Antonio Fantopula, an Italian, sleeps in his fruit store near Front Street Market. Last night he left the door unlocked and awoke to find four men near him. He thinks they wanted to chloroform him. They were all colored. Fant jumped up and the men ran. He got hold of one and had him down on the sidewalk, when one of the burglars' comrades came to his assistance and began beating the Italian with a rock, when the fellow escaped. This morning Mr. F. recognized one of the men and had him arrested and taken to the City Hall. The police have taken hold of the matter and hope to bag all of the birds.

## Wandering Around.

A demented old colored woman was found early this morning entering the premises of citizens in the Eastern part of the city. She would enter a yard, go around to the back yard and then come out and enter the next. A gentleman hailed her and tried to find out who she was and where she lived but she was so excited that she could give no account of herself. Finally one of the neighbors identified her and told where she lived and she was taken home.

## A Distressing Accident.

Sheriff Taylor tells us of a distressing accident which occurred near Supply, in Brunswick county, a few days ago. Mr. Ben Williams, a young white man, had been out hunting, in company with several others, and the party were on their way home when the hammer of Mr. Williams' gun caught in some way, as they were crossing a branch, and the gun was exploded, Mr. Williams receiving a very dangerous wound in his left arm, near the shoulder. The entire charge of 14 buckshot struck the arm, lacerating it in a fearful manner. The bones were not shattered but the arm is so badly torn that Dr. McNeill, the attending physician, thinks it possible that it may yet be necessary to amputate it.

## Creosote Lumber and Construction Co.

This company is an outgrowth of the Carolina Oil and Creosote Company of Wilmington. Its affairs are reported to be well managed and in good condition. Mr. B. F. Burchard is Superintendent and Chief Engineer of the works at Fernandina.

## Beaches and Bars and Tides.

Not many of our readers are aware of the fact that what is now known as Masonboro Inlet was once situated just about where Wrightsville Club House now stands. Mr. Sneed, the oldest inhabitant of Wrightsville, is responsible for this statement. He says that such was the identical location of the inlet 50 years ago. It has traveled South at the rate of a mile in fifty years, or two miles to the century, a rate of progression that amounts to 35 yards or 155 feet a year, or five inches each day. In the meantime Moore's Inlet has also moved to the South in a like progression. We can recollect when the latter was much farther North than it is now and when Masonboro Inlet was also nearer the Club House than it is at present. If we mistake not it was then called "Wrightsville Inlet."

But Masonboro Inlet is filling up now. There is a big sand shoal right at the mouth of it and it is a noteworthy fact that the tide now comes in mainly at Moore's Inlet and flows South, whereas it formerly came in at Masonboro and flowed North. Not many years ago a steamer, drawing twelve feet of water, crossed Masonboro bar, but she couldn't do anything like it to day.

Don't hawk, hawk, blow, spit and disgust everybody with your offensive breath, but use Dr. Sage's Castor Oil Remedy and end it. 50 cents by druggists.

## A Wilmingtonian Killed.

A terrible disaster is reported by telegraph from Jacksonville, as having occurred at the mouth of the St. John's River. Capt. R. G. Ross, the contractor for the work, is our well known Wilmington friend and Capt. A. C. Moore and his unfortunate son were both from this city. The latter was a clerk not long ago for Mr. George A. Peck at his hardware store on South Front street. Following are the particulars sent out in a Press dispatch:

JACKSONVILLE, Sept. 5.—A terrible explosion occurred at the mouth of the St. John's river, by which two men were killed and several more injured. Capt. R. G. Ross, in charge of the government jetty work at St. John's bar, has been engaged for several days in blowing up the submerged wreck of the old Dutch brig "Nerva," which has for years obstructed the channel off Mayport. He had in command Capt. A. C. Moore, with a crew of twelve men. Two of the men, R. T. Moore, son of the captain, and Grandison Powell, colored, were soldering a 25 pound can of dynamite, when it exploded with a terrific report and blew both men to atoms, only one toe of Moore being found after the explosion. Engineer Dunn of the lighter was badly wounded in the side and arm. Capt. Moore was blackened by the explosion and badly shaken up, but is not seriously injured. He is, however, in a state of mind almost bordering upon insanity by reason of the terrible fate of his son. The explosion was heard for miles around and caused an upheaval of water and tremor of the earth which created considerable alarm.

Steam tug Robert Turner went hurriedly to the scene of disaster and then blew whistles of distress, which brought the government steamer and others to the rescue, and carried Dunn to Mayport, where he could receive medical treatment. The lighter was boarded immediately after the explosion to ascertain what other damage was done, and everything was found one mass of wreck and ruins. The machinery of the jetty lighter and engine was completely demolished. A big hole was found on the deck of the lighter, and the crew badly demoralized. Search was at once instituted for the remains of the men, but without further success. Moore's vest and pants were subsequently found among the floating wreckage torn completely in shreds.

The accident attracted a great crowd of people to the shore and the greatest excitement prevailed. Captain Ross, the contractor, had gone to St. Augustine to spend a day, where Capt. W. M. Black, U. S. Engineer in charge of the jetties, has his headquarters. He was at once communicated with and will do everything possible under the circumstances for the relief of the wounded. He is expected in Mayport to-night.

Moore, the white man killed, was twenty-two years old and unmarried. This is the first serious accident to occur at these jetties since the work began several years ago.

Rain enough to lay the dust is needed now.
