The finest lense ever made by the late Alvan Clark is in the big telescope at the Naval Observatory at Washington. It is so powerful that a micro scopic photograph which is invisible to he naked eye can be read through it at a distance of 400 feet. .

Capt. E V. Gager, of the Cromwell ine steamship Louisiana, reports that n crossing the Gulf Stream off Hatteras he found no carrent, with the water a precliar green color. After passing the Straits of Florida in the Gulf of Mexico, from the Tortugas to the mouth of the Mississippi River, he had strong southeast current with an unusual amount of Gulf weeds. Here is an offset to the reports of strong currents reported in the Gult Stream some weeks ago, and it locks as if the ocean river were engaged in some strange treaks. The Gulf Stream is the sphinx of the sea, and its riddles apparently have not yet been rightly read.

The Right Rev. Robert Woodward Barnwell Elliott, S. T. D., the Protest ant Episcopal Bishop of WesternTexas who died at Sewanee, Tenn., Monday night, after a protracted illess, was the son of Bishop Stephen Elliot, of Georgia. He was born at Beaufort, S C., August 16, 1840, and graduated from South Carolina College in 1861. He at once entered the Confederate army. was soon grade aide to Brig. Within the past two or three days the fish in many of the streams in Illinois zone. and Wisconsin have died by the million and the few that are left are rapidly tollowing suit. The banks of the Galena River branches are lined with dead fish of all sizes and varie ies. from the tiny minnow to the mam woth cat and sturgeon, At Boncombe, Wisconsin. dead fish are so numerous on the banks that the stench arising from them is almost unbearable At Laneaster, Wisconsin, the scene on the river back beggars description, over fifty wagon loads of dead fish being in sight There are numerous theories affeat as to the cause. One is that the recent rains have rolled the water with mud, so that the fish have been unable to breathe, and struggling to the surface for air, have died. Another is that, genuine important chances of a lifetime. during the dry, hot summer the valleys and marshes above were filled with some poisonous growth that with the recent floods was carried into the streams and poisoned the water.

*At the Capitol there are no signs of preparation for an extra session, although should the occasion demand it everything could be put in readiness for the reception of Congress within thirty days. The workmen seem to have grown weary of trying to complete the western entrance before cold weather sets in. The work on the north and south terraces is pretty well advanced, and the grading of the western awn is in progress Inside the building the painters, decorators and scrub ners and getting ready to give the new Congress a cheerful welcome. > It should be Generally Known that the multitude of diseases of a scrofulous nature generally proceed from a torpid condition of the liver. ble The blood becomes impure because the liver does not act properly and work off the poison from the system, and the certain results are blotches, pimples, eruptions, swellings, tumors, ulcers, and kindred affections, or settling upon the lungs and poisoning their delicate tissues, until ulceration, breaking down, and consumption is established. Dr. Pierce's "Golden Medical Discovery" will, by acting upon the liver and puri-fying the blood, cure all these diseases.
