Headquarters for base ball supplies is at Heinsberger's.
The receipts of cotton at this port today foot up 46 bales.
Mocking bird cages of all sizes are sold very cheap at JACOB'S Hdw. Dept.

Italian barque *Liguria* Lavagnone, arrived at Buenos Ayres April 3.
First National Bank stock is offered for sale by Messrs. W. L. Smith & Co.
Norwegian barque *Ebenezer*, Westmark, hence, arrived at Granton, Scotland, April 28th.

German barque *Soli Deo Gloria*, Meyer, from Danzig for this port, passed Lizard May 1st.

It is expected that work in earnest on the street railroad will be commenced as early as by the middle of June next.

The work of erecting the necessary kitchens on the Canaday field for the use of the military encampment has already been commenced.

The yacht *Idler* has been brought up from the Sound to be put in proper trim for the match race for the \$50 cup, which is to be competed for on the river on the 19th inst.

Hymenal.
Our young friend, Mr. Asa N. Biggs, formerly of this city, but now a resident of Rockingham, was married in that town on the 21st inst. to Miss Josie McKeithan Asa was at one time an employe of this office and we all, editors, printers and devil, most cordially wish him a full measure of conjugal bliss.

Robbery at Clarkton.
During a severe wind storm and rain the store of Messrs. Wooten & Clark, at Clarkton, was entered on last Thursday night and robbed of a suit of clothes, a pistol and a few small articles. One Jim Smith, colored, who says that he hails from this city, and that his father, by name Dan Smith, lives here now, was arrested at Lake Waccamaw the next morning, charged with the robbery. When arrested he had in his possession twenty-one keys, of various kinds.

It is Your Loss.
When you neglect to take advantage of the extraordinary big value for little money at SHRIER'S. When you can save \$2, \$3, \$5, and frequently \$10 on a suit of clothes. It certainly pays people to investigate, and those who fail to trade with SHRIER are certainly not doing justice to their families. Why then be so foolish throwing your money away elsewhere that you can quickly save by trading with the OLD RELIABLE? And with such savings purchase other necessities for yourself and family. Just think of it and trade with I. SHRIER.

Personal.
We are glad to learn that Hon. D. K. McKee is now steadily improving and we hope to see him abroad again in a few days.
Col. W. P. Canaday has so far recovered from the effects of his recent injuries that he now walks without crutches or canes.
Col. E. E. Brink, formerly of this city but now of Fernandina, Fla., where he has charge of the Creosote Works in that city, is in the city on a very brief visit. He came to bring Mrs. Brink back here for the Summer and will return at once.

The Gas Company.
The annual meeting of the stockholders of Wilmington Gas Light Company was held in the office of the Secretary and Treasurer yesterday.—Messrs D McKee, G R French, A J D'Rosset, G W Kidder, J F Divins, G H Smith and E S Martin were elected Directors, and Messrs J C Chase and Geo R French, Jr. were appointed the auditing committee.
At the Directors' meeting the old officers of the Company were reelected, as follows:
President—E S Martin.
Secretary and Treasurer—R J Jones.
Superintendent—Jno W Reilly.

The Creosote Works.

The Carolina Oil and Creosote Works of this city forms one of our most important and profitable industries, yet we are tolerably well aware that many of our citizens, and some even who are actively engaged in business life and are faithful workers for the prosperity of Wilmington, do not fully realize the extent to which the industry has reached or the importance in which it is held by railroad officials and by those having an interest in wharf and dock property. Creosoted timber will not decay from heat and moisture; the teredo worm, which is so destructive to ordinary pilings and other timber submerged in salt water, will not touch it, and it is almost indestructible by fire, as we shall presently show. The company have large orders, which are continually on the increase, for pilings for wharves and for crossings for railroads, and these come from nearly every section of the country. Yesterday they made the first shipment, on an order for 500,000 feet of creosoted crossings for a cable street railroad in Cincinnati, Ohio. A short time since they shipped a large lot to the Dock Commissioners of New York City. They creosote crossings for the Carolina Central, Wilmington & Weldon, Wilmington, Columbia & Augusta, Raleigh & Augusta Air Line and other railroads. They also shipped yesterday a lot of window sills for a tobacco factory at Petersburg, Va., and have recently shipped a lot of test telegraph poles to New York, and if these prove satisfactory, large orders will be received for that sort of material. Two weeks ago they shipped 65,000 feet of creosoted lumber for conduit tubes for telegraph wires at Boston, Mass.

