Society of this city will be held at the hall of S. F. Engine Company No. 1, corner of Fourth and Princess streets, this (Thursday) morning, at 11 o'clock. All members and those interest-

It is now a befitting occasion for all who have the means at command to interest themselves in the truly philanthropic efforts of the ladies of this society to provide for the necessities of the poor and destitute in our midst. The cold blasts of winter have already commenced their melancholy dirge around the up the Road on Monday with a number of rude tenements of this numerous class of our hands to commence laying down rails. Enough citizens, many of whom are but poorly prepared with the means necessary to protect themselves and fittle ones from their pittiless are laid down. We also noticed cars loaded fury. Let those who are blessed with an abundance of this world's goods take this important matter into consideration and resolve to aid their less fortunate fellow creatures, if not to the extent of their ability, at least so far as it may seem to them convenient and proper under the circumstances; and they will surely have their reward. ## The Tax on Public Amusements.

A memorial to the General Assembly of this State, now in session, is in circulation in this city, praying that body to reduce the tax on concerts, theatrical and operatic exhibitions, with a view to encourage a more liberal introduction of these exhibitions; the memorialists taking the ground that this policy will in the end ensure an equal amount of revenue with that now received from this particular source, while our people will have an opportunity of witnessing not only a larger number, but, generally speaking, a better class of exhibitions than now visit us. The memorial has received numerous signatures, including large number of our most promiuent and in-Avential citizens, to out fact youls or sol the Manager Spaulding, of the Wilmington The-

people easily. We understand the proprietors claim that on roads in ordinary good condition, that the steamers will draw in the wagons with broad tread wheels adapted to the

work, 12 tons dead weight. We believe that this machine will come fully up to the claim.

We further believe that in charge of competent mechanics, these steamers will be useful, and economical as feeders to the railroads in this section of the State, and as a good substitute for railroads, where there is difficulty in procuring capital for the construction of the latter.

Without load on the race track, the steamer moved around, one-half mile in 1. minute and 48 seconds, or about 17 miles to the hour.

The boiler works well, furnishing all steam necessar y for the heaviest work. With full loaded train the speed will be eight miles an hour on level road in good

order. The road is improved by the steamer passing over it. In conclusion, we think the steamer capable of doing all that is claimed for it. nov 23-tf
