

WILL THIS SECTION OF THE STATE BUILD UP A GREAT SCHOOL?

Cambridge, Oxford, Harvard and other great institutions of learning have very humble beginnings. In the older time there were no Girards and Cornells to endow the schools with means sufficient to enable them to spring full-blown into the field of strife with older institutions. In those days culture was circumscribed, and patronage was feeble; but there was resolute will, and this is often worth more in such enterprises than mere money. The little seminaries in Old England and the unpretending puritan high school in New England were under the headship of men who were devoted to the work they had undertaken. This spirit of devotion was gradually infused into the people of the communities in which the schools were located. The influence of these schools widened every year, slowly, it is true, but the growth of it was sure. Now, Oxford, Cambridge and Harvard are the three great universities of the English-speaking world.

We cite these to prove that what has been done on a large scale from small beginnings may be done in this age, with its superior advantages, on a small scale, in a section so favored in many respects as our Cape Fear country. We are not ready yet for a university or even for a college, but a commencement for the foundation of a great school suited to the tastes, the genius of our people and the needs of the time should be made, if we desire to keep pace with progress elsewhere. The largest city in North Carolina is supposed to have the means at command to build up and sustain such a seminary of learning for our young men. If we can't have an Eton or a Westminster, at least we may establish a Rugby or a Harrow. We surely have the resources for the sustenance of a high school of the best class. Our population, our commercial importance as a city, the intelligence and activity of our people, all declare that such an institution can be sustained. The question is, will we build up such a school?

Founded five years ago the Cape Fear Academy, which has prospered as no school of its class in this section of the State has prospered since the war, affords an excellent nucleus around which the moral energies, the pride, and the affections of the people in Eastern Carolina may cluster. It is the duty of the good citizen to educate his children. An obligation rests upon him to educate them in homeschools, where the same facilities are offered as elsewhere. The Cape Fear Academy vies with the best high-grade institutions in the South. Its Principal, Mr. Frank H. Alford, an alumnus of one of our oldest colleges, is not only a teacher of considerable experience but also a gentleman of deservedly high reputation in the broad field of American letters and journalism. The Assistant, Mr. W. D. Vinson, is likewise a gentleman of fine culture, a Master of Arts of Washington and Lee University and a resident master in that institution during the past collegiate year. He comes to Wilmington recommended in the very highest terms by the faculty of his alma mater. Possessing these advantages, a reputation previously acquired, a promise of much brilliancy for the future, the Cape Fear Academy appeals powerfully to the pride of the citizens of this portion of the State. In addition to a general average curriculum equal to that of other high schools, it offers unusual advantages in the study of the English, German and French languages.

We are glad to know that the prospects of the Cape Fear Academy are particularly bright and that its next annual term, which commences in October, is likely to be by far the most successful in its history. We think that the prosperity of our schools is a sure index of the general prosperity of our city and section. Therefore it is that we take a warm interest in all our educational establishments. The chief of these intended for the education of our boys and young men is the Cape Fear Academy, and we think that the active assistance of all our people...

The London Spectator thinks that Mr. Fitzjames Stephens' greed may be summed up as "Calvinism with the bottom knocked out."

NEWS FROM SPAIN AND CUBA.

Don Alphonso was defeated, but on the other hand Novillas, through his subordinate Castanon, lost a battle in Navarre for the Government. The people cry, "Death to Novillas," and it is probable he will be removed from command of the Northern army. Pi y Margall has formed a coalition cabinet, which may last a day, or a day and a half, or possibly two days.

In Cuba the Republicans are very much encouraged, which is refreshing intelligence. State pride consists neither in supercilious bearing toward the people of less favored commonwealths, nor in over-sensitive notice of what other folks say of us. True pride is manliness, and the manly person will neither offer an insult nor resent what is not intended as such.

TIMELY TOPICS.

