

THE DAILY REVIEW.

VOL. XI. WILMINGTON, N. C., MONDAY, MARCH 14, 1887. NO. 62

THIS PAPER is published every evening, Sundays excepted by JOSH T. JAMES, EDITOR AND PROPRIETOR. SUBSCRIPTIONS POSTAGE PAID. Yearly \$4.00. Six months, \$2.00. Three months, \$1.00; One month, 35 cents. The paper will be delivered by carriers free of charge, in any part of the city, at the above rates, or 10 cents per week. Advertisers rates low and liberal. Subscribers will report any and all failures to receive their paper regularly.

Henry Ward Beecher had \$20,000 in arrears on his bill for the former year. He formerly earned \$20,000 but allowed \$20,000 to accumulate in his wife's name.

Mr. May R. Patton, one of the signers of the secession ordinance, died Friday morning at his residence in New York, aged 78.

About the latest is a glass-bottomed boat, used, according to a correspondent of the Inter-Ocean to go down upon the bottom of the bottom of the sea at Nassau.

Watches costing about \$1,000 each are the prevailing hobby of Wall street men. They have one dial for the time of day and four small dials which indicate the day of the week, the date, the month and the quarter of the moon. A tiny gold sound the hours and half-hours.

Three Senators' wives, Mrs. Beck, Mrs. Hawley and Mrs. Voorhees, have passed away within a year and four days. Within a year and four months three Senators and the President of the Senate (Vice President Hendricks) have died. This makes a percentage of mortality in that body hitherto unprecedented.

Mrs. Hawley was a first cousin of Henry Ward Beecher.

The remains of the late General William King Loring, who died at the St. Denis Hotel in New York on the 30th of December last, were to have been taken today and removed to Jacksonville, Fla., where the final interment will take place. It is supposed that the remains will lie in state for a couple of days in Jacksonville and will then be buried in a plot in the new cemetery, dedicated to his family by the Common Council, amid a great demonstration.

Jackson, the Capital of Mississippi, is rapidly growing dry from the standstill of those who favor license to sell liquor. Last summer local option was adopted by the people of Hinds county, in which Jackson is situated. All existing licenses to sell whiskey were to expire by limitation and no more to be granted. All of the whiskey licenses have expired and only a few beer licenses are left.

The late Harris Haap, consul general at Constantinople, who died at his post recently, was, it is said at the State department, one of the oldest officials, as regards length of continuous service, in the consular or diplomatic service of the United States. He was appointed consul at Belfast, June 30, 1856; then consul at Tunis, March 14, 1867; consul general and secretary of legation at Constantinople, July 12, 1878, and consul general at the same place December 18, 1884, which appointment continued until his death.

A curious drama on the late unfortunate King of Bavaria will shortly be brought out in Berlin. It is a five-act play, "Louis II, King of Bavaria," recollecting the chief events of the monarch's career, and introducing the Queen-Mother, the present King, Otto, and other members of the royal family. Bavarian ministers and chief courtiers, Richard Wagner and Dr. Hadden, the last named of whom perished with Louis in the Starnberger See. As many of the dramatic personae are still living, the drama cannot be presented on the stage, but will be acted in public in the Berlin Concert Hall.

Another curious case of apparent amputation in a member of the body after had been amputated comes from Florida. George W. Clay's arm was amputated, put in a box and buried. On afterward he began to complain of the fingers of the buried hand were cramped and that there was sand between them. His physician and his wife had the box dug and opened, and the fingers cramped and the sand was just as George had said. They dug the arm properly, and re-attached it. Clay said that while they were digging he felt a awful pain in the buried arm, and then came a sensation of great relief, and there was no more of the old cramped sensation in the hand.

Saved His Life.
Dr. D. I. Wilcoxson, of Horse Cave, Ky., says he was, for many years, badly afflicted with Phthisis, also Diabetes; pains were almost unendurable and he sometimes almost throw him in convulsions. He tried Electric Bitters and got relief from first bottle and taking six bottles; was entirely cured and had gained in flesh, eighteen pounds. Says he positively believes he had died had it not been for the relief afforded by Electric Bitters. At fifty cents a bottle by W. H. Green & Co.

Yesterday's New York Star devotes much space to the alleged Baltimore and Ohio deal. We copy some of the most salient points:

The late tip-off of the Baltimore and Ohio Terminal deal emanates from Mr. Sully, from all connections with it. Negotiations looking to a consolidation of the interests in question are being carried on in Wall street circles, heretofore to be carried on, so far as the Room and Terminal is concerned, by Messrs. Bice and Thomas as principals. In this view of the situation they are a good one to give out to the Street, said a prominent broker yesterday, but those who place much credence in this rumor will have the same experience with Mr. Sully as the Irishman had with the flea.

WASHINGTON, March 12.—The scene of the great railway deal has been transferred to Washington. President Garrett of the Baltimore and Ohio reached this city yesterday afternoon with his wife, and dined with the German Minister in the evening; according to all reports, however, there was more than the social side to his visit. Mr. J. G. Moore, of Moore & Schley, New York, who is credited with being instrumental in effecting the agreement between Mr. Garrett and Mr. Sully, arrived late in the evening, and held a long interview with Mr. Garrett. Everything indicated that whatever the deal was it was not "off." All who called at Wormley's today, where Mr. Garrett is staying, to interview him about the great deal, were refused admittance except Colonel W. H. Clarke who has charge of the Baltimore and Ohio telegraph service here. Mr. Garrett and Colonel Clarke took a cab shortly after 12 o'clock and drove away together.

