Merit Wins

We desire to say to our citizens, that for years we have been selling Dr. King's New Discovery for Consumption, Dr. King's New Life Pills, Bucklen's Arnica Salve and Electric Bitters, and have never handled remedies that sell as well, or that have given such universal satisfaction. We do not hesitate to guarantee them every time, and we stand ready to refund the purchase price, if satisfactory results do not follow their use. These remedies have won their great popularity purely on their merits. Robert R. Bellamy, wholesale and retail druggists.

The Slate Pencil Industry. One of the most peculiar branches of industry in this country is the manufacture of slate pencils. There is only one slate pencil factory in the United States. It is located at Castleton, Vt, and employs twentyfive hands, who turn out thirty thousand slate pencils every day. The method of manufacture is a good deal in advance of the primitive means employed some years back. Not long since the blocks of soft slate from which they are cut were sawed in lengths and distributed among the neighboring laborers' families to be whittled down in pencil shape. Those working at them could earn about fifty cents per thousand. By the present system the blocks, which are as wide as the pencil is long, are put into the mouth of a machine called the crocodile. This contains six rows of revolving curved knives. As the slab passes between these knives parallel grooves are cut in the slabs, then they are turned and cut through. The square pencils are then rounded and polished by holding them against the emery belt. One man can cut out and finish about eight thousand pencils per
