

THE DAILY REVIEW.

VOL. IX. WILMINGTON, N. C., MONDAY, MARCH 23, 1885. NO. 68.

THIS PAPER published every evening, Sundays excepted by JOSH T. JAMES, EDITOR AND PROPRIETOR. SUBSCRIPTIONS POSTAGE PAID: Year \$4.00. Six months, \$2.00. Three months, \$1.00; One month, 35 cents. The paper will be delivered by carriers free of charge, in any part of the city, at the above rates, or 10 cents per week. Advertising rates low and liberal. Subscribers will report any and all failures to receive their paper regularly.

The Daily Review has the largest circulation of any newspaper published in the city of Wilmington.

Allan G. Thurman has not been asked to be minister to England, but he is free to say that the post would not tempt him.

Appropos of his not learning English Victor Hugo says: "My English and American friends have spoiled me by learning my language, so I have never been obliged to study theirs."

The Concord, Mass., Public Library committee has unanimously decided to exclude Mark Twain's new book, "Huckleberry Finn," from the shelves of that institution, as "flippant, irreverent and trashy."

The Cincinnati board of trade and chamber of commerce are trying to protect the city from election frauds, by asking the Legislature to pass a registration law providing a polling place for every three hundred voters.

The commander of the only Chinese vessel that captured a French ship in the late battle was an American named Tilton, a graduate of Annapolis. He was made a commander in the Chinese navy, and two more ex-cadets are going over to enter the Chinese service.

There are now \$18,000,000 of approved claims for damages received by Western settlers at the hands of hostile Indians. The recent Indian appropriation act contains a clause which provides \$10,000 to enable the secretary of the interior to investigate these depre-dation claims, and report to Congress.

Secretary Lamar surprises the officials in the interior department. "We were told," says one of them, "that he would do nothing but receive visitors and read classical books; but he is a regular worker, has already stirred the boys up, and my opinion is that he will make one of the most practical secretaries we have ever had."

The British war department has approved the use of a smokeless gun-powder. It is called "cocoon" powder. The vision of the gunner will not henceforth be obscured by his own weapon; but his enemy will have the advantage of a more certain aim. The "smoke of battle" was as useful in deranging the aim of one side as of the other.

Parker Township, Pike County, Pennsylvania, is a political Eldorado. There are not enough voters in the township to fill the offices. There are now nineteen voters, a net gain of ten in six years. Every vote in the township was cast for Cleveland for President. It is said that the township has ten bears to every inhabitant.

The Texas Legislature has abolished three State departments, viz: The fish commission, the railroad commission and the commission of insurance, statistics and history. The House of Representatives has passed to engrossment the joint resolution for a Constitutional amendment in favor of prohibition, the same to be voted on by the people on the third Tuesday in August next.

Experiments recently made at Citico Furnace, Chattanooga, Tenn., develop the fact that superior gray or malleable iron can be made there. A Philadelphia iron manufacturer, who was present, said the iron was superior to that made at Pittsburg. This is the first ever made in the South and will open up an important business for Chattanooga. The iron can be made at several dollars per ton less than the Northern product.

Instruction in mechanical trades has been introduced in the Maine State Reform School at Cape Elizabeth, and has enlisted the interest of many of the boys, who have made very good progress under it. The boys are carefully taught first the names and uses of tools, and then how to use and keep them in order. They are also taught the names of the different kinds of wood used in carpentry and how to distinguish them. The trustees of the institution, in their annual report for 1884, say that the department supplies a long-felt want.

After six years suffering with rheumatism, Mr. Peter Mallen, 212 W. 24th St., N. Y., says he found no relief until St. Jacobs Oil, the sovereign cure, was applied, which cured him.

The Boy Clipper Plow has earned a reputation of being the best ever used and are pronounced perfect by the best farmers. Sold wholesale and retail at the factory agency, JACOBI'S Hardware Depot.

The almanac hit it exactly this time.

There was no City Court this morning.

The receipts of cotton at this port to-day foot up 36 bales.

The new moon completed its first quarter at 9 minutes past 12 o'clock to-day.

A fine assortment of Mocking Bird Cages can be seen at JACOBI'S Hardware Depot.

Register at once. Next Thursday will be too late as it will be the day of election.

Not many church goers yesterday. There was too good an excuse for staying in-doors.

The religious meetings at the Fifth Street M. E. Church will continue during the ensuing week.

Good oak wood is scarce and cannot be had at the docks. A few flat loads would sell well here now.

Green peas are in market. But they are some of last year's crop, and are used principally for planting.

The best goods for the least money. Everybody knows that "Dyer the Dyer" will dye your suit better than anyone else.