Aside from the works in this city, this company are now erecting similar works, to operate under the same patents, at Fernandina, Fla., under the name of the "Creosote Lumber & Construction Company." These will be completed and ready for operation by the 1st of August next, and will have a capacity of 50,000 feet (board measure) per day. Connected with this latter enterprise is an incident which shows how the industry grows in favor as the value and importance of the work is demonstrated. Mr. R. T. Buchardt, an eminent German engineer and for some years Chief Engineer of the "Plant system" of railroads in Georgia and Florida, came to Wilmington to inspect the work and judge of its possibilities for usefulness. He was entirely skeptical of the merits of the work before examination, and did not hesitate to express himself freely in the matter, giving the opinion that as a preservative of wood the process would prove valueless. He remained, however, two or three days and made a rigidly thorough investigation of the process and became so entirely convinced of its practical and incalculable usefulness, and became so deeply interested in the industry that he sought and obtained a financial interest in the Company, and is now in charge of the works which are being erected at Fernandina, having resigned his position in the "Plant system" for that purpose.

That creosoted lumber is entirely proof against attacks from the teredo worm has been abundantly proven in every instance where it has been used. In several places it has been used at the bath houses on the Sounds, and while other woods have rotted and gone to complete ruin, the creosoted timber remains as solid and free from the least sign of decay as it did on the day that it left the works, notwithstanding the fact that some of it has been there four and even five years. Some of the creosoted timber has been in use four years in Charleston harbor, where the teredo worm abounds and is extremely destructive, and it has not been touched, but is as solid and sound as when first placed there. There are numerous other instances to establish the fact that creosoted timber will not decay from the combined effects of heat, moisture and exposure to the atmospheric influences, and that the dreaded teredo will not attack it; but those named are sufficient.

Gen. Robert Ransom, an undisputed and excellent authority, says that creosoted timber is indestructible by fire, and to establish his position, he quotes the instance of the destruction by fire of the warehouse of the Atlantic & North Carolina Railroad, at Morehead City, in November last. The warehouse was over the water and rested upon iron pilings and was so situated that the largest vessels could come alongside and discharge or take in cargo. Quite a number of creosoted

pillings had been placed in position as fenders for the vessels as they were moored to the wharf, and when the building, which was stored with cotton, was burned, with all its contents, and the iron pilings were warped and bent by the intense heat, the creosoted timber remained intact and was hardly scorched.

This industry, which involves much capital and labor—both important factors in the city's prosperity and wealth—is not alone for the benefit of owners of railroads and wharf property. In fact these are the places where its value ends. It begins in the forests of the State, where the timber must be secured; and here is where its great value to other interests is unmistakably shown. It has created a value where none has heretofore existed by creating a demand for the despised and unprofitable "old-field," short-leaved pine, which abounds in many parts of Eastern Carolina. This wood, which is worthless as ordinary lumber, is not good for either fire wood or fencing stuff, and has been an eye-sore to the farmers upon whose lands it grows, is the very best that can be obtained for creosoting purposes, and when once thoroughly impregnated is absolutely indestructible, so that this hated timber bids fair to be the farmer's most valuable possession.

The company has an authorized capital of \$400,000, of which \$100,000 has been paid in. At its annual meeting in March last the company declared a dividend of 6 per cent., which is a remarkable showing, when the brief time of its active operations is considered. The President of the company is Col. W. P. Canaday, Sergeant-at-Arm of the United States Senate, to whom the stockholders are under many and lasting obligations for the success which has been thus far achieved. Among the prominent men of the country who are interested in the enterprise are Senators Plumb, of Kansas, Vest, of Missouri, Butler, of South Carolina, and Mahone, of Virginia, who are all large stockholders. Besides these many business men and capitalists have become interested and invested their money in the enterprise. The methods of creosoting pursued by this company have received the closest scrutiny of scientific men and have in every instance received their unqualified endorsement and approval. Its establishment here is a valuable acquisition to the material wealth of the city, and an honor to those who conceived and put the enterprise into active operation.

