Weather Report.

WAR DEPARTMENT,
Office of Chief Signal Officer,
Washington, Apr. 1 1—4:35 P. M.

The following is a synopsis of the weather report for the pas twenty-four hours:

In the lower Mississippi valley and the Southwest, the barometer has risen since Friday evening and the clouds have very generally cleared away, with fresh and cool Northwest winds. In the South Atlantic States a decided fall in the barometer and rains are now reported. A still-heavier fall, with a decided increase of temperature and partially cloudy weather, has been in progress in the extreme Northwest and on the upper lakes. Heavy rains and a falling barometer are reported on Lake Ontario, clearing up weather on Lake Erie, and threatening and rainy weather in the Eastern States.

Probabilities.

It is probable that, on Sunday, a low barometer, with cloudy and threatening weather and brisk winds, will prevail on the upper lakes, clearing up weather on the lower lakes and lower Mississippi valley, and cloudy or clearing up weather on the Atlantic coast.

A New Invention.

We alluded a few days since to the fact that Mr. J. L. Barlow had been allowed a patent for his new invention which he styles the metal lined spirit barrel. He has since received the necessary papers from Washington and during the past week had one of the improved barrels on exhibition on 'Change, where it was examined by the merchants and business men generally. The utility of the invention, so far as we could learn, was generally conceded, and Mr. Barlow feels so much encouraged by the general verdict of the business community in regard to it that he will commence the manufacture of the barrels within the next few days. In fact he has already received several orders to fill.

The advantages of the metal-lined barrel, so far as we can understand them, are as follows: 1st. Assurance against leakage; the maker warranting the packages not to leak with ordinary usage. 2d. Merchants or speculators may hold spirits of turpentine for any period without fear of loss from leakage, just as cotton or corn may be held for sale. 3rd. There will be no evaporation, and consequently no inconvenience to ships' company carrying the article, whereas at present spirits cargoes are greatly objected to by ship masters and seamen on long voyages. 4th. Safety, comparatively, from fire. There will be no necessity for glue, glueings and its cost. 5th. Second-hand packages will bring nearly as much as new. Taking all these advantages into consideration, the saving to the trade must be very great.

These barrels are made of tin, the different parts sodered together in such a manner as to be perfectly free from any danger of breakage or bursting from any strain brought to bear. The tin barrel, is then enclosed in the ordinary wooden barrel in which it is made to fit close, and the bung is made of brass, with a thread like a screw which secures it in its place, and also secures the inner barrel or metal lining in proper position. The cost of the barrel will be about ten cents per gallon. He will have paters for the different sizes required and can construct them so as not to deviate a particle, no matter how many may be ordered of any given size or capacity.

Pic-Nic at Scott's Hill.

A friend at Scott's Hill, in this county, sends us an account of a very pleasant pic-nic which came off at the place known as "Utley's Wharf," about two miles East of that place, a few days since, which was very much enjoyed by the ladies and gentlemen present. The party, after partaking of a splendid "bate" of oysters furnished by Mr. J. T. Foy, which lasted for an hour, indulged in pleasant rambles and social intercourse until 3 o'clock in the afternoon, when they repaired to their respective homes, much pleased with the day's enjoyment.

Personal.

The Petersburg *Courier* of Friday says: "Messrs. Walters and Newcomer, of Baltimore, and Mr. Bridgers, President of the Wilmington and Weldon Railroad, were in the city yesterday, and had a conference with the President and Directors of the Petersburg and Weldon railroad. Many of our prominent citizens called upon them during the day. They left in the evening train for Richmond."

Harbor Master's Report.

We have been furnished by Capt. B. J. Lawton, Harbor Master, with the following report of the number of vessels arrived at this port for the month of March: Steamers, 15; Brigs, 10; Barques, 8; Schooners, 30. Total, 63—with an average tonnage of 19,723 tons. Of these, 1 barque and 5 brigs were foreign. Not included in the above were 22 small vessels under 60 tons.

RIVER AND MARINE NEWS.

SATUDAY, March 31.

— The Baltimore *Sun* reports the arrival of the *Rebecca Clyde* from this port on Thursday night. That paper says: Capt. Childs reports that he came out the west bar March 27th, and the same night, it blowing heavy from the northeast, anchored back of Cape Lookout. On the 28th proceeded, but at night the wind increasing to a gale and the ship making no progress, ran into Hatteras cove and anchored. On the 29th, the wind still strong from the north-northeast, again got under way and proceeded, and came into Cape Henry at midnight, with strong southeast wind and rain.

