The Daily Review.

JOSH. T. JAMES, Editor & Prop
WILMINGTON, N. C.
FRIDAY, SEPTEMBER 2, 1887.

Gen John Imboden, of the Confederate army, who wrote one of the war papers in the August-Century, is the subject of a rather ill-natured story. It seems that he had been dashing through the valley of Virginia, avoiding encounters with Sheridan and failing to connect with Rosser, but impressing women and children with his soldierly appearance and the magnificent form of his troops. The gallant and profane Confederate Gen. Early heard of Imboden's manoeuvres and one day the Confederate war department received this dispatch: "Send troops to Winchester and capture Imboden and his men and put them in the army. Jubal A. Early."

On the 7th of November next the people of Delaware will vote upon the question of having a constitutional convention. The present constitution was adopted in 1832, and its provisions are held to be unsuitable to the wants of to-day. The chief friends of the movement for a new constitution are the Republicans, who hope from it better results for their party. At present each county sends a certain number of representatives to the General Assembly without regard to population. The representation, it is held, should be proportioned to population. This view is held as well by many Democrats. Every Democratic platform for some five years—except the last one—has favored a convention. As a number of influential New Castle County Democrats have taken the matter up, it is thought that increased attention will be given by the people to the matter.

Dr. McGlynn has excommunicated the Socialists, as it were. In his lecture before the Anti Poverty Society in New York on Sunday night he said: "This question of socialism and individualism is a question of morals, and therefore of religion. No combination, nor hierarchy, whether of men or angels, can ever prevent any child on earth from looking and saying: 'Our Father who art in Heaven Thy kingdom come—and here.' It is the essential antagonism between the cynic, the blasphemous, the pagan idea and the intelligent Christian idea, that would make the State the supreme thing and sacrifice to it, as to Juggernaut, the hearts and minds and consciences of the children of God. Any government, whether Communistic or Monarchical or Socialistic or Democratic, that destroys the sacred, the God given, the inalienable right of individualism, is a crime against nature and against God. Where the religious idea prevails in a State the object is not to deprive men and women of individual rights, but to more sacredly safeguard those rights. There is no necessary conflict between individualism and organized society, but there is a necessary conflict between individualism and what is called socialism. Socialism wishes to substitute for the flag of our country a flag of another color."

An extraordinary case is reported from Berlin, which has been a subject of great interest among medical men in that city. At a meeting of the medical society, Prof. Mendel introduced a patient, a well-to-do mechanic, who regularly at 9 o'clock in the morning loses the power of speech and hearing, remaining a deaf mute until 6 o'clock the following morning. From 6 to 9 o'clock he hears and speaks as well as anybody. This peculiar trouble showed itself first last year as a sequel to an epileptic attack. The patient, whose mental powers have not suffered, exhibits another curious anomaly. If a certain spot in the joint of the right hand is pressed, he is at once seized with convulsions; if a certain spot on the right upper arm is pressed, the convulsions instantly disappear. Prof. Mendel made this experiment twice before the assembled physicians. He was unable to give the cause of these abnormal conditions, but considered them related to the hysterical-epileptic manifestations sometimes seen in women. Their origin is probably to be sought in a temporary interruption of the nerve functions involved in the process of hearing and speaking. Prof. Mendel said that there was but one analogous case on record, and that he hoped to bring about a cure.

It should be Generally Known that the multitude of diseases of a scrofulous nature generally proceed from a torpid condition of the liver. The blood becomes impure because the liver does not act properly and work off the poison from the system, and the certain results are blotches, pimples, eruptions, swellings, tumors, ulcers, and kindred affections, or setting upon the lungs and poisoning their delicate tissues, until ulceration, breaking down, and consumption is established. Dr. Pierce's "Golden Medical Discovery" will, by acting upon the liver and purifying the blood, cure all these diseases.

Give Them A Chance!

That is to say, your lungs. Also all your breathing machinery. Very wonderful machinery it is. Not only the larger air-passages, but the thousands of little tubes and cavities leading from them. When these are clogged and choked with matter which ought not to be there, your lungs cannot half do their work. And what they do, they cannot do well. Call it cold, cough, croup, pneumonia, catarrh, consumption or any of the family of throat and nose and head and lung obstructions, all are bad. All ought to be got rid of. There is just one sure way to get rid of them. That is to take Boschee's German Syrup, which any druggist will sell you at 75 cents a bottle. Even if everything else has failed you, you may depend upon this for certain.

SEPTEMBER SQUIBS.

Returns from summer militia encampments award the first prize to the mosquito for unerring accuracy in target practice.—Chicago Inter Ocean.

In a horse car a 300 pounder, fast asleep, falls on a neighbor and continues his nap. "I don't want to be pulverized," cries the victim. "I beg your pardon, sir. I fancied I was at home near my better half."—Paris Charivari.

Jenkins—I see young Jones is not called upon by your daughter. What is the matter? Dr. Bolus—Oh, his was a bad case, and I prescribed the lift cure suited to his case. I lifted him through the front door.—Boston Budget.

An Ohio girl advertises that she would like to exchange a copy of George Eliot's "Theophrastus Such" for two loaves of fresh baker's bread or ten cents' worth of chewing gum. And that isn't the worst of it; she finds no takers.—Exchange.

The Italian government is endeavoring to negotiate for a loan of 9,000,000 lire, and has sent to a prominent newspaper in this city for estimates.—Boston Record.

W. would remind our metropolitan contemporary that Boston's entire population is only about 400,000.—Waltham Free Press.

First tramp—I had my eye'd have 363 national holidays in this year. See and Tramp—You would, eh? And then there would be one working day for every four years. Oh, you are a nice one, you are. You would make a galley slave of the poor laboring man, wouldn't you?—Suffolk.

The age of a goose, a scientist states, frequently extends to fifty years. It should be explained that the goose never takes "tonics" nor "sure cures," he never takes appetizers, he is not afraid of water, he doesn't speculate and wear out his nerves, he doesn't drink or smoke; he has sense, in short, and isn't such a goose as he looks.—Chicago Tribune.

Irate Old Father—I understand, Mr. Lytle, that you are an expert base ball player. Mr. L. (diffidently)—I rather think I am. I. O. F.—I have never witnessed a game, nor do I wish to, but as I have sent my daughter to bed, and it is midnight, and the front door is open, suppose you gratify me by making your very quickest home run.—Pittsburg Bulletin.

Tennyson's "May Queen."

Who knows but if the beautiful girl who died so young had been blessed with Dr. Pierce's "Favorite Prescription" she might have reigned on many another bright May-day. The "Favorite Prescription" is a certain cure for all those disorders to which females are liable.

Hay Fever.

For twenty-five years I have been severely afflicted with Hay Fever. While suffering intensely I was induced through Mr. Tichenor's testimonial to try Ely's Cream Balm. The effect was marvelous. It enabled me to perform my pastoral duties without the slightest inconvenience and I have escaped a return attack. I pronounce Ely's Cream Balm a cure for Hay Fever.—W. M. T. CARR, Presbyterian Pastor, Elizabeth, N. J.

Advice to Mothers.

Mrs. WINSLOW'S SOOTHING SYRUP should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best known remedy for diarrhoea, whether arising from teething or other causes. Twenty-five cents a bottle. Sixty-six dead & wly.
