An Accident that Befel a Lady on Broadway, and the Lesson it Teaches Every Man and Woman.

A well known lady who lives in Harlem was shopping on Broadway one day recently when all insect flew into her mouth. She instantly coughed and so expelled it, but no until the poisonous creature had stung the surface of her throat. The poor lady's throat began to swell and it required the skill of sevral physicians to save her life: The same thing that occurred to this lady is occurring every minute to most people! Hundreds of poisonous insects called "germs" are being drawn into the body with every breath. These small creatures at once begin to live upon the body and cause what is known as disease. They must be driven out. How much better it is though to kill these poisonous germs as soon as they come. And yet there is only one thing that will do this and that is pure whiskey. Prof. Austin Flint, of Bellevue College, "The judicious use of alcoholic stimulants is one of the striking characteristics of progress in the practice of medicine during the last half century." Prof. Henry Mott, Ph D., F. C. S., says: "By a most careful analysis I have found Duffy's Pure Malt whiskey free from adulterations or foreign substances and it deserves to meet with great success.'
The well known Dr. R. W. Hutchinson, of New
York, says: "I highly recommend Duffy's Pure Malt Whiskey and prescribe it extensively in my practice." Rev. B. Mills, of Prince ton, Iowa, says: "I have used Duffy's Pure Malt Whiskey with great benefit to my wife, who is a confirmed invalid. I know from ex perience it is a pure and most valuable medicine. I am also using it in the case of my son, who is threatened with consumption. I am a Presbyterian clergyman and a doctor of divinity, but I am not afraid to recommend Duffy's Malt Whiskey as the purest and most efficient tonic that I know of, and my experience is a

This is the day of large tonnage for railroads and small profits per ton carried, the result being a necessity for large expenditures on rolling stock and roadbed. Every great road finds itself in need of an increased equipment, without in every case enjoying the prospect of a corresponding increase of net earnings. The Pennsylvania Railroad Company has decided to issue \$6,500,000 of stock, giving present holders the privilege of subscribing for an amount equal to 6 per cent. of their holdings. The proceeds of the issue, together with some \$5,000,.. 000 of cash in hand, are to go to the purchase of new rolling stock, the construction of third and fourth tracks and general improvements.

Type-printing maschines are of old date, but they turned out messages on long strips of paper, or "tape," which it was inconvenient to read and handle. The "ticker" of the stock broker's office is a survivor of a form of machine once in use for ordinary telegraphic messages. The Moore & Wright invention discards the tape of the "ticker" and produces news of every kind in column form, agree able to the eye and easy of reference. Only one wire is used. The instrument operates, it appears, on the same principle as the ticker, the innovation being chiefly in the form in which the message is delivered. Her Face was Her Fortune.
