heir Universal Prevulence, Dangerous Character and How they Live and Are Killed.

The Germans consume large amounts of uncooked pork, and often get living animals called trichinæ into their blood, which cause the most terrible death. Americans draw in the germs of disease and death with every breath. Malaria, miasma, sewer gas and the thousand poisons in the air, in food and in water are at war with health and life all the while. The blood that circulates in human veins is composed of numbers of small corpuscies that resemble animals and when anything poisonous gets into the blood it becomes just like stagnant water, full of living animals that feed upon each other and upon the blood stself. And yet not one person in fifty is free from blood poisoning in some form. Every moment of the life, whether awake or asleep a million poisonous animals, invisible to the naked eye, are feeding upon the very elements that make and sustain life.

These are facts-they are solemn truths and they demand the most serious attention. These germs must be killed; they must be annihilated. But how! Prof. Austin Flint of Bellevue Rospital College, New York, says: "The judicious use of alcoholic stimulants is one of the striking characteristics of progress in the practice of medicine during the last half century." while Dr. J. P. Gilbert of Lyons, N. Y. says: "From my experience in the treatment of chronic diseases of a wasting and debilitating nature I have frequently found it necessary to advise the use of stimulants, and in my opinion Duffy's Pure Malt Who key for purity and other desirable qualities cannot be surpassed for such pur-poses. Its action scems to be that of a pure stimulant, with none of the inebriating effects which are too often found in

so-called medicinal whiskeys.' When we consider the terrible amount of poison that is in the blood, and the misery and death it is causing, and when we realize that its germs can all be driven out by a stimulant (not intoxicant) like Duffy's Pure Malt Whiskey, we have cause for thankfulness that modern science is doing so much for mankind in removing disease, destroying its cause and bringing health and happiness instead of misery and death. Most of the leading people of the land are realizing the value of this Whiskey, and many whose prejudices have heretofore kept them entirely from the use of spirits and fired by power transmitted from are seeing its pure and valuable qualities in warding off diseases, and use it regularly in their homes.

DUFFY'S PURE MALT WHISKEY Is Sold Only in Bottles. Price \$1.00. For sale by Druggists, Grocers and Dealers. Persons East of the Rocky Mountains (except the Territories), unable to procure it from their Dealers can have Half Dozen sent, in plain case, unmarked, express prepaid, by remitting \$6 to The Duffy Malt Whiskey Co. Rochester, N.Y.

The Daily Review.

JOSH. T. JAMES. Editor & Prop WILMINGTON. N. C.

SATURDAY. APRIL 23. 18-7

express at the Postothice at Wilmington, N. C. is second-class matter.

It said that the time has practically passed when flats will pay in New York, excepting those with which large restaurants are connected and which combine the features of hotel and flat life and those in the very fashion able Fifth avenue neighborhood The reason assigned is too much competition among the landlords and unreasonable demands on the part of the tenants. A flat tenant of to-day wants coal for the ranges and pretty much everything but beefstenk Such people are careless in the treatment of apartments and quit for slight reasons. The landlord's expenses are large, and with increasing competition he does not enjoy owning flats

Electricity seems to be destined to supplant steam power for many purposes on shipboard. The success achieved in lighting ships by electricity has induced officers of the navy to look for other purposes to which it could be through his nose-he will have to write applied The naval ordnance officers have concluded that the use of steam in the manipulation of heavy guns can be tery. "That." said his companion, "is replaced by electric power The chief the grave of Mr. Taggleworth" "That the manipulation of heavy guns can be of ordnance is now in communication so? Why, hang it, he' owed me ten with expert electricians on the subject. and is confident that the armament of vessels can be readily loaded, pointed . Mr Zakin, who died the other day an electric motor. Ensign Sprague, formerly of the navy, has invented a motor for the purpose which gives promise of success

The capability of sea water as a preservative is shown by the fact that among the articles recovered from sin ply insurmountable, but Napoleon Alamance-March 7, 1 week; June 6, vessels sunk in the harbor of Vigo Spain, in 1701, there have been recovered specimens of logwood and mahogany that, that notwithstanding their 184 years' submersion, are in the most perfect state of preservation. Dyers who have experimented with the logwood state that it is even better for dyeing purposes than the wood now imported. The mahogany, too, is very fine and solid one log twelve feet long and twenty two by thirty two inches quare, being subsequently worked up in the shape of furniture and walking sticks as mementoes. The chief object of interest, however, is an ancient pulley block four and one half feet high and three teet broad, with four solid copper sheaves eighteen inches in diof allible antidote to pain and inflammation. At all druggists, 25c.; five for \$1.00; or of Potter ameter. It is of solid oak and was brug and Chemical Co., Boston. probably used in hoisting heavy articles of merchandise or the anchors The wood is perfectly preserved, but an iron of the noted specialists without benefit Cured band is completely corroded away, while the copper wheels are but slightly oxidized.

> A correspondent asks: "Where can we send to get Peck's Patent Ear Drums, an invention for enabling peoole to hear who are deat, slightly or otherwise?" Write to F. Hiscox, 849 Broadway, N. Y., stating cause and particulars of your deatness and he will give you a'l the points desired Read the following from the Medical Record: "A lecturer in one of our hospitals, while illustrating progress in medical science, introduced a deaf patient whose case baffled all medical skill and was considered hopeless But an invention belonging to F. Hiscox New York, having been recommended it was used with very satisfactory results, as it fully restored the hearing. It was tested in other cases and found to be more successful than any known device for the relief of deafness, as hearing lost for many years was fully restored by it. This invention is all the more satisfactory as it is out of sight and does not require to be held in posi tion. And while it can be readily removed or inserted by the patients themselves it is witha curative in action and comfortable to wear.
