THE "TRUST" AS A PUBLIC TEACHER The organization of "trusts" and 'combines" among the protected manufacturers in different parts of the country, says the Charleston News and Courier, has been progressing during the last few months at a more rapid rate than ever, and is attracting an amount of attention that promises exceedingly well for the education of the people to a knowledge of their own interests, and of the means of protecting

The farmer, of course, has a special interest in every one of these combines," since, whoever is profited by them, he contributes his full share of the spoil; but even he is more concerned in some of the schemes than in others, as for instance in the recent combination of plough manufacturers to raise the price of ploughs. Another combination of the same kind and most nearly affecting agriculturists has just come to light. There are twenty-one manufacturers of reapers, mowers and binders in the United States. Nineteen of them united last week in forming an "association," perhaps because the word trust is becoming so plainly understood, for the purpose of securing "the curtailment of produc. tion, the regulation of prices, and the adoption of a system of uniform prices." There are, again, about forty manufacturers of threshing machines. Twenty of them met in Chicago a few days ago and "deinterests." It is expected the New York Times says, that all the remaining manufacturers will soon become members.

The purpose of all these combinations, by whatever name they are called, and however their purpose is stated by themselves, is the same; that is, to keep up by agreement heretofore, and the reduction of which has become imminent as a result of the competition which such high prices have brought about. There is no question anywhere about this being the object of these combinations, since it is proclaimed by their members; nor is there any question of the efficacy of the plan to accomplish its end.

Competition is strangled, practically, the moment the trust goes into effect. If any independent manufacturer attempts to fight the ring, by selling his products below their prices, he is pursued and broken down or compelled to join them, and the trust then has matters its own way without opposition. One successful combination, moreovercompels or is made the excuse for another. The plea of the plough manufacturers is that a combination of steel makers had raised the price of the steel parts of ploughs from 41 to 101 cents a pound, and that the plough manufacturers were forced by this advance to unite in raising the price of ploughs.

A Clear Complexion.

How can you expect a clear complexion when the blood is full of impurities and the stomach clogged? The blood becomes impure because the liver does not act properly and work off the poison from the system, and the certain results are blotches, pimples and eruptions. Purify the blood with Simmons Liver Regulator, and regulate the liver, stomach and bowels, and then the skin will become clear.
