# WEAK WOMEN.

Why are they Weak and Can they Become as Healthy and Vigorous as Men? Valuable Suggestions on the Subject. At the Madison Square Garden, New York, recently, five women, for six days in succes sion, rode over 100 miles each day upon bicy cles, and at the end of that time were well and strong. This proves conclusively that women have strength and endurance often equal to men. Why, then, are they called a weak race? Because they make little effort to secure strength or retain it after it has been secured. Women are pale, sallow, troubled with many weaknesses and why? Because they do not observe the laws of health and keep their bodies as they should. Their blood becomes thin and beats slowly. It should be stimulated to strong and healthy action. Cosmetics will not do this, nostrums cannot, but pure whis-key, taken as a medicine, will. If the lady of society returning from a reception or shop-ping expedition, will use a little pure whiskey Nature will be assisted, so that instead o breaking down it will be tided over until it can recuperate. If the weary woman who is beset by work and cares will do the same thing, she, too, will be helped. Anything that assists nature helps to bring health.

The importance of using only pure whiskey cannot be too strongly urged, but there is little good and pure whiskey to be had. The only safe one to take is Duffy's. It is a Pure Malt Whiskey, free from all impurities, and has been used by the most prominent men and women in America for years. It is recommended by the leading physicians. chemists, clergymen and it merits the great popularity it has.

. The fact that we have a "lord chancellor," or "keeper of the great seal" of the United States, is probably not generally known. His name is George Bartle. He was born in Virginia, and was appointed to the Clerkship in the State department from Virginia by Daniel Webster forty-three years ago. He is a little withered up old man of pleasantly courteous manners, as befits a Virginia gentleman of the old school, but so secretive, partly by nature store.

and partly by the habit acquired by the orty-three years of confidential service, that none of his fellow clerks venture to ask him even the time of day without presenting him with a written requisition from his superior officers authorizing him to give the information. During the last eight years the number has not increased although the population has been steadily increasing. While the num ber of suicides by the use of firearms has been decreased, there has been a contemporaneous increase in the number of deaths by means of poison. This indicates a pre-deter-

mination on the part of those in whom the suicidal mania was most strongly pronounced that there must be no chance of failure, the thought being that such failure might subject them to the punishment prescribed by the penal code. It is a significant fact that of those who have committed suicide during the last eight years two thirds were of foreign birth and one third na-