Colonel Clarke was seen later, and said: "Only one statement made in the press so far has the stamp of actual truth, and that was published yesterday, to the effect that no deal looking to the selling of the Baltimore and Ohio from under the control of Robert Garrett was even thought of. Mr. Garrett has been trying, ever since he took the reins of management in his hands, to bring about his father's dream—to obtain entrance to New York city and establish through connection to New Orleans. To this end a proposition was made to convey the controlling interest of the Baltimore and Ohio to a syndicate of which the Reading, Jersey Central, Richmond and Terminal, and Baltimore and Ohio were all to be parties. Just here is where every one seems to have been switched off. The proposition to dispose of a controlling interest in the Baltimore and Ohio was made with the distinct understanding that Mr. Garrett was to be placed at the head of the syndicate. The premature publicity given the matter has materially retarded the scheme, but I do not think placed it beyond consummation."

BALTIMORE, March 12.—In spite of all that has been said here and in New York regarding the railroad deal being off, it can be stated on what is believed to be the best of authority that the deal has been accomplished. The position of Mr. Garrett in the Baltimore and Ohio road is not in the least changed by the transfer, for he merely enters a syndicate which controls a vast chain of railroads, of which his road is a most important factor, and it makes it not only a grand rival to the Pennsylvania system, but gives an unbroken line almost from New York to the Pacific coast. The deal as fixed up leaves the great Pennsylvania road out in the cold, and proves that Mr. Austin Corbin successfully outplayed President George Roberts in the struggle for supremacy. It is known here that the John Hopkins trustees have agreed to go into the syndicate as well as the city of Baltimore. The people in the "dead" can make all the denials they please, but the public mind is made up to the fact that it has been consummated, the only thing now to be done being the arrangement of details. When the matter is settled down it will come practically to this—the Baltimore and Ohio road is the only real rival of the Pennsylvania. This gives the syndicate the control of the Reading, Bound Brook and Jersey Central roads for their New York entrance.

Mr. T. Edward Hambleton, of the banking firm of John A. Hambleton & Co., who has had confidential relations with Mr. Robert Garrett, considers the deal accomplished in effect. There is a large sum of money to change hands, and it would be premature to say that the matter has been settled until the final arrangements are made. The syndicate includes Messrs. Robert Garrett, Jay Gould, Alfred Sully, Calvin S. Brice, Drexel Morgan & Co., and several others. The transfer will be made through the First National Bank of New York. Mr. Garrett, he said, has very large property interests in Baltimore, and proposes to reside here. He will doubtless remain at the head of the Baltimore and Ohio corporation, but will not take charge of the details of management.

Good Results in Every Case.
Dr. A. Bradford, wholesale paper dealer of Chattanooga, Tenn., writes that he was seriously afflicted with a severe cold that settled on his lungs; had tried many remedies without benefit. Being induced to try Dr. King's New Discovery for consumption, did so and was entirely cured by use of a few bottles. Since which time he has used it in his family for all Coughs and Colds with best results. This is the experience of thousands whose lives have been saved by this Wonderful Discovery. Trial bottles free. For sale by W. H. Green & Co. Stapholders of all lengths can be found at JACOB'S Hdw. Depot.

TER, 84.35 per cent. of Sulphate of Lime. The want of Plaster has been one of the greatest drawbacks to successful farming in this State, and it is an important service to the great industry and to the State. It is quite indispensable in any judicious system of agriculture, and it serves several important ends, besides the direct one of furnishing lime and sulphur; it gathers nitrogen and prevents its dissipation; it is a specific for clover and other leguminous plants and it indirectly renders the potash of the soil available and so aids in the restoration of worn lands.
We have sold Plaster to many during the last year, all from whom we have heard, express their satisfaction in its results. The application of Plaster to animal manure will increase the value of that manure beyond calculation.
Composting with plaster will improve the value of your compost 25 per cent.
Sowing from 30 to 600 pounds of plaster to the acre, over your small grain after it is in the ground will give you an increased crop from 10 to 100 per cent.
It is indispensable in every trucking or such a strawberry bed, an orange bed, &c.

LAND PLASTER.

300 TONS NOVA SCOTIA LAND PLAS
TER, 84.35 per cent. of Sulphate of Lime. The want of Plaster has been one of the greatest drawbacks to successful farming in this State, and it is an important service to the great industry and to the State. It is quite indispensable in any judicious system of agriculture, and it serves several important ends, besides the direct one of furnishing lime and sulphur; it gathers nitrogen and prevents its dissipation; it is a specific for clover and other leguminous plants and it indirectly renders the potash of the soil available and so aids in the restoration of worn lands.
We have sold Plaster to many during the last year, all from whom we have heard, express their satisfaction in its results. The application of Plaster to animal manure will increase the value of that manure beyond calculation.
Composting with plaster will improve the value of your compost 25 per cent.
Sowing from 30 to 600 pounds of plaster to the acre, over your small grain after it is in the ground will give you an increased crop from 10 to 100 per cent.
It is indispensable in every trucking or such a strawberry bed, an orange bed, &c.
