The last returns of the central statistical bureau at Stockholm give the population of Sweden at the end of 1888 as 4,748,257, against 4,717,189 at the end of 1886. The rural population amounted to 3,888,049, and the urban to 860,208, but the latter is increasing steadily. The number of males was 2,301,104, and of females, 2,447,153.

The number of persons employed astyear in and about the mines in the United Kingdom under the coal mines regulation act was 534,935, of whom 3,925 were women working above ground. The nickel-in-the-slot contrivance has been utilized for the sale of postage stamps. A machine has been invented which will produce a two cent stamp when two pennies are placed in the slot. There are also machines so contrived that a large number of stamps can be obtained when ten or fifty-cent pieces are used. The inventor of the maadopt it.

The rate of increase, exclusive of immigration, is estimated at 1.8 per crease of population averages over 43,000 a month, or over 500,000 yearly. The aggregate annual growth from both causes does not fall far short of 1,750,000. The estimated foreign population is not much below 14,000,000.

The Salt Lake Tribnne says the Scandinavians are rapidly leaving the Mormon Church. The Scandinavian Methodists and Lutherans HARPER'S WEEKLY has a well-established are the cause of it. They are being converted faster to Christianity than the elders can send over fresh supplies, and when once converted from Mormonism make excellent citizens.

> Catarrh is a common disease, so common that snuffing and "hawking" reach you at every turn. Advice to Mothers.

MRS. WINSLOW'S SOOTHING SYRUP should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the enild from pain, and the little cher-ub awakes as "bright as button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best known remedy for diarrhea, whether arising from teething or other causes.
