Manufacturers of Wine.

The Commissioner of Internal Revenue has lecided that a person is "certainly not liable to special tax by manufacturing of wine from grapes of his own growth; nor is he liable to liquor dealers tax if he sells his wine at the sells at any other place, he incurs liability to special tax as liquor dealer, wholesale or retail, or both as the case may require."

Well Drained.

No city in the South is better drained than Wilmington now is. There is not a pond or pool of stagnant water within the coporate limits or for the distance of one mile therefrom. The result to seen in the unusual good health for the season of the year which now prevails, and especially in the comparative scarcity of chills and fever.

Indestructible Tax.

The indestructible Tag is a great convenience to merchants. It answers the combined purpose of a direction label and business card. Call at the STAR Printing and Publishing House and supply yourselves.

His Condition.

We regret to learn that Mr. Costin still lies in a very precarious condition. One entire side of his body is completely paralyzed. He has been speachless from the first, and from a test made by his physician, yesterday afternoon, it is thought that if he is in possession of his faculties at all, it must be in a very slight degree. The chances for his recovery are now considered very small indeed.

City Court.

The following cases were disposed of yester-

Duncan Parker, charged with fighting, quarreling, &c. Case continued.

Geo. West, charged with cursing, quarreling, &c., was found guilty and sentenced to pay the penalty and costs. Alderman Kellogg recommended that the penalty be reduced.

Anni Morris alias Rachel Ann Sealey, charged with cursing, quarreling and street walking. Not guilty of cursing, swearing, &c. Case referred to the Mayor and Alkerman Chadbourn.

Wholesale Dry Goods House.

Those enterprising merchants, Louis, Davis & Co., through Messrs. Fishblate & Bro., Superintendents, have opened a strictly wholesale dry goods house at 23 Market street, and as good terms, as goods can be bought in New York or Philadelphia. Country merchants would do well to examine their stock and consult their prices before sending North for their goods. See advertisement.

Printing Paper.

We do not keep Printing Paper regularly in stock for sale; but can always supply our friends with small quantities, say from two to ten reams, eat reasonable prices for all strictly cash orders. Sizes of paper 22x31 and 28x40 inches, and same quality as that used on the MORNING STAR and Carolina Farmer.

Spinning Cotton, and The Stiention of the Southern people has been called quite recently to the great advantige of spinning their cotton into yarn and shipping it direct to Manchester, England, A gentleman who has lately examined into this matter very thoroughly says that the profits upon yarns are much greater than upon fabrics. English machinery is easily obtain-able at fair costs, which will manufacture the numbers of yarns used in Great Britain, Great saving is made in the costs of transportation, insurance and other charges, and it can easily be shipped from Southern ports direct, as we now have establish d lines of steamships from

The news from Charleston still continues to be of the most cheering character. We learn from the News that a meeting of the presidents of the committees of citizens appointed to visit the various wards of the city was held on advertise that they will sell as cheap, and on | Monday morning. They reported that every ward had been inspected, each lot having been carefully examined, and instructed the chairman to report to the Mayor the result of their operations, as follows :

The reports from the various wards show the city to be in a remarkably healthy con-dition, even when compared with years in which no yellow fever existed. The number of cases of yellow fever, now in course of treatment, does not exceed an average of two in each ward, and the number of persons sick irom other causes is astonishingly few.

The committee who make this report, says the News, are composed of intelligent and trustworthy citizens, who have personally visited every hole and corner in Charleston. They are confident that there are not more than sixteen cases of yellow fever in the whole city; and we may expect that the mortality for the rest of the scason will be insignificant.