Dental Examination.
The North Carolina State Board of Dental Examiners will meet at Morehead City on the second Tuesday in next month, June 7th, for the purpose of examining applicants for license to practice dentistry. Blanks for the registration of all dentists now in practice, according to act of the Legislature, are now ready and will be sent upon application to Dr. J. F. Griffith, Secretary of the Board, at Salisbury.

U. S. District Court.
The attention of this tribunal has been engaged during the entire day in hearing the case of the Hartford Fire Insurance Company vs. the steamboat *Cape Fear*, the latter having been libelled for damages for the burning of a flat laden with cotton and naval stores on the Cape Fear river. The case was on trial when our report closed. Russell & Ricard for libellant; A. M. Waddell for respondent.

To Lay the Corner Stone.
The corner stone of the new house of worship, corner of Mulberry and Fourth streets, which is to be hereafter known as Grace Methodist Episcopal Church, and to be erected by the congregation of the old Front Street Church, which was destroyed by fire February 21st, 1886, is to be laid with appropriate ceremonies by the Grand Lodge of Masons, on the afternoon of Thursday, the 12th inst. A notice to that effect is published in our advertising columns today by Mr. C. H. Roberson, Grand Master, Rev. E. A. Yates D. D., Pastor of the Church, and Mr. E. S. Martin will deliver addresses on the occasion. The services will be very interesting and a large concourse will doubtless be present on that occasion.

The Board of Managers of the Produce Exchange met at their rooms today, at which the assessment upon members was fixed at \$30 per annum, and 27 new members were admitted to the organization. The other business transacted was simply routine in character.

MARRIED.

JACOB—PUGH—In this city, on April 26th, at St. James' Church, by the Rev. W. P. Lewis, Miss MARY A. PUGH to WM. I. JACOBS.

Notice.

THE REGULAR ANNUAL MEETING of the Stockholders of the Carolina Central Railroad Company will be held at the Office of the Old Dominion Steam Ship Co., corner of Beach and West Streets, in the City of New York, at 1 o'clock, P. M., on the 5th day of May proximo.

JOHN H. SHARP,
Secretary and Treasurer.

Greatly Excited.
Not a few of the citizens of Wilmington have recently become greatly excited over the astounding facts, that several of their friends who had been pronounced by their physicians as incurable and beyond all hope—suffering with that dreaded monster Consumption—have been completely cured by Dr. King's New Discovery for Consumption, the only remedy that does positively cure all throat and lung diseases. Coughs, Colds, Asthma and Bronchitis.
Trial Bottles free at W. H. Green & Co.'s Drug Store, large bottles \$1.

Wonderful Cures.
W. D. Hoyt & Co., Wholesale and Retail Druggists of Rome, Ga., say: We have been selling Dr. King's New Discovery, Electric Bitters, and Bucklen's Arnica Salve for two years. Have never handled remedies that sell as well, or give such universal satisfaction. There have been some wonderful cures effected by these medicines in this city. Several cases of pronounced Consumption have been entirely cured by the use of a few bottles of Dr. King's New Discovery, taken in connection with Electric Bitters. We guarantee them always. Sold by W. H. Green & Co.

Advice to Mothers.
MRS. WINSLOW'S SOOTHING SYRUP should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as bright as a button. It is very pleasant to taste. It soothes the child, softens the gums, allays all pain; relieves wind, regulates the bowels, and is the best known remedy for diarrhoea, whether arising from teething or other causes. Twenty-five cents a bottle. Sold by all druggists.

A CARD.
To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a receipt that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the Rev. JOSEPH T. INMAN, Station D, New York City, and draw it.
