### Maternal Influence.

When one sees a family of children going to school in well mended clothing, it tells a great deal in favor of a mother; one- might vouch that these children learn some valuable lessons at home, whatever they may be taught at school.

## Cotton in Fayetteville.

The Eagle says: "Cotton still comes to our market in considerable quantities, usually from twenty to fifty bales a day. We learn that there is much cotton held yet in this section by farmers, and that a large amount is stored in town here awaiting better prices."

## Superior Court.

The Spring term of New Hanover Superior Court will commence Monday, April 24th. Up to the present time, as we lear a from the Cierk, there are only 339 cases on the civil docket. On the criminal docket there are only about 28 cases entered, an indication that the criminal docket of the approaching session will be the smallest known for several successive terms.

## The Irish Exiles.

We were shown, yesterday, a letter received by a gentleman of this city from Mr. Harry 8. Mulleds, one of the Fenius exiles lately arrived in this country, who, with Col. Burke, McClure, O'Counell, Devoy, Dr. Power, Mulcahey, and in fact the entire party with the exception of O'Donnovan Rosso, were in Washington at the time the letter was written. The latter has just made an engagement with some gentlemen North to deliver a series of twenty-four lectures, which he commenced at Philadelphia on the 23d, and for which he is to receive the neat little sum of \$6,000. The writer seems to be in the best of spirits. The party were to leave for New York on the 21st, the day after the letter alluded to was written.

## Our Bar and River Improvement.

We notice that the Congressional Committee on Appropriations have reported the River and Harbor bill back to Congress with this item, among others, approved : For improvement of the channel at the mouth of Cape Fear River, N. C., \$75,000. At this stage of the important work which is in progress for the improvement of our river and bars, the feasibility of which has already been established, it is a source of gratification to know that the government sympathies in the efforts being made to the extent of furnishing the material aid necessary. While the appropriation mentioned will probably fall far short of the amount required for the work, it may be taken, we imagine, as an earnest of still further assistance when the developments are such as to prove beyond doubt that the money is being spent to some purpose.

There were present at the rink last night s large number of spectators and devotees of the "gliding art" to witness and participate in the exercise and amusement. This was the third "Weekly Award Night," and on no more deserving Skaters could have been bestowed the usual honors than Miss Daisy Lippitt and Mr. Henry Clark.

Quite an interesting and new feature, introduced last night, was a race between several of the youthful patrons of the rink. The distance was six times around the Hall, which was accomplished by Master Clifton Vanorsdell in one minute and twelve seconds, who received a handsome book, the prize offered to the one who should make the six circuits in the shortest space of time.

On Friday the "Mouthly Awards" will be distributed, when the most interesting even ing of the occasion may be expected.