At Vienna one of the most curious articles on exhibition is a glass bonnet made in Bohemia. This style is thus described: "These hats are of the most delicate and beautiful designs, and such is their adaptability to all costumes and occasions that they will probably soon come into universal use. The body of the hat is made of loose pieces of fine glass, fastened together by a gutta-percha band, which allows it to conform to the head. Inside there is a lining of silk, which is the only piece of fabric used in the manufacture. The trimmings on the outside are after the prevailing mode, consisting of wreaths of flowers, feathers and ribbons, all made of delicately spun glass of wonderful beauty. Of course all the trimmings have their natural colors, and by a patent process the glassy appearance is so well subdued that the material is not suspected. The most beautiful humming-birds and flowers are used for ornamentation, and colored so naturally that in appearance they are far superior to the usual artificial goods. It is almost incredible the small amount of glass that enters into the construction of one of these hats, for the thread is so fine that a great space is covered without any perceptible increase in weight. They weigh but a few ounces, or about one-fifth the average weight of the present style. With the care that is usually given by a lady to a new hat, these new articles will outlast twenty of them, for there is no wear to them; moisture will not stain them, and if dust should settle to dim their beauty it is readily removed by a gentle spray of water. The colors are so blended that for ordinary occasions they present a general neutral tint, but at a small additional expense they can be made to flash and sparkle like diamonds, either in the sunlight for a carriage costume, or in the blaze of a ball room, or at the opera. Their cost is insignificant."

PALMETTO LEAVES.

Free postal delivery commences in Charleston July 1st.

A Lodge of Knights of Pythias has been instituted in Greenville.

At Wofford College, Rev. Dr. Whitford Smith delivered the annual address in place of Bishop McTyeire, of Nashville.

Mr. Wesley Small, a young man in Orangeburg county, played with a little rattlesnake last week, was bit three times on the hand, and died next day.

The prosperity and energy of Darlington are considerably on the increase. Several new and commodious buildings are being erected. The new court house is finished.

Peter Wallace, a colored road hand employed on the North Eastern Railroad, was run over and instantly killed by the up freight train on Wednesday night last, while lying asleep on the track.

Mr. A. M. Hill, of Darlington, delivered the valedictory address before the Euphrasian Society, on Wednesday evening, in the hall of the Clarion Society, at the South Carolina University.

The Chester Reporter is after Treasurer Cardozo with a sharp stick—is anxious to know what has become of the immense sums of money collected for taxes, as an account for six dollars cannot be paid, owing to want of funds.

Columbia Phoenix: Two colored men by the name of Smith—Reuben and Henry—got into a difficulty, yesterday, on the premises of Mr. George Davis, near the city, when the former had an ear out completely off by the latter. Sheep stealing was the alleged cause.

IN GENERAL.

An English worsted suit gives a man a stylish air.

A Dorby, Ct., toper pawned his wife's linen for a drink.

Numerous New York bloods wear small thermometers for scarf pins.

Archbishop Whately defined woman as one who pokes the fire from the top.

Women who want to vote should mark Anthony. We mean Sue Anthony.

Nevada pays servant girls \$65 per month, and no one dares to complain about the cooking either.

Edmund C. Stedman, the poet, delivered a poem before the literary societies of Hanover, N. H., yesterday, and Whitelaw Reid the oration.

Miss Leo Hudson's will orders the sale of her house in Baltimore, and the investment of the proceeds in the bronze statue of a horse, to be placed over her grave near that city. The ruling passion strong in death.

Professor Wise has already received twenty-two letters from persons desirous of negotiating for the passage of his first transatlantic trip. One of them is from a noted Oriental traveler and scientist, Dr. Paul Hoffman.

Castelar, the Spanish orator, makes out \$13,000 a year by contributing to two South American journals and Harper's Monthly. He is a golden-mouthed orator and a coiner of gold with his pen, so that the sands of his life, like those of the Tagus, are sands of gold.

Walter Savage Landor related how he once met Napoleon walking in the garden of the Tuilleries, and added, in characteristic Landor style: "The fellow looked at me so insolently that if I had not had a lady on my arm I should have knocked him down."

It is asserted that owing to the careless changing of two labels by a Peoria clerk, an old lady in that city has been swallowing a rheumatism liniment three times a day; and an old gentleman has rubbed himself with blue pills until he can slide up and down the side of a house when the weather changes like a thermometer.

DOWN IN DIXIE.

Cholera in Chattanooga. Covington, La., has several cases of small-pox.

Mrs. Sarah McMillan, one of the oldest residents of Marion, died on the 20th instant.

The Atlanta Herald has abandoned the Georgia Press Association because the rules of that body prohibit the exchange of its members with "patent outsiders."

Mr. Glover, who shot the Gomilons in Edgefield, has given bail in the sum of \$10,000, but is now in the jail of Edgefield county, agreeable to the order of Judge Carpenter.

The annual exhibition and concert of the South Carolina Institution for the education of the deaf and dumb and blind, at Cedar Springs, Spartanburg county, which has been advertised to take place to-day, had been postponed on account of sickness, sixteen pupils and two teachers being unable to be present.

