WAY NOTES.

We returned last night from a five imple tant to have the party in fine days' visit in Granville, Wake, and Wayne counties. Our notes will, ne- tions, that as soon as the anticipa cessarily, be as hurried as our trip.

The people of Henderson, Granville county, a pleasant and lively town on the Raleigh and Gaston Railroad, are busily preparing for the in Nah Carolina. Thorough local approaching Fair. The commodious and elegant Floral Hall will be completed in time for the exhibition, which commences on the 8th prox-

Cotton has supplanted tobacco as the staple crop of lower Granville. As elsewhere the cotton crops of the Henderson section have suffered to some extent from drouth. Gen. Cox told us on the cars that he thought the crop in North Carolina would fall short twenty-five per cent. of the average.

We noticed local improvements of importance in Henderson. That place, it will be remembered, was almost entirely destroyed by fire in

Raleigh had no unusual excitement. There were no conventions, no theatricals, no Legislature. It was rather early for politics to "rage," but con siderable interest was manifested the approaching elections in Pennsy vania, Indiana and Ohio. Hope wa high, with the "knowing ones."

Raleigh is a growing city, and it prosperity is based on a solid found: tion. The establishment and ma tenance of schools of high grade w make the beautiful and thriving "C of Oaks" an important literary tre. Among these and in the fo most rank of the female seminaries the State stands St. Mary's, the Ha eigh Seminary and the Burw (Peace) Institute.

The health of the capital city has not suffered unusually this season from sickness, as some of the State papers have reported.

We found quite a number of our Wilmington families stopping at the Yarborough House, which has been, under the proprietorship of Dr. Blacknall, a popular resort for travellers and pleasure seekers. The Yarborough is conducted so well, we

From what our Local terms "Wake Court House" we turned our face homeward, resting four hours in the bustling little city of Goldsboro. This metropolis of a belt of counties is fast getting over the effects of its disastrous fires. The new hotel of Messrs. Humphrey & Smith is a magnificent and costly structure. It will not be completed in time for the Fair .-Eleven new stores, all brick, are in various stages of building. Extensive preparations for the Fair were going on. The grounds are well arranged and every comfort and convenience will be afforded the exhibitor and visitor.

TO THE PRONT.

We trust our Central Executive Commuttee are making arrangements for a thorough canvass of the State during the month of October. Let our best speakers be brought out, and let them visit every county in North Carolina. There is too much apathy in our ranks; and while this apathan coded in going him to the edge of the is partially attributable to the fact boat the hour broke, when some of the that we have no State, County or District officers to elect, there is no good reason why it should prevail to any cluding the trick old fishermen on

The Dr. has a pet dog, and the servant discovered the animal in the act of sucking the teats of the cow, (she reclining on the grass in the yard at the time) just as a calf would have done, the cow in the meantime evin cing no annoyance, but rather indicating that she took it as a matter of course. Since then a watch has been kept on both the cow and dog by Dr. King and others of the family, which has led to the rather remarkable discovery that the dog not only receives his daily subsistence from the cow, but that he follows her wherever she goes, even through the streets, she in the meantime showing every affection for this singu-Tor New England on Tuesday, southerly wited and partly cloudy weather; for the Middle States, southeasterly to southwesterly winds, with increasing cloudiness and with areas of rain, over the northwestern portion of New York and Pennsylvania; for the South Atlantic and Gulf States east of the Mississippi, easterly to southerly winds, cludy weather and rain areas; the pressure continue diminishing from Tennesses to be lakes, with increasing southlar specimen of the canine species that would be natural if he were her own calf.

At the dinner table on Sunday he fell from the chair in which he was sitting in a kind of fit, and during the balance of the day complained of feeling unwell, but his condition was not such as to create any alarm. — The Raleigh News was shown Saturday, at the North Carolina Land Company, a stalk of cotton, seven feet in hight, containing one hundred and seventy-five bolls, raised on the farm of Mr. Scott, of the above company, one-and-a-half miles from this city.

- We learn from the Goldsbo Messenger that Barfield was acquitted of he charge of murder. The addresses of Messrs. Faircloth, Wooten and Dortch were the most brilliant and impassioned descrition. The Bunn case was called up on F day. The defendant plead "not guilty" the indictment of arson, but "guilty" "forcible trespass," which being accept

Mr. Ramsay says he intends pushing the temperance movement in North Carolina this year with more vigor and rapidity than ever before. So says the Raleigh Sentinel.

-- The Asheville Citizen has this: On Friday last a difficulty occurred between two white boys and a negro of this place, in which one of the boys, William Davis, of Beaver Dam, was dangerously wounded by a knife in the hands of the negro, the artery in his wrist being severed, from which he bled profusely. Davis is now lying in a critical condition at the residence of Mrs. Whiteside, and is attended by physicians from town. We have not heard of the arrest of the colored boy.

 The Asheville Citizen witnessed the following remarkable horse and buggy feat performed by Rev. Mr. Buxton while riding out with his wife. A bridge over a deep gully oad been broken down after he passed. On his return, not knowing what had happened, and driving rapidly down the hill, the horse plunged into the gully, his momentum carrying himoelf and buggy successfully through the wreck tothe other side, without the slightest fracture of limb or buggy. The escape was marvelous. In neighborhood abounding in the finest building rock, there seems no reason why these pole and log bridges should be tolerated within the corporation, as it may find out, one day, to its cost, when sued for exemplary damages.

The Culture of the Hair.—Just as surely as a soil infested with Canadian thistles can be made to produce fine crops of golden grain, the scalp now sparsely covered with harsh, dry, unmanageable hair can be made prolific of silken tresses. All that is necessary to effect the change in either case is the right kind of fertilizer. Leaving the agricultural chemists to determine how the barren land shall be made fruitful, we positively assert that Lyon's Katharon is unequaled as a fertilizer and beautifur of the hair. Twenty-five years of success is the basis of this unqualified statement. During that time it has been used by many millions of both sexes, and has been used by many millions of both sexes, the first instance in which it has failed to fulfill expectations of a rational purchaser has yet to be discovered. It will not cause hair to grow on a var nished gourd; but wherever the roots of the hirsur-fibers remain undisturbed it will cause them to put forth new shoots, and in all cases where the hair has become thin it will increase its volume. sep 24-Tu Th Sat
