

THE DAILY REVIEW

VOL. XI. WILMINGTON, N. C., SATURDAY, AUGUST 13, 1887 NO 192

Secretary Whitney, in his endorsement disallowing the expenditure of \$50,000 for the repair of the Palos, makes a palpable hit. He shows that the old iron hulk cost only \$75,000 in the first place, and could be built now for the sum asked to repair her. Already she has cost \$189,248 in repairs.

Bishop Tuttle of Missouri, now on a visit to New York State, appears to be made out of the proper material. It is not often that a bishop has the opportunity of jumping into the water and resurfacing from drowning the young lady with whom he has been enjoying a sail. But Bishop Tuttle had that opportunity at Schenectady the other day and properly improved it.

Mr. Pendleton, the United States minister to Germany, has obtained a recognition of the rights as an American citizen of Albert Bernhard, who was recently arrested and imprisoned at Mulhouse as a member of the French Patriotic League. Bernhard is now pressing a claim for compensation for business losses sustained through his arrest. He is a native of Mulhouse. He went to America in 1873, became naturalized, returned to Mulhouse in 1880, and has since been a permanent resident of that town, managing his father's business there. The foreign office admitted Bernhard's rights with reluctance, believing him to have been justly incriminated.

Gen. A. W. Doniphan, who died at Richmond, Mo., on Monday, was a prominent figure of the Mexican war. Born of Virginia parents in Mason county, Ky., in 1808, he moved in Missouri in 1820 and became a lawyer. In 1838, as a brigadier-general of militia, he helped to drive the Mormons out of Missouri and on the breaking out of the Mexican war he organized a regiment, which formed a part of the army of the west, which, under command of Colonel James Kearney, marched across the desert and conquered New Mexico. When Kearney set out for California Doniphan was left in command in New Mexico and fought several battles with the Mexicans, defeating them in each engagement with heavy loss, and effecting a juncture with the main army in Mexico.

Russian archeologists, who are under the patronage of the Czar, are working throughout the empire or wherever the imperial armies open up new fields. They have done much during the past decade to illuminate dark blanks in the Byzantine and earlier records. One of the most interesting of their discoveries just comes through a private letter. At Tashkent have been recently found extensive Greek remains, chiefly terra cotta vases, silver gilt ornaments, and small statuettes, all purely Hellenic and obviously bespeaking a common domestic use. This discovery shows that the frontiers of the Greek Kingdom in Bactria must have extended many hundred miles farther northeast than has heretofore been supposed. Probably it is the beginning of a series of developments giving to Central Asia an entirely novel archeological interest.

Their Business Booming. Probably no one thing has caused such a general revival of trade at W. H. Green & Co's. Drug Store as their giving away to their customers of so many free trial bottles of Dr. King's New Discovery for Consumption. Their trade is simply enormous in this very valuable article from the fact that it always cures and never disappoints. Coughs, Colds, Asthma, Bronchitis, Croup, and all throat and lung diseases quickly cured. You can test it before buying by getting a trial bottle free, large size \$1. Every bottle warranted.

Brace Up. You are feeling depressed, your appetite is poor, you are bothered with headache, you are listless, nervous, and generally out of sorts, and want to brace up. Brace up, but not with stimulants, spring medicines, or bitters, which have for their basis very bad, cheap whiskey, and which stimulate you for an hour, then leave you in worse condition than before. What you want is an alternative to purify your blood, start healthy action of Liver and Kidneys, restore your vitality, and give renewed health and strength. Such a medicine you will find in Electric Bitters, and only 50 cents a bottle at W. H. Green & Co's. Drug Store.

The Last Chance. To buy clothing at 40 and 50 cents on the dollar. Don't miss the opportunity of getting a slice of the numerous bargains now to be had at I. Shrier's. Remember that this is no humbugging scheme. Every dollar's worth of goods must be sold before Shrier's removal to the mammoth store in the Purcell building on Front street. It would be advisable for country merchants to give him a call and get bargains in job lots.

Improved Storm Signals. The following circular has been issued from the Chief Signal Officer at Washington City in regard to an improved service in the use of the storm signals:

In view of the fact that the resolution of February 9, 1870, under which this service was organized, contemplated the announcement of the probable force as well as the advance of storms, the Chief Signal Officer has decided to distinguish by signals with a view to distinguish between light and severe storms, and with the intention of showing whether the storm-center has reached or passed the display station, as well as the probable direction from which severe winds are expected.

To adapt the signals to the varying interests of the maritime community, the new system will take into consideration the fact that westerly winds of high velocity with clearing weather are less dangerous than those from easterly quarters with freezing weather.

Along the Atlantic and Gulf coasts and on the Great Lakes, from September 1, 1887, there will be displayed, as storm conditions may demand, day signals of two kind:

1st. A cautionary signal, a yellow flag with a white center, will indicate that the winds expected are not so severe but well-founded and seaworthy vessels can meet them without great danger.

2d. A storm signal (now in use) a red flag with a black center, will indicate that the storm is expected to be of more marked violence.

In order to afford the public as exact information as possible regarding the relative position of the storm and the winds expected, two pennants will be displayed. A red pennant will indicate the winds are to be easterly, that is from northeast to south inclusive, and that the storm-center is approaching.

The white pennant will indicate westerly winds, that is, from north to southwest, inclusive, and that the storm-center has passed. While it is intended that the pennant shall indicate positively only whether the winds will be easterly or westerly, yet, in order to give still more definite information, the red or easterly pennant will be displayed above the cautionary or storm signal for winds from the northeast quadrant and below for winds from the southeast quadrant. In like manner, the white pennant, while indicating westerly winds alone, will show by its position above the cautionary or storm signal that northwesterly winds are probable, or by being below that they will be from the southwest quadrant.

In view of the difficulty of varying night signals, they will not distinctively show the force, but indicate the wind direction only; a red light for easterly winds, and red and white light for westerly winds.
