

THE CIRCULATION OF THE MORNING STAR IS LARGER THAN THAT OF ANY OTHER DAILY NEWSPAPER PUBLISHED IN NORTH CAROLINA.

THE COMING MAN.

The facetious editor of the Biblical Recorder says: "The coming man in Church and State is woman."

Women voters and jurors in the West—women lawyers in the same section—women doctors all over the country, (Miss Dimmock of this State, being the first from the South)—women preachers in some of the denominations—what is it the fair sex will not aspire to do?

If the Recorder is right, the question arises, shall she be womanly woman? It matters not into what abnormal positions the spirit of the age may force her, if she keep the whiteness of her soul, if she remain the embodiment of the refinement, delicacy and sweetness of the world. If voting, practising law and medicine, and other masculine pursuits, are going to make her lose these graces and graces, if the mothers of the incoming age are to model after the Cady Stantons and Anna Dickinsons of the day, then let the crusade against the heresies and extravagances of the strong-minded females be waged with increased vehemence.

The Government was no sooner in these hands, but care was taken to load preferences upon such men as were strangers to letters of the people; and every one's observation hath noted, what qualifications recommended a man to public offices and employments, only here and there a good man was used, when others could not easily be had; the Governor himself, with assertions now and then falling from him, made us jealous that it would be thought for his Majesties interest, if this People were removed and another succeeded in their room.

But of all our oppressors we were chiefly aggrieved by a crew of abject persons, fetched from New York, to be the tools of the adversary, standing at our right hand; by these were extraordinary and intolerable fees extorted from every one upon all occasions, without any rules but those of their own insatiable avarice and beggary; and even the probate of a will must now cost as many pounds perhaps as it did shillings heretofore; nor could a small volume contain the other illegalities done by these Horse-Leeches in the two or three years that they have been sucking of us.

Persons who did but peaceably object against the raising of Taxes without an Assembly, have been for it fined, some 20, some 30, some others 50 pounds, Packed and pickt Jurors have been very common things among us. Some have been kept in long and close imprisonment without any the least information appearing against them, or an Habeas Corpus allowed unto them.

Such was this ancient craft in Massachusetts (imported from New York) nearly 200 years ago. The picture seems to have been drawn here in Richmond, says the Enquirer, in 1871. Was there ever anything (it asks) more life-like, more true?

THE BATTLE GROUND IN CONGRESS.

The battle ground in the December session of Congress will undoubtedly be the tariff. The whole force of the Administration will be massed at the weak points to secure the renomination of General Grant. The hearts of his partisans are set upon this that the legislation of the session will be mostly in this interest.

But the struggle over Revenue Reform will develop differences in the Republican ranks that will have to be healed before the end of the session, or else Grant will inevitably be defeated. A divided party can not elect Grant, and his friends know it. They know that concessions will have to be made to the Revenue Reformers, who are principally from the West. Reductions in the tariff will be made in certain articles, as coffee, sugar, etc., as a sop thrown to the Western Caribbeus.

New England being deemed safe any way, will not receive much consideration. But Pennsylvania, with her heavy iron and coal monopolies, will be protected from the attacks of the Reformers. To defend themselves however from these attacks and reconcile the differences in their own ranks will require all the sagacity and energy of the Administration Protectionist party.

Palmetto Leaves.

F. F. Meir, LL. D., of Bremen, arrived in Charleston on Friday.

Gen. M. O. Butler is spoken of as the President of the Blue Ridge railroad.

Mrs. Helen O'Neill, wife of the late Chief Justice O'Neill, died in Newberry last week.

George Brockington, a negro man, was drowned on Thursday at the bridge across Black River, at Kingstree. He was under the influence of liquor.

The Union Times says: A negro man was burned to death at Cade's depot, from his clothes, which were smeared with turpentine, catching fire.

The Laurinville Herald says: The gin-house of Mr. Bryson of this county, containing about nine bales of cotton, was consumed by fire, together with its contents, a few mornings since—the result of accident.

Says the Laurens Herald: We understand that J. G. Liptford, a day or two since, was shot by D. H. A. Mason, near Kinard's Turnout, in this county. We hear that the shooting was done in self defence. It is thought the wound will prove mortal.

The Cheraw Democrat says: Solomon Ellison, colored, who we noticed in our last as having been stabbed on the 4th instant, by Henry Drake, colored, died on Monday last. Drake was arrested and lodged in jail, but effected his escape with the other prisoners last week.

Historic Carpet-Bagging—An Interesting retrospect. It is a remarkable fact that carpet-bagging originated a great many years ago, in Massachusetts. A venerable pamphlet, bearing date April 18, 1839, and entitled "The Declaration of the Gentlemen, Merchants and Inhabitants of Boston and the Country Adjacent," gives an account of "the late revolution in New England."

