The Daily Review has the largest bona fide circulation of any newspaper published in the city of Wilmington.

Choice grapes are selling for a rent a pound, wholesale, on parts of the Pacific coast.

It is now reported that Cleopatra's Needle, in Central Park, New York, is sagging. The obelisk is in danger of crumbling to dust.

A great many coins—English shillings, sixpences, coppers and one Canadian piece—were found in Jumbo's stomach by the gentlemen having charge of his remains.

Governor Hill, of New York, has been endorsed by the Trades and Labor Assembly, representing all the labor organizations of Syracuse as a "well-tried public servant," and his reelection is advocated in the interest of the laboring men.

The United States stands third in the list of beer producing countries, Great Britain at the last general estimate brewing 1,000,000,000 gallons, Germany 900,000,000 and the United States 600,000,000. Last year 18,000,000 barrels were produced in this country.

A German scientific journal recently made the statement that it would be beneficial to the eyesight to print books in dark blue ink on pale green paper. The first volume printed according to this method, "The Natural History of the Women of Berlin," has just made its appearance.

A stranger is surprised by the large number of drug stores in Montpelier, Vt., but he need not believe that unusual trade in medicine is the cause. Vermont has a prohibitory liquor law, and by far the larger proportion of the drug trade is in contraband whiskey.

A report that some of the dynamite cartridges which have been placed in position for blowing up Flood Rock in Hell Gate were injured by corrosion and would be removed, has been contradicted by Lieut. McFarland. Everything is going on smoothly, and it is now expected that the explosion will take place on Wednesday, October 7.

A Washington dispatch says: "Secretary Whitney denies emphatically that it is his intention to open up work at the League Island Navy yard and elsewhere to give employment to laborers and secure their votes during the coming elections. There will be no extensive repairs to the navy this year. The most that will be done will be to repair a few boilers."

There was never a time in the publishing business, says an expert, when profilers of manuscript from women were so numerous. Society belles seem to have all at once caught the fever of authorship. As some houses will publish almost anything in which the profit is assured, but nothing from untried pens, without a guarantee, they can usually give a definite answer to an applicant without first reading the copy.

The number of adult unmarried persons in France is constantly increasing. In recent statistics presented to the Academie de Medicine it appears that in the year 1770 they numbered 190, while in 1885 they are found to be in the proportion of 224 per 1,000 inhabitants. The average age at which French people marry is high, being 28 1/2 years for men and 25 for women. Unmarried men are more numerous in the frontier departments, and women in those of the centre of France. Large cities promote celibacy. Crimes, deaths from disease and suicides are proportionately larger in the unmarried portion of the population.

**Chronic Sciatica Cured.**

ASHLAND, MASS., January 23, 1885. For the last two years I have hobbled around on crutches. During that time I was afflicted with sciatic rheumatism. I not only suffered terrible pain night and day, but was utterly helpless. After using every possible effort to get well, and exhausting the best medical advice, I was induced to try four Allcock's Porous Plaster. These I wore on my side, hip-bone and thigh. In one week I was almost entirely free from pain, and strength returned to my palsied limb. I continued using these Plasters with the most surprising results for three months, when I became perfectly cured, and abandoned the use of crutches. Persons desiring further information can address me. Post Office Box 184, J. F. GATES.

Just received a lot of wood and galvanized iron Well Buckets, which we are offering low. JACOBI'S HDW. DEPOT.

**Tea Plant.**  
Mr. George P. Lamb, the florist, has in his conservatory, on Sixth street, between Princess and Chestnut, a tea plant which is quite a curiosity as it is now now in full foliage and bloom. The leaves are of a dark green color and the blossoms have white outside leaves with a yellow centre.

**Consolidated.**  
Salem Press: Lieut. H. R. Lemly, U. S. A., a native of this place, has accepted a place on Gen. Hancock's staff, with the rank of Captain. Headquarters, Governor's Island, New York.  
It was truly very considerate for Lieut. Lemly, especially as he has the rank of Captain, to accept a position on General Hancock's staff. In our army days subaltern officers were frequently assigned to duty's and ordered to report.  
**Taylor's Bazaar.**  
Mr. and Mrs. John Taylor have recently returned from an extended visit to the Northern markets and have since, with all of their force, been busy opening the purchases made by them. They are now ready to welcome their customers and with this end have named next Monday, Tuesday and Wednesday as opening days. The ladies will govern themselves accordingly.  
**For the Ladies.**  
Miss E. Karrer is now comfortably located in the large, airy and comfortable store in the Vollers building, on South Front street, just opposite the New Market, where she will be ready to receive her customers on Monday next. Nearly all of her goods are new and she is still busy opening. The stock will be in full display by Wednesday and after that there will be additions by every steamer.  
**A Fine Instrument.**  
One of Peloubet & Co's Reed Pipe Organs is on exhibition at Heinsenbergers, and it is certainly an elegant as well as a powerful instrument, and approaches almost to the excellence of a regular pipe organ. The entire reed action is enclosed in a regular organ swell box, and the swells operated by the right knee are very effective. The left knee opens all the reeds and gives the organ its full power. In appearance it is solid and elegant and very much resembles an upright piano. In effects and use it is excellent.  
**Narrow Escape.**  
Two white boys went out to the Br-Steamship *Corn Marth*, which lies in the stream opposite the Marine Railway, in a small boat to-day and in getting alongside the boat was capsized, precipitating the boys and a dog which was their companion into the river. The boys were in imminent peril of being drowned, one of whom sunk but rose again, and would have perished had it not been for the exertions of Mr. George F. Tilley, who was near by and rushing to their assistance succeeded in rescuing them.  
**Business Changes.**  
Messrs Hansen & Smith, who have been so long known as successful ship chandlers on South Water Street, between Market and Dock, have disposed of the business and will hereafter devote their attention to operating the Carolina Oil and Creosote Works in this city, of which they are the proprietors, and in which they have turned out large quantities of creosoted timber, which has been highly commended by government officials and others having cognizance of its worth. Messrs Doshier & Kure are the purchasers of the ship chandlery business.  
**Personal.**
