Long Journey. Mr. Hezekiah Hewett and wife, who were born, reared, married and have always lived in Brunswick county, came across the river this morning en route to Bowie county, in the North-eastern part of Texas, where they will pass the remainder of their days with their sons, Messrs Solomon and T. E. Hewett. These last named gentlemen came from their homes in Texas, where they have lived many years, to accompany their venerable parents on their long and tiresome journey, and were with them this morning. Mr. and Mrs. Hewett are aged respectively 84 and 83 years and have been married 62 years. It is truly a great age at which to start upon such a formidable undertaking, especially so with Mr. Hewett, as his mind is much impaired. Mrs. Hewett retains her mental faculties to a remarkable degree.

The Art Amateur For March contains very attractive designs for a mirror frame (mornings), a dessert plate (caricatures), a plaque (child's head), a Christmas-card box-cover (birds and holly), a chair-back, dollies, and repose work. The frontispiece is a remarkably fine reproduction of Walmers' etching of Rembrandt's famous portrait of "The Gilder," lately sold by the estate of the Duke de Morny to an American purchaser for \$40,000. Articles of special value are the notice of "The American Water Color Society Exhibition" and "How Two Houses were Furnished." Dr. Dresser begins a series on "The Decoration of our Homes," and wood engraving, clay modelling, picture framing, china painting in water colors, church needlework and embroidery stitches are among the practical topics treated in this number. The Art Amateur is a singularly happy union of the instructive and the entertaining in the domain of art, and stands without a rival in its chosen field. Price, \$4 a year; single numbers 35 cents. Montague Marks, Publisher, 23 Union Square, New York.

"Man wants but little here below, nor wants that little long," sang the hermit of Goldsmith. Perhaps he does, if he is thinking of colds, but if he is thinking of cough remedies, he wants it good when he gets it. Dr. Bull's Cough Syrup meets the wants of suffering humanity, and is all one wants here below to stop the ravages of colds.

Chicken Stealing

On Saturday night some of the gang of chicken thieves that infest the city visited the premises of Capt. J. M. McGowan, on Orange street, between Seventh and Eighth, and robbed him of four geese and the same number of chickens. They also visited the adjoining premises of Mr. John Thees and stole all the chickens from his coop. Poultry ought to be cheap, but it isn't.

A Green Old Age.

Mr. John S. James, father of the publisher of the REVIEW, celebrated today the 79th anniversary of his birth day, he having been born in this county on the 10th day of March, 1806. It is but a short time since he and his wife celebrated the 50th anniversary of their wedding day and we congratulate the venerable couple on this occasion on their good health and hope that they may be spared many years in the calm enjoyment of life's declining sun.

The Insurance Law.

The insurance law, which has passed both houses and is now the law, is to this effect: It reduces the license tax on insurance companies from \$195 to \$50. It repeals the law requiring all insurance companies to make \$10,000 deposit before doing business in the State. It permits persons in this State to go out of the State and insure in foreign companies, whether said companies have paid taxes in North Carolina or not, and rendering valid all such contracts. It repeals the "loss" clause and the "average" clause, but does not touch the "three-fourths value" clause.

This Morning's Fire.

At a few minutes after 9 o'clock this morning fire was discovered under the roof at the Northwest corner of the residence of Mrs. James Dawson, on the corner of Front and Chestnut streets. The alarm was immediately given and in a few moments the streets were alive with people hurrying to the scene. Smoke was issuing from under the eaves all around the building, showing that the fire was as yet confined to that portion of the house immediately under the roof. In a few moments streams of water were being thrown upon the flames and in a short time all signs of fire had disappeared. The damage to the house was inconsiderable, and that chiefly by water. The furniture was badly damaged by the immense volumes of water which deluged the building. The loss was fully covered by insurance in companies represented in this city by Messrs. Northrop & Hodges.

Eclipse of the Sun.

On Monday next, the 16th inst., will occur the annual eclipse of the sun, visible here as a partial eclipse. It will begin about 11:40 a. m. and end about 2:18 p. m. It is the return of the annual eclipse of February 19th, 1831. In 1831 the central line passed over Texas in a Northeasterly direction, being last visible on this continent in parts of North Carolina and Virginia. At this return the path will be much farther North. The eclipse will be annular over a line from Cape Mendocino, California, in a latitude 40 deg. to Greenland in latitude 71 deg. It is estimated that the eclipse will be annular over a path about seventy miles wide. The only towns of consequence in the United States within this belt are Eureka, California, and Bozeman, Montana. At St. Paul, the eclipse will obscure five sixths of the sun, but will not be annular. At Chicago seven-tenths of the sun will be hidden. From Rochester, N. Y., the obscuration will be somewhat less, but sufficient to render the eclipse a most interesting event. The eclipse will be annular because the cone of the moon's shadow does not reach the earth. It will appear annular at those places nearly in the line of the point of the cone. In an annular eclipse a ring of sunlight surrounds the moon's shadow, the moon being at such a distance that it does not cover the whole of the sun's disc. Until recent years annular eclipses have been neglected by astronomers; but during the last one some very important observations were made by the French astronomers, and it is probable that some effort will be made to observe the coming eclipse. Efforts will be made to photograph the eclipse during its entire progress, if the sun is not wholly obscured by the clouds. The event may furnish an opportunity to determine whether the moon has anything like an atmosphere. As the sun is likely to show a number of spots of considerable extent upon the date of the eclipse, it will be observed with added interest.

A Democratic Souvenir.

Mr. J. H. Bates, of 41 Park Row, New York city, has issued a Democratic souvenir, which is exceedingly happy in design and beautiful in execution. It is a lithographic print of a size suitable for framing. The upper corners contain large oval portraits of Cleveland and Hendricks, which are the most lifelike and accurate of any that have heretofore been published. Between them is a half-length portrait of Samuel J. Tilden, and in the background, behind the Sage of Gramercy, is a distant view of the National Capitol. Below this Thomas Jefferson, the father of the Democratic party, is represented with the Declaration of Independence in his hands, while in the distance Independence Hall is seen. Andrew Jackson and General George B. McClellan are represented in military costume in the lower corners, while to the right and left are ideal representatives of the army and navy. Taken as a whole this souvenir is an artistic and interesting production.

Fly Traps and Pitcher Plants.

An exchange says: "There are some very curious plants in the island of Madagascar. The sensitive plant, growing in abundance about 100 miles south of Tamatave, is a conspicuous object, with its delicate flowers resembling tufts of pink threads and its highly sensitive leaves and leaf stalks. When touched the leaves immediately fold themselves up, and then the leaf stalk falls, almost hiding the leaves under the branches of the plant. The pitcher plant also grows in the marshes along the east coast, but generally out of sight among the rushes and sedges at the water side. At the end of each leaf, which narrows to a mere stalk at the tip, it carries a vase like excrecence very much resembling a pitcher, with lid and all complete. This pitcher seems provided for the purpose of keeping the leaves well supplied with moisture, as a considerable quantity of water is often found in these receptacles." Are not these the same as our Venus fly trap and pitcher plant? If so, what is the use of going to Madagascar for plants that grow in profusion in the woods near Wilmington?"

List of Letters.

A list of unclaimed letters remaining at the Post Office in this City on Wednesday, March 11, 1885: A—Felix Allen, Brook Adkins. B—Amos Brock, Samuel Bowers. C—Linda Chase, M Childs, Moses Chisholm, R P Campbell. E—J F Ellis (spar maker), Dr Stephen Evans, Steve Elkins, M O Ettinger. F—Capt Henry W Fisher (2), W F Fillyaw. G—Wm H Gaskill.