Theoretically, the Spring season opened last Thursday. Practically, it appears to be at least three months in the future.

There was another little snow-storm last night, following close in the wake of one of the most disagreeable Sundays we have had this year.

There was an alarm of fire at about 6 o'clock Saturday evening and the fire department turned out promptly, but could find no cause for the alarm. It was a false one.

To every Housekeeper a good substantial cook stove is an important necessity and our readers will find the best at Factory prices at JACOBI'S Hardware Depot.

Swed, barque Britannia, Larsen cleared to-day for Liverpool with 2,026 barrels tar, and 1,444 barrels rosin, valued at \$5,200, shipped by Messrs Alex Sprunt & Son.

Three white tramps were accommodated with lodgings at the guard house on Saturday night, and two more had the same accommodations last night. Tramps had better give Wilmington a wide berth, as the climate is not healthy.

Indications.

For the South Atlantic States, fair weather slight change in temperature followed during Tuesday by warmer weather, Northerly winds, becoming variable, and rising barometer.

More Stealing.

Some scamp visited the premises of Mr. George S. Willis, on McRae street, between Mulberry and Walnut, last night and stole therefrom a fine cape jessamine bush. There is a gang of these thieves and they will steal anything they can lay their hands on of a portable nature.

The Revival.

The revival at Fifth Street Church still continues and last night there were 19 penitents at the altar. Thus far there have been 163 conversions and 141 accessions to the church. This revival of religion has been wonderful in its effects and its like has not been known in Wilmington in many years.

Fruit Prospects.

Farmers along the line of the Wilmington & Weldon Railroad express themselves as hopeful of a good fruit crop this season. They think that the excessively cold winter has kept the buds back and they have not been injured, and that when warm weather does come it will continue, so that the trees will have no further set back.

Good materials properly proportioned which are the essential requisites in Ready mixed Paints can be best attained by using the N. Y. Enamel Paint sold at JACOBI'S Depot.

State Board of Health.

The State Board of Health met in the Yarborough House, in Raleigh, on the 20th inst., with the following members present: Prof. W. G. Simmons, of Wake Forest, and Drs. J. W. Jones, Tarborough; R. L. Payne, Lexington; S. S. Satchwell, Rocky Point, and Thomas F. Wood, Wilmington. From Dr. Wood, who has returned to the city, we get the following interesting report of the proceedings:

The act relating to the Board of Health was read, after which an election was held to fill the vacancy caused by the death of Dr. M. Whitehead and Dr. Richard H. Lewis, of Raleigh, was elected. Dr. J. W. Jones, of Tarborough was unanimously elected President of the Board.

The following resolution was ordered on record:

Resolved, That the appropriation of \$2,000 per annum, by the State, for the benefit of this Board be drawn quarterly upon a requisition of the President of the Board in favor of the Treasurer.

Resolved, That a copy of this resolution be furnished the Auditor of the State for his information and guidance in issuing his warrants on the State Treasurer.

The following standing committees were appointed:

- Epidemics—Drs. Wood and Jones.
- Water Supply and Drainage—Drs. Wood and Winslow.
- Hygienics of Public Schools—Drs. Satchwell and Lyle.
- Illuminating Oils—Prof. Simmons.
- Climatology—Dr. Jones.
- Adulteration of Food and Medicines—Drs. Payne and McDonald.
- Vital Statistics—Drs. Lewis and Wood.
- Sanitary Inspection—Drs. Jones and Payne.

The following resolutions, introduced by Dr. Satchwell, were adopted:

Resolved, That this Board has learned with pleasure that the National Board of Health has been provided with the proper means to restore it to its former condition of usefulness; and at the same time that we express our gratification, we desire also to assure the National Board of Health of our entire confidence in their organization and that we are prepared to co-operate with them in all the purposes of our mutual work.

Resolved, That in view of the new law of our Board, we respectfully appeal to our medical brethren of the counties that have no auxiliary County Boards to proceed to organize at once and elect their County Superintendents, and we recommend to County Boards that have held no biennial meeting the present year, to meet as early as practicable and elect their respective officers and Superintendents to serve until the next regular biennial election, and report to the Secretary.

At 10 o'clock on Saturday morning the Board, by invitation, had a conference at the Capitol with the Governor, who issued commissions to the following gentlemen:

Prof. W. G. Simmons, Wake Forest; Arthur Winslow, C. E., Raleigh, and Samuel H. Lyle, Franklin, Macon Co.

