EDITOR AND PROPRIETOR. SUBSCRIPTIONS POSTAGE PAID: me year \$4.00. Six months, \$2.09. Three months, \$1.06; One month, 35 cents. The paper will be delivered by carriers free of charge, in any part of the city, at the above Advestising rates low and liberal.

se Subscribers will report any and all fallures to receive their paper regularly,

The Daily Review has the largest tona file circulation, of any newspaper . Montal in the city of Wilmington.

It is thought that the year's sales of tobacco at Lynchburg, Va . will be the largest on record.

There are in England one hundred and eighty seven ragged schools which are attended by fifty thousand children.

Maples n has lett, but be flung defi aree back'at America's locked vaults saving he'd be over next Fall with a larger opera troupe than ever. It is thought that Lake Mistassini, in

northern Canada, will prove to be larger than Lake Ontario when the surveys now making are completed. Bob Ingersoil says it is better to wake

a child in the morning with a kiss than with a club. That depends upon whose child it is is. It Bob is the child the club should be used by all means, When it comes to newspaper nomen-

elature Arkansas, ranks "high up."-Among the weekly publications are the Viola Tackhammer, Magazine Serpent, Kingsland Kicker, Swift's Flying Needle and Springdale Yellow Jacket.

Very little interest, was shown at the recent sale in Washington of ex-President Arthur's surplus horses. It re mains to be seen whether as a future "dark horse" the Republican party will make much of a bid for him.

A firm in Northborough, Mass., has r ceived from Baltimore a cargo of rags, and in the centre of one of the bales was found an old-fashioned pocketbook containing a \$20 Confederate note, a gold chain, and some small

The wheat crop of the United States is the poorest seen for years, and in Virginia it is reported that scarcely "bread and seed" will be made. This is unfortunate, but it will enable the country to work off its large surplus of

The San Francisco Board of Educa tion asks for an appropriation of about a million dollars for the year beginning July 1, and of that sum less than \$70, 000 is for teachers' salaries while over \$13,000 is for janitor's salaries.

The growth of some of the Southern States is illustrated by the statement concerning Chattanooga that it has increased since the war "from a clump of whitewashed warehouses and shanties to a city of 20,000 inhabitants; from a tax roll of \$1,300,000 to one of \$7,000,-000, and has increased its business cap ital from \$209,000 to \$5,000,000."

To those who remember the old grist mill, with its single or double run o stones, its lazy wheel, and the miller who was boss and all hands, the leat of one of the great Minneapolis mills in turning out 6,200 barrels of flour in one day seems to mark as great an advance in mechanical appliances and business enterprise as can be shown in any manufactures.

At Otao, about twenty miles from Suakim, on the Suakim and Berber Railway, stands a huge bunch of rocks about one hundred feet high, of somewhat conical form. Advantage is taken of the eminence of this rock for posting sentries; hence it is known as the "Tower Rock." On the face of this rock a huge advertisement, two hundred and fifty feet square, in letters o tour and a half feet high, indicates that "Pear's soap is the best."

Mr. A. F. Howard, Collector of Customs at Portsmouth, N. H., in his letter of resignation, recently tendered the Secretary of the Treasury, says that for twenty years he has been a firm believ er in the Jacksonian doctrine, that to the victors belong the spoils, and that consequently his "offensive partisanship" can be established by many witpesses. In brief, he confessed that he ought to go, and the Secretary shared the same opinion.

A surprised man is J. B. Ham, who went to the New Orleans Exposition to care for Maine's interests. He writes to the Lewiston Journal that rum shops are plenty and teetotalers in the minority, but in the whole six months of his residence there he had not seen six drunken men within the city's corporate limits. Mr. Ham, who is a Prohibitionist, does not attempt to explain this singu'ar fact. He says: "It may be in the quantity or quality of the beveraages drunk, and it may be in the climate." But he leaves the solution of the problem to a longer-headed philoso-