The Government was no sooner in these hands, but care was taken to load preferences upon such men as were strangers to letters of the people; and every one's observation hath noted, what qualifications recommended a man to public offices and employments, only here and there a good man was used, when others could not easily be had; the Governor himself, with assertions now and then falling from him, made us jealous that it would be thought for his Majesties interest, if this People were removed and another succeeded in their room.

Such was this ancient craft in Massachusetts (imported from New York) nearly 200 years ago. The picture seems to have been drawn here in Richmond, says the Enquirer, in 1871. Was there ever anything (it asks) more life-like, more true?

Up the River. The Chicago Times says: "An indication that Chicago is destined to rise from her ashes in a wonderfully short period of time is witnessed in the fact that on River street—a short street entirely filled with brick and stone houses before the conflagration—every building is now in course of re-erection; many of them having already reached the third story. In the burnt district of the south division there are probably two hundred permanent structures in course of erection, a considerable number of them ready to receive the roof. A single building elevators now working four hundred bricklayers, and several other builders are employing perhaps an equal number, besides the many who employ a smaller number."

A Strange Accident. A strange and extremely unpleasant mistake occurred in East Boston recently. A new domestic had just been engaged by a family on London street. The lady of the house had had occasion to use an application of croton oil, and had left a bottle of it in the kitchen. The new girl supposed it to be hair oil, and thought an application would benefit her hair. So she poured on a good quantity of it; she seldom do anything of the kind by herself—and went to bed. The effect of it was not only very surprising, but very painful. When she arose in the morning her head was as bald as the traditional billiard ball; and the oil, which had trickled down her face, had run into her eyes, burning her face and seriously endangering her eyesight. She was removed to the city hospital for treatment.

The brig Fricas arrived at Lombard street wharf, Delaware, yesterday morning, having on board six fugitive Arabs, dressed in nothing beside linen clothes. These fugitives were almost frozen, the temperature being colder than on any other morning of the present autumn. There was nobody on the vessel who understood a word of English. It was said that these Arabs had been captured by the French during the Algerian rebellion and banished for a number of years to French Guiana, an island on the Spanish main. It was further stated that the Arabs served their time out, and then proceeded to Demerara, where they worked at whatever they could find to do until they raised money enough to pay their passage to America.—Pub. Record.

STAR BEAMS.

— Edwin Booth is making \$800 a night in Brooklyn.

— Slavery is to be abolished in Siam after the New Year.

— Cider is being imported into this country from England.

— London has a new street lamp with looking-glass reflectors.

— An Indiana family lost five children within a few days by diphtheria.

— It is said to be curious, but true, that most people sleep hardest on soft beds.

— A Railroad in New Hampshire has been indicted for charging extortionate freights.

— Vallandigham's estate has been settled up and it is said to amount to more than \$100,000.

— Capt. Robert D. Minor, a prominent citizen of Richmond, died suddenly on Saturday morning.

— There is an alarm in Washington cause, by the sale of faulty meat, and twenty-three butchers, have been arrested.

— It is thought that there will be in the neighborhood of two millions of dollars in Virginia State treasury by the 1st of January.

— It is said that a green tarlatan dress contains arsenic enough to kill a man, and yet men do not seem to be afraid to go near green tarlatan dresses.

Colonization in Kansas—Movement of Colored Settlers.

ST. LOUIS, Nov. 24. The annual meeting of the stockholders of the National Land Company was held here yesterday. The report shows that 108,200 acres of land in Kansas and Colorado were sold to actual settlers during the year, for the total sum of \$463,000. The number of acres sold since the organization of the company is 482,900. The company has settled twenty distinct colonies on this land. Chas. B. Lobson, Secretary of the Kansas Pacific Railroad Company, was re-elected President of the Land Company.

Forty-five colored persons passed through the city yesterday, en route to Lawrence county, Kansas. They are the advance guard of five thousand who will soon follow.

A shocking murder was recently perpetrated in Bullock county, Alabama, where a Miss Emma Gilmore was murdered by her own uncle, Wm. J. Gilmore. It seems that some ten or twelve months ago reports were in circulation to the effect that a criminal intimacy existed between Gilmore and a niece of his, and not long since she gave birth to a child, whereupon said Gilmore was tried by the church, of which he was a member, and expelled upon the testimony of Miss Emma Gilmore, cousin to the guilty party. Immediately after the trial in the church, Gilmore loaded his gun with buckshot, and placing the muzzle of the gun to her head, fired, killing her instantly.

An Operatic Event.

On the evening of the 23d, New York enjoyed an operatic "event" in the production of "Mignon," which was sung at the Academy for the first time with Mlle. Nilsson as the heroine. The critics, for once, are unanimous in pronouncing it an unqualified success. The receipts are estimated at about \$6,080. Among the audience were Gen. Dix, Mr. Belmont, Gen. McClellan, Wm. Cullen Bryant, Gov. Randolph of New Jersey, and United States Senator Fenton.