The management of the exigent fund of \$2,000, placed at the disposal of the Governor by the Legislature, was discussed. The Governor assured the Board of his interest in the entire work of the Board, and especially as to the preparation for the invasion of the State by an epidemic. As the law does not make any provision for preventive measures, it was determined by the Governor that he would look to the Board to devise the plan for the isolation and restriction of pestilential diseases. This the Board was willing to undertake, and an understanding was entered into that all preliminary preparations should at once be made. The Secretary of the Board will issue a circular at an early day, calling upon County Superintendents of Health to send by telegram, or by the quickest method at command, the news of the appearance of the first case of pestilential disease. Cholera is specifically mentioned in the law, but it also includes other pestilential diseases, such as small-pox and yellow fever. It is highly important, therefore, that the Governor, or the Secretary of the Board of Health, should be promptly notified, in order that means shall be at once applied.

Special Postal Delivery.

After July 1st, messenger boys, whose compensation shall not exceed \$30 per month each, will be employed at all free-delivery postoffices and at other postoffices in places having a population of 4,000 or over, whose duty will be to deliver at once upon arrival any letter bearing, in addition to usual postage, the ten cent delivery stamp provided for in the postoffice appropriation bill which lately passed Congress.

Passion Sunday.

Yesterday, the fifth Sunday in Lent, has always been called Passion Sunday, because of the special attention drawn on it to our Lord's passion. The Lenten services from this day until after the sad scenes of Good Friday are commemorated grow more solemnly impressive, bearing particularly upon the coming sufferings and crucifixion of our Saviour. Sunday next is Palm Sunday and Easter day is April 6.

Bold Burglary.

At a little after 12 o'clock yesterday morning Miss Amy Bradley, Principal of the Tiletton Normal School, was aroused by some slight noise and by the light of her lamp, which she had left burning when she retired the night before, she saw a colored man at her bureau. He had her watch in his hand and was evidently rummaging for other property when he was discovered. Miss Bradley screamed, when the burglar seized her by the back of the neck and attempted to choke her to silence, but she continued to scream for assistance until he became frightened and fled, leaving the watch and whatever property he had secured. There is no clue to the ruffian.

Personal.

Rev. Dr. Deems is to lecture in Raleigh to-morrow night.

We are sorry to learn that Mr. William Munds is still quite sick and confined to the house.

Capt. W. H. Bixby, U. S. Engineer, of this city, was in Raleigh on Saturday in company with Col. Craigbill.

Mr. E. J. Thorpe will leave on tonight's train for a flying trip to Florida. It is not known definitely how long he will be absent.

Hon. W. J. Green, who was expected here Saturday night, did not arrive. He was delayed and will probably be in Wilmington some time this week.

Mr. Horace P. Clark, of New York, brother to Mr. F. W. Clark, of the Carolina Central, was in the city yesterday as the guest of his niece, Mrs. J. Dickson Munds. Mr. Clark is the agent in New York for the Associated Railways.

Miss E. F. Smith, travelling agent for the Orphan's Friend, will visit the city this week in its interest. Those who are interested in the future success of the Orphan Asylum will not fail to subscribe. Remember that the whole amount goes to the Asylum. Mr. Jas. McD. French, Chairman of the Committee of St. John's Lodge, will call with her upon the citizens of Wilmington.

Angola Bay.

A News and Observer reporter has interviewed Gen. Wm. G. Lewis, State Engineer to the Board of Education, in regard to the drainage of the swamp lands in this State, and this is what he learned relative to the work now in progress on Angola Bay:

Just now the board is devoting itself especially to the improvement of Angola bay. "Bay," he is known, is merely a local name for a swamp. There are fifty convicts, capital road-makers, at work. So bad has been the weather that they have been able to make but two miles of road, but this, under the circumstances, is considered good progress. A ditch six feet wide and four feet deep is dug and another four feet wide and four feet deep. Between them the removed earth is thrown up, forming a road 23 feet wide. The "draining power" is enormous. The soil is remarkably porous, made so by the millions of roots and rootlets of trees and grass which reach down into it and dying or drying up leave spaces through which the water percolates readily. In the great pine belts the same is the case on a larger scale. The big and long tap roots of the pines go straight down for moisture. When the pines die by and by there are what may aptly be termed dry-wells, one for each root. The soil is kept dry and the effect of the hardest rain readily passes off.

The quantity of game in these big poconins, bays, shelters or swamps, is surprisingly scarce. Deer are very abundant. A hunting party in Holly Shelter, in one hunt, got up 27 deer, but as Gen. Lewis laughingly remarked, only bagged three. Bear and wildcats may easily be had for the seeking.

The druggist who hesitates now is lost for the winter. He should sling together some sweet oil and liquorice and bring out his cough syrup at once. Dr. Bull's Cough Syrup does not pay him enough profit.

We observe quite a fine display of new Revolvers for very reasonable prices, at Jacobi's Hardware Depot.