DANGER AHEAD.

A single spark may kindle a flame that will consume a city, and small ailments neglected, may end in fatal disorders. Bearing this fact in mind, let the first symptoms of debility or nervous prostration be met promptly with invigorating treatment. Foremost among the vegetable tonics of the age stands Hostetter's Stomach Bitters, and whenever the vital powers seem to languish, or there is any reason to suspect that the animal functions essential to the sustenation and purification of the body are imperfectly performed this invaluable invigorant and antiseptic should at once be resorted to. Indigestion always produces weakness of the bodily powers. Sometimes it happens that the appetite demands more food than the stomach can digest; though not more, perhaps, than is required to keep up the full strength of the frame. The object under such circumstances, is to increase the digestive capacity of the assimilating organ, so as to make it equal to the duty imposed upon it by the appetite, and capable of supplying the *building material of the system* as fast as it is required. This object is fully accomplished by the use of the Bitters. They tone and gently stimulate the cellular membrane which secretes the gastric juice, and the result is that the solvent is mingled with the food in sufficient quantity to convert all its nourishing particles into pure and wholesome element. If, on the other hand, there is a deficiency of appetite, without any corresponding deficiency of digestive power, the effect of the tonic is to stimulate a desire for food. In nineteen cases out of twenty, headache, nausea, nervousness, fainting-fits, spasms, and, indeed, most of the casual aches and pains to which humanity is subject, proceed primarily from indigestion complicated with biliousness; and for both these complaints Hostetter's Stomach Bitters are recommended as a speedy and certain remedy.

TO SCEPTICS.

The almost daily receipt of voluntary testimonials from every part of the country, from Physicians, Clergymen, old and young, male and female, is sufficient to convince the most sceptical that DR. TUTT'S EXPECTORANT is the most valuable LUNG BALSAM of the age; many wonderful cures have been performed by it, as may be seen by hundreds of certificates in the hands of the proprietor.—Try it and you will doubt no longer.

PAIN KILLER.

It is a Balm for every wound. Our first physicians use and recommend its use; the Apothecary finds it first among the medicines called for, and the Wholesale Druggists considers it a leading article in his trade. All the dealers in medicine speak alike in its favor, and its reputation as

A Medicine of Great Virtue,

is fully and permanently established. It is the great FAMILY MEDICINE of the age.

TAKEN INTERNALLY, it cures Dysentery, Cholera, Diarhœa, Cramp and Pain in Stomach, Bowel Complaint, Painters' Colic, Liver Complaint, Dyspepsia, or Indigestion, Sudden Colds, Sore Throat, Coughs, &c.

TAKEN EXTERNALLY, it cures Boils, Felons, Bruises, Cuts, Burns, Scalds, old Sores and Sprains, Swellings of the Joints, Toothache, Pain in the Face, Neuralgia and Rheumatism, Chapped Hands, Frost-bitten Feet, &c

PAIN is supposed to be the lot of us poor mortals as inevitable as death, and liable at any time to come upon us. Therefore it is important that remedial agents should be at hand to be used on emergency, when we are made to feel the excruciating agony of pain, or the depressing influences of disease.

Such a remedial agent exists in PERRY DAVIS' "PAIN KILLER," the fame of which has extended over all the earth. Amid the eternal ices of the polar regions, or beneath the intolerable and burning suns of the tropics, its virtues are known and appreciated. And by it suffering humanity has found relief from many of its ills. The effect of the Pain Killer upon the patient, when taken internally in cases of Cough, Cold, Bowel Complaints, Cholera, Dysentery, and other affections of the system, has been truly wonderful, and has won for it a name among medical preparations that can never be forgotten. Its success in removing pain, as an external remedy, in cases of Burns, Bruises, Sores and Sprains, Cuts, Stings of Insects, &c., and other causes of suffering, has secured for it the most prominent position among the medicines of the day.

☞ Beware of Counterfeits and worthless imitations. Call for Perry Davis' Vegetable Pain Killer, and take no other.

Sold by Druggists and Grocers. Price, 25c., 50c., and $1 per bottle. [April-1m
