The want of Plaster has been one of the greatest drawbacks to successful farming in this betate, and it is an important service to this great industry and to the State.

It is quite indispensable in any judicious system of agriculture, and it serves several important ends, besides the direct one of furnishing lime and sulphur; it gathers nitrogen and prevents its dis ipation and loss; it is a specific for clover and other leguminous plants and it indirectly renders the potash of the soil available and so a tes in the reasonation of wern lands.
