## LABOR VS. MONOPOLY.

The present Presidential cam paign presents a plain and square issue to the public. It is labor vs monopoly. It is the success of labor and the advantage of the workingmen which lies in the success of the Democratic party. It is the depresto the monopolists which hinges up the success of the Republican ticket. The New York Star truly says:

The madness that precedes destruction has led the Republican party to enunciate at this time the attention, and a remedy like Hood's Sarsa-

we should enact a prohibitory tariff organs, regulates the digestion, creates a and lay an embargo upon commerce by totally preventing the importaunder the stimulus of artificial prices sustained by Government bounties.

This tariff for prohibition differs from a tariff protection not only in degree, but in kind. It would not protect the American people. It would oppress them. It would not promote the advancement of our THE SCIENCE OL labor. It would degrade it. It LIFE, the grea would not hasten the development Medical Work of the of our resources. It would be a ageon Manhood, Nerv shield so heavy that to try to bear it up would weigh us down, and a bility, Premature De prostrate country would struggle in Cline, Errors of Youth vain to utilize its energies.

The only answer that can be made by the advocates of prohibitory tariff to the demonstration of its cramping effect upon our natural powers, is that home competition in so large a country would prevent monopoly and secure sufficient employment to labor at good wages.

This somewhat specious theory is refuted by facts that are apparent on every side. Every existing trust that controls a staple product or

appetite, cleanses the stomach and sweetens the breath.

"I never recommend a medicine unless I know it to be good. In a ministry of twenty-five years I have often felt the need of such a medicene, and when I found it I exclaimed: 'Eureka!'"-Rev. J. P. Harper, Proprietor "Christian Visitor," Smithfield, N. C.

Makes the lives of many people miserable, and often leads to self-destruction. Distress. after eating, sour stomach, sick headache, sion of labor and increased strength | heartburn, loss of appetite, a faint, "all gone" feeling, bad taste, coated tongue, and irregularity of the bowels, are Distress some of the more common After symptoms. Dyspepsia does

not get well of itself. It Eating requires careful, persistent revolutionary and reactionary-that efficiently. It tones the stomach and other

good appetite, and by thus Sick by totally preventing the importa-tion of foreign products respecting toms removes the sympa-Headache which any American can claim to thetic effects of the disease, banishes the be able to produce similar articles headache, and refreshes the tired mind. "I have been troubled with dyspepsia. I had but little appetite, and what I did eat

distressed me, or did me Heartlittle good. In an hour burn after eating I would experience a faintness, or tired, all-gone feeling, as though I had not eaten anything. My trouble, I think, was aggravated by my business, which is that of a painter, and from being

more or less shut up in a Sour room with fresh paint. Last spring I took Hood's Sarsa- Stomach rilla-took three bottles. It did me an immense amount of good. It gave me an appetite, and my food relished and satisfied the craving I had previously experienced." GEORGE A. PAGE, Watertown, Mass.

## IIIICIICU **Iseases**

In the realm of disease the facts of inheritance are most numerous and are daily accumulating. Here, alas, they become terrible, fateful and overwhelming. No fact of nature is more pregnant with awful meaning than the fact of the inheritance of disease. It meets the physician on his daily rounds, paralyzing his art and filling him with dismay. The legend of the ancient Greeks pictures the Furies as pursuing families from generation to generation, rendering them desolate. The Furies still ply their work of terror and death, but they are not now clothed in the garb of superstition, but appear in the more intelligible but no less awful form of hereditary disease.

Modern science, which has illuminated so many dark corners of nature, has shed a new light on the ominous words of the Scriptures, "The sins of the fathers shall be visited upon the children unto the third and fourth generation." Instances of hereditary disease abound. Fifty per cent. of cases of consumption, that fearful destroyer of families, of cancer and scrofula, run in families through inheritance. Insanity is hereditary in a marked degree, but, fortunately, like many other hereditary diseases, tends to wear itself out, the stock becoming extinct. A distinguished scientist truly says : "No organ or texture of the body is exempt from the chance of being the subject of hereditary disease." Probably more chronic diseases, which permanently modify the structure and functions of the body, are more or less liable to be inherited. The important and far-reaching practical deductions from such facts-affecting so powerfully the happiness of individuals and families and the collective welfare of the nation-are obvious to reflecting minds, and the best means for preventing or curing these diseases is a subject of intense interest to all. Fortunately nature has provided a remedy, which experience has attested as infallible, and the remedy is the world-famous Swift's Specific, a pure vegetable compound-nature's antidote for all blood poisons. To the afflicted it is a blessing of inestimable value, An interesting treatise on "Blood and Skin Diseases" will be mailed free by addressing THE SWIFT SPECIFIC CO., Drawer 3, Atlanta, Ga. nov 26 law lydo ch sat
