The Chinese companies at San Francisco several months ago prepared a set t books for use in the United States ourts, ostensibly to aid the officers in ascertaining the names of Chinese who are entitled to prove former residence in this country. These books contain over 11,000 names and have proven an important factor in aiding Chinese im migrants to land. Instead of aiding in detecting fraudu ent applicants for admission, these books are in reality of great assistance to the companies. for they can readily obtain any number of names from it and send to China for the same number of coolies to be sent on a certain steamer. These coolies can be instructed to answer to the names sent back and arriving here writs of habeas corpus can be issued to them, and by the time their cases are called into Court they have all learned a tale of former residence which they can repeat to the judge. By the aid every month.

The correspondent of the London Times, writing from the advance post of the British army in the Soudan, says: "The Arabs seem to be more like wild beasts than human beings. Even women and children fight in their ranks and when our men sought to afford aid to some of the enemy who could not walk the latter crawled toward them with their spears between and body, Sore Throat and Nose, Scrofula, Old their teeth, striving even yet to slay a Sores, Eczema, Tetter and all Blood and Skin Keffer Those traits somewhat dimin Kaffir. Russia refuses to give explanations of the Penjdeh fight until she has first heard from General Komaroff, and England replies that this is but a new subterfuge on the part of Russia in order to gain more time. Mr. Gladstone finds himself coerced into accepting the leadership of the Jingoes, and Earl Granville sends fresh demands to Russia for the withdrawal of her troops to the position they occupied a year ago that cannot possibly be acceded to. The German Ambassador in London is of the opinion that diplomacy has had its say; Vienna and Berlin alone still have lingering hopes of a peaceful settlement,

It is evident 'hat England and Rus sia may at any moment be drawn into he deadly struggle, which beginning in Alghanistan will spread to the Black Sea and the Baltic. Both parties are ready to fight and both parties have been driven by circumstances into an impasse from which it seems impossible for them to get out. Both nations bring you in money faster than anything e'e are thoroughly aroused. Gladstone is cheered enthusiastically when he appears on the street, and the Czar, on his entry into the theatre, is greeted with intense applause. The English are spoiling for the fray, the Russians are waiting with set and slubborn determination for the command from the Czar to accept the challenge of war.

There can be no doubt that Rossia has always intended at some time or other to open a free and unrestricted passage for herself from the Black Sea to the Mediterranean, and it is possible that she intended to do so in the springs aration. Some time or other she will have to shake off the last vestige of the hum:liating condition, placed upon her after the Crimean war, and she has perhaps come to the decision that the fight may as well come now as at any other time.

Alabama, Missouri, Nebraska, Neyra da, Oregon, Kansas, Michigan, New York, Vermont, New H mpshire. Rhode Island, and Maine have within a year passed laws providing for inschools, with special reference to the effect of alcoholic liquors on bodily health; and there is prospect of similar legislation in West Virginia, Pennsyl vonia, Illinois, and some other States. Local option laws have been adopted by three States. Kansas has strengthened her prohibitory law, and Iowa has held through her courts that her gon has adopted a bill sumitting a constitutional prohibition to the people.
