The Japanese are artists in serving lish. The flesh of the fish is cut in thin slices and arranged on the plate very heatly in the torm of waves, sometimes without taking the skin off, and it is served with sauce called shoyu, flattery and complaisant comp iments e imposed of mashed raw turnips, horse radish, and generally some fresh vegetables cut in small pieces and reaweed. Probably more fish would be consumed in this country if Americans possessed the Japanese method of cooking.

The Legislature of New York has a member named Giegerich. The other day he astonished his fellow members by introducing a bill entitled: "An act o provide for the tree transportation by steam railroad companies of members of the Legislature during each session thereof." His explained that he was opposed to free passes, but as all Legislators travelled on them, he thought it would be well to compel the railroads by law to furnish free 4rans. portation, so that the railroads would not expect the Legislators "to do anything for them."

A well-known local Republican of Richmond, who is quite intimate with Gen. Mahone, said on Friday evening that the latter would at once begin preparations for the legislative campaign this fal', and, added this gentleman, "Mahone will be foremost in the fight." He was inclined to think that the Republicans may favor some settlement with the bondholders somewhat more liberal than the Riddleberger scheme. Others as well informed do not concur in this view. It is expected that a conference of the leading Republicans in Virginia will take place before the assembling of the Legislature.
