A ring has risen into great prominence as being the cause of misfor- can. tunes which have lately afflicted the royal house of Spain. The late King Alphonso XII. gave it to his cousin Mercedes when he was betrothed to her, and she wore it dur ing the whole of her short married life. On her death the King pre sented it to his grandmother, the Queen Christina. She died very soon after, when it passed to the King's sister, the Infanta del Pilar, who at once began to sicken and in a few days also breathed her last. Alphonso then gave it to his sisterin law, Christina, the youngest daughter of the Duke of Montpensier; in three months she died. Al phonso then took charge of the ring cures by purifying the blood. If you himself, but he, too, soon fell a vic tim. By order of his widow it has now been suspended by a chain round the neck of the statue of the Maid of Almudena, the patron saint of Madrid.

The Supreme Court of Pennsylva nia on Friday rendered a remark able decision relative to the trial of persons charged with murder. It was decided that a disagreement of the jury in murder trials is equivalent to an acquittal, and that the accused person cannot be again ar raigned for trial after one jury has failed to agree. The ground for the decision is the Constitution, which says that a man cannot more than once be put in jeopardy of "life and limb." The Supreme Court in its decision declares that the Constitution is very clear on the point raised, and this fact, says a Phila delphia paper, makes it remarkable that the point was never raised be-LIFE, the greatfore. Many men have, it adds, been Medical Work of th tried for murder a second time, convicted and hanged, and it would be interesting to know how many have been hanged unconstitutionally in Pennsylvania. The decision, it continues, will have the effect of releasing several men who are nowawaiting trial after juries in their first trials had disagreed. Hereafter it will be much more difficult to convict a man of murder in Pennsylvania, since the lawyers need only work for a disagreement in order to save their clients.

Dr. E. W. Jenks, cf Detroit, re' cently read before a gathering of physicians a paper discussing the question of the education of Ameri can girls, as affecting the nation's future. The common assertion that American women are not as healthy as those of Europe could, in the doctor's opinion, hardly be denied. The average standard among the women of our country to day is far below what it has been in the past, The deterioration of their physical health since the days of their Puritan mothers has been very marked. but it is not confined to the wealthy ent form by Mason & Hamlin in 1861.
