The Rai'way Age is authority for the statement that almost exactly eight thousand miles of railroad were constructed during the year 1886. This That Dr. James Cannibas Indica is prevared in but two years in the history of the in Calcutta, India, from the purest and best country. In 1881 9.796 miles were built, and in 1883 11,568 miles. Of the glaintively, "but I'm no ostrich." 8.000 constructed in 1886, 3 352 miles were in the Southern and Southwestern States. In the Northwest 2,553 miles were built. The rest was distributed through the Middle and Pacific States, with the exception of thirty-one miles Age estimates the cost of all this new road way at \$160,000,000, to which the expense of equipment is to be added to make up the year's record of rew rail way investment.

> The yachtsmen of America are again seriously thinking of ocean races .-There will probably be entries from offered by the Road Thames Yach Club, which is to be sailed for next summer, but decidedly of much greater importance is the race proposed by Mr. R. T. Bash, owner of the keel schooner Coronet and member of the New York Yacht Cab. This yachtsman calls upon the owners of all American built yessels of the keel type to join him in a race from Sandy Hook to Queentown. the entrance fee not to exceed \$10,000. and the start to be made about the middle of May. He aptly says this will give all the yachtsmen who desire to enter for the Royal Thames prize plenty of time to arrive at the starting point and an opportunity for the sail: ing masters to put their craft in shape. It is more than twenty years since the Fleetwing, Ves: a and Henrietta raced across the ocean for \$90,000. Another big race of the kind would excite Americans throughout the world.

Crown Prince Frederick William made a timely and significant selection in sending a sword to the Regent of Bavaria as a Christmas gift. The sword seems about to resume its place as the implement of the hour in Europe. Even the neutrals, like Switzerland. Belgium and Spain, who have taken no voluntary part in foreign conflicts for two generations, are driven to great war expenditures to guard their neutrality. A project most promising if it succeeds, and most perilous if it tails, is that of the Balkan Confederation which Servia, Roumania and Bulgaria appar ently meditate, yet hesitate to essay. A permanent alliance of that sort could put a large army into the field, and would perhaps be acceptable to nearly every Power in Europe save Russia, for whom it would interpose a formidable obstacle in her path to the Boss proportional sum by devoting all their time | phorus. Its vary strength, too, would attract alliances; but such a confedera tion is as yet hardly more than a dream.

1887. Harper's Young People. AN ILLUSTRATED WEEKLY.

HARPER'S YOUNG PEOPLE has been called "the model of what a periodical for young readers ought to be," and the justice of this commendation is amply sustained by the large circulation it has attained both at home and in Great Britain. This success has been and in Great Britain. This success has been reached by methods that must commend themselves to the judgment of parents, no less than to the tastes of children—namely, by an earnest and well sustained effort to provide the best and most attractive reading for young people at a low price. The illustrations are copious and of a corspicuously high standard of excellence.

An epitome of everything that is attractive and desirable in juvenile literature.—Boston Courier. A weekly feast of good things to the boys and girls in every family whi h it visits-Brooklyn Union. It is wonderful in its wealth of picture information, and interest.-Christian Advocate.
