The Daily Review.

JOSH. T. JAMES, Editor & Prop'r.

For Horses, Cattle, Sheep, WILMINGTON, N. C. TUESDAY. NOVEMBER 8, 1887. Entered at the Postoffice at Wilmington, N.C. as second-class matter.

> In Germany the average duration of the life of gardeners, mariners and fishermen is fifty-eight years; butchers, fifty-four years; carpenters and bricklayers, forty-years; shoemakers and tailors, forty-four years; compositors and lithographers, forty-one years, and of laborers, thirtytwo years. In the professions the average lifetime of clergymen is sixty-seven years; teachers, fiftyseven years; lawyers, fifty-four years, and physicians forty-nine years.

> Dr. Alfred, of Ocala, Fla., has a copy of the Baltimore Advertiser and Journal, dated August 23, 1773. In it is a graphic land advertisement by George Washington, offering 20,-000 acres of the finest and richest land in the world and situated in the Kanawha Valley. West Virginia. The Doctor purchased it at the sale of the library of Ex-Governor Wins. low, of North Carolina, thirty-seven years ago, and prizes it highly. He has refused several flattering offers

for it by relic hunters.

At the recent eclipse of the sun, the Chinese authorities, in accord ance with the usage of the Empire, ordered the Buddhist and Tavist priests to recite their incantations to rescue the sun from being devoured. It was at the time of the festivities over the Emperor's birthday, when all officials .were required to wear embroidered robcs, but it is also the law that during an eclipse officials who participate in the ceremonies must wear ordinary garments until

the sun is rescued. An edict had to be got from the Emperor to settle

OFFICIALLY TESTED.

Analyses of the Chief Brands of Baking Powders Sold in the South.

The Ohio State Dairy and Food Commissioner, Gen. S. H. Hurst, has made public (Circular No. 6) the re-sult of the Commission's investiga-tion of baking powder. This Com-mission was formed by the Legisla-tion of baking powder. The Com-mission was formed by the Legisla-tion of baking powder. The Com-mission was formed by the Legisla-tion of baking powder. The Com-mission was formed by the Legisla-tion of baking powder. The Com-tion of baking powder. This Com-mission was formed by the Legisla-tion of baking powder. The Com-tion of baking powder. This Com-mission was formed by the Legisla-tion of baking powder. This Com-tion of baking powder. This Com-mission was formed by the Legisla-tion of baking powder. The Legisla-tion of baking powder. This Com-tion of baking ture, with instructions to make an examination of the food supply of the State, and to give a report of such examination to the public. The examination of the baking powders was made by Professor H. A. Web-

er, State Chenfist, and relating as it does to an article of daily use in the food of almost every one, is of particular interest.

The rather startling fact is brought out by the report, that of the thirty different brands of baking powder analyzed, composing about all those sold in the State, twenty of them are made from alum, a substance declared by the highest medical authorities to be injurious to health when used in food.

The Commissioner classifies the baking powders into three general divisions, according to their value: 1st. Cream of Tartar Baking Powders:

2d. Phosphate Baking Powders; 3d. Alum Baking Powders,

The object of baking powders is, when mixed in the flour and subjected to moisture, to generate a leavening gas in the dough, which will rise the bread and cause it to be porus and light. The Commissioner explains that the best baking powder is that which, the ingredients being healthful, gives off the largest amount of leavening gas and leaves the smallest amount of residuum in FIFTH DISTRICT-JUDGES

He ordered the officials to ignore his birthday and attend to the sun, so they all wore ordinary robes.

The Rev. H. E. Foss, of Bath, Me, who is on a preaching crusade against tobacco, has collected some interesting statistics. He says that in Bath alone \$100,000 is spent each 10. year for tobacco; that of 71 boys in one grammar school 40 had used 11. tobacco; that in a smaller school 15 of the 33 boys were similarly depraved; that among 230 other grammar schoolboys were 119 who had learned to chew or smoke or both; and that in one primary class of twenty-four, eight little fellows, just 20. out of dresses, were as unlike little 21. Robert Reed as possible and used 22. the filthy weed.

The Cape Cod Canal Company is now constructing a ship canal two 27. hundred feet wide from Buzzard Bay 28. to Barnstable Bay, near the mouth of Scusset River. The estimated cost is \$7,500,000. The excavation costs \$1,000,000 per mile. About one mile has been completed, leaving six and one-half miles to be dredged. A toll of ten cents per ton on vessels traversing the canal will give, it is estimated, an income of \$1,200,000 a year. Traffic from the coal trade alone, it is said, will support the canal and pay the investors. The Fall River, Providence, Stonington and Norwich lines of Sound steamers will extend their course through it, it is said, to Boston, The canal seems to be a bona fide enterprise, and will, perhaps, pay. The distance saved is 140 miles, if regard be had to the ocean route, and 76 miles as compared with the dangerous

The large amount of inert matter or residuum in both the phosphate and alum powders will be noted. This in the phosphate powders is largely of lime; in the alum powders it is chiefly alum. It will be gratiying to the public to observe that the powder in most general use, the Royal, is also the purest. In com-paring the first two powders on the list, for instance—the Royal and Dr. Price's—the inert matter in Price's is seen to be about five in seven more than the former, a difference of 71 3-7 per cent., the Royal being purer than Price's by a correspondng figure.

The carbonic or leavening gas produced by the powders indicates their Caldwell-Sept 5, 1 week. strength; and their true value may Mitcheil-Sept 12, 2 weeks be ascertained by considering the amount of this gas in connection McDowell-Oct 10, 2 weeks. with their inert matter or residuum as shown above. The higher the percentage of gas and the lower the percentage of residuum the better the baking powder. These percentages. as found in some of the most familiar powders, are given as fol- Union+-Sept 26, 1 week.