Terrible Accident.

It was reported here yesterday that a terrible accident occurred at the Big Tunnel, on the Chesapeake and Ohio Railroad Monday evening, by which some twelve or fifteen colored laborers were either killed or wounded. The accident was the result of the premature explosion of a blast, and amongst those reported killed was Elias Crawford, of this city; and amongst the wounded is John Brown, also of this place.— Lynchburg News.

A Cheerful Parent.

John Grimes, an ex-police man at Philadelphia, has been arrested on the charge of assaulting his wife by throwing a bucket of water over her while confined to her bed, and caused the death of a new-born child. The coroner's jury, however, have returned a verdict that the babe died by natural causes. John was mad because it was a girl and not a boy. Cheerful parent to have about the house.

The New York Sun publishes as a remarkable coincidence a deed dated May 23, 1869, for 97 acres of land (consideration one dollar) situated in Cook county, Illinois, from one Joseph R. Jones and wife to Ulysses S. Grant, and the appointment by President Grant, on the same day of the date of said deed, of said Joseph R. Jones to be Minister Resident of the United States at the Court of Brussels. The coincidence is rather remarkable.

An organ for the chapel of Washington and Lee University is now in preparation in the celebrated factory of Henry Hobbs, New York, and will be ready for shipment next month. The instrument will be a large and costly one. It is intended as an offering of gratitude and admiration to the memory of Gen. R. E. Lee by certain ladies of Texas, by whose liberality, chiefly, the expenses have been provided for.

Michael Adams, a Wachusetta (N. J.) beggar, was lately found dead upon a table in his bed, with \$1,500 lying beside him. The miser had died, counting his money. He had not been seen for some time, and the curiosity of the neighbors led them to enter his cabin, where he was found dead as described.

SPECIAL NOTICES.

THE TRUE GROUNDS OF CONFIDENCE.

Whence comes that firm reliance, that absolute, undebating faith in the efficacy of Hostetter's Stomach Bitters as a remedy for indigestion, bilious disorders, intermittent and remittent fevers, which notoriously prevail in all parts of the United States? This confidence has been growing for twenty years, and it is still extending. It is not the result of credulity; it has not been engendered by any human device, but is the spontaneous and natural consequence of experience. What people see daily going on under their own eyes they cannot question. When families in unhealthy districts, that resort to this wholesome vegetable tonic as a preventive, escape periodical fevers, and their immediate neighbors, who neglect that precaution, are prostrated by the disease, how is it possible that the phenomenon should be without its lesson? In like manner when it is seen that obstinate cases of dyspepsia, of liver complaint, of constipation, of nervous weakness, and of general debility, yield to the operation of the famous remedy, how can even incredulity itself withhold its assent? The numerous testimonies of the salutary effects of the Bitters, are to be found in every civilized settlement on this continent. The thousands upon thousands who owe their restoration to health and strength, or their preservation from sickness to its extraordinary medicinal properties, are enthusiastic in its praise. The multitudes who recommend it in a neighborly way to their friends and acquaintances, as well as those who make public their opinions of its virtues, are always ready to state their reasons for the faith that is in them. They have all either felt or witnessed its beneficial operations. nov 23-61 Sun Wen Fr.

CLEAR AND HARMLESS AS WATER!

NATTANS' CRYSTAL DISCOVERY FOR THE HAIR.

Arthur Nattans, Inventor and Proprietor, Washington, D. C.

A PERFECTLY CLEAR PREPARATION in one bottle, as easily applied as water, for restoring gray hair to its natural color and youthfulness of appearance, to eradicate and prevent dandruff, to promote the growth of the hair and stop its falling out. It is a vegetable and perfectly harmless preparation, and has been sent us from many of our most prominent citizens. In everything in which the articles now in use are objectionable, Crystal Discovery is perfect. It is warranted to contain neither Sugar of Lead, Sulphur or Nitrate of Silver, it does not soil the clothes or scalp, is agreeably perfumed, and makes one of the best dressings for the hair in use. It restores the color of the hair "more perfect and uniformly than any other preparation." It always does so in from three to ten days, virtually feeding the roots of the hair with all the nourishing qualities necessary to its growth and healthy condition; it restores the decayed and induces a new growth of the hair more positively than anything else. The application of this wonderful discovery also produces a pleasant and cooling effect on the scalp and gives the hair a pleasing appearance.

Call special attention to the fact that a limited number of small trial bottles can be had by those wishing to try it. You will notice that in pursuing this course our aim is to convince by the actual merits of the article. For sale in Wilmington by MOLLHENRY & WRIGHT, Wholesale and Retail at Proprietors' rates. nov 24-61
