TH [From the "Southern Cultivator," December No. 1870 ]
The opinion of Col. Wm. F. Roberts, a Planter of South Carolina, on various kinds of Cotton "The Holmes variety kept aheadof the Dickson varieties, (Sparta, Oxford, Simpson and Hunt) "The Holmes variety kept ahead of the Dickson varieties, (Sparta, Oxford, Simpson and Hunt) in growth. It was one stalk to the hill, 4 feet rows; all the Dickson varieties were 2, 3 and 4 stalks to the hill, 6, 7 and 10 inches apart. Holmes' is the best branched cotton I ever saw, but not thickly boiled like the adj ining cotton. The two Dickson's both beat him, and the stalks only about two-thirds the height of Holmes'. Simpson, in the same little patch of 9 acres, is the prolife uniformly, than any other of the Dickson varieties. Every one who has seen my little patch begged for a few of the Simpson—from 1 peck to 1 bus' el of Seed.

"Mr. Sparta Dickson has evidently managed to dwarf his stalks and increase the bearing.
Simpson though more uniformly prolife. It is to be boxed for the public benefit. Simpson's Dec.

Simpson though more uniformly prolific—It is to be hoped, for the public benefit, Simpson's Prince iffe may soon be surpassed."