A Cartersville correspondent of the Atlanta Herald writes that the charge of criminal intimacy with a young girl made some months since against a Methodist preacher named Fletcher Weems of that county was lately investigated by a Masonic lodge at Cassville and that Weems was acquitted. The case will, however, undergo legal examination.

A Memphis dispatch says: Crop reports from down as well as up the river give more favorable results; and it is believed that if the weather continues dry for several days, the country tributary to this market will do its best to make the coming crop reach the estimate of the financial chronicler. Some here even assert that it will reach 4,000,000 bales. That however, may be wide of the mark.

[Chicago Inter-Ocean.]

MacMahon Following Thiers. Though the stories that the new President and the members of his Cabinet are already at variance in certain vital questions of public policy are exaggerated, there is, nevertheless, ground to believe that the French Government is by no means a political unit. Nor, indeed, could it be otherwise under the circumstances.

Marshall MacMahon, only a month ago a popular soldier, can hardly fall being so intoxicated with incense that he will serve none of the existing factions in the National Assembly, but be rather tempted to fuse them into one, a MacMahon party. It may, therefore, not be long before we hear again the familiar phrase about the sacred trust reposed in him by the nation, and the solemn duty to keep it inviolate. But this time he is called by no other name than the Republic. With the very natural desire of neutralizing the partisan and dynastic tendencies of his ministers, he will involuntarily discover that the sole palladium for the preservation of the provisional regime is that Republic which he now is loath to mention, and feel himself irresistibly drawn toward the Left Center.

Pulled in opposite directions by Royalists, Bonapartists, and clericals, he could not, even if he would, gratify the aspirations of any one faction, and will therefore turn half from rage and half from ambition, to a conservative republic, and thus tread in the footsteps of M. Thiers' domestic policy.

Mr. George Davis, near the city, when the former had an ear out completely off by the latter. Sheep stealing was the alleged cause.

Be it known to all whom it may concern: That in conformity with the chapter 222 of the acts of the General Assembly passed at the session of 1872, in relation to amendments of the Constitution of the State:

I, T. D. CALDWELL, Governor of the State of North Carolina, do hereby certify that the following is a true and correct copy of the amendments of the Constitution of the State, as passed by the General Assembly at its session of 1872, and as approved by the people of the State on the 20th day of June, 1873:

Section 1. That the following amendments be and they are hereby added to the Constitution of the State: Article I. Section 1. The legislative power shall be vested in a Senate and House of Representatives, who shall be chosen by the people of the State.

Section 2. That the following amendments be and they are hereby added to the Constitution of the State: Article II. Section 1. The executive power shall be vested in the Governor, who shall be chosen by the people of the State.

Section 3. That the following amendments be and they are hereby added to the Constitution of the State: Article III. Section 1. The judicial power shall be vested in the Supreme Court, and in such inferior courts as may be established by the Legislature.

Section 4. That the following amendments be and they are hereby added to the Constitution of the State: Article IV. Section 1. The members of the Senate shall be chosen for a term of six years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 5. That the following amendments be and they are hereby added to the Constitution of the State: Article V. Section 1. The members of the House of Representatives shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 6. That the following amendments be and they are hereby added to the Constitution of the State: Article VI. Section 1. The Governor shall be chosen for a term of four years, and shall be eligible for re-election.

Section 7. That the following amendments be and they are hereby added to the Constitution of the State: Article VII. Section 1. The members of the Supreme Court shall be chosen for a term of six years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 8. That the following amendments be and they are hereby added to the Constitution of the State: Article VIII. Section 1. The members of the inferior courts shall be chosen for a term of six years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 9. That the following amendments be and they are hereby added to the Constitution of the State: Article IX. Section 1. The members of the General Assembly shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 10. That the following amendments be and they are hereby added to the Constitution of the State: Article X. Section 1. The members of the General Assembly shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 11. That the following amendments be and they are hereby added to the Constitution of the State: Article XI. Section 1. The members of the General Assembly shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 12. That the following amendments be and they are hereby added to the Constitution of the State: Article XII. Section 1. The members of the General Assembly shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 13. That the following amendments be and they are hereby added to the Constitution of the State: Article XIII. Section 1. The members of the General Assembly shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 14. That the following amendments be and they are hereby added to the Constitution of the State: Article XIV. Section 1. The members of the General Assembly shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 15. That the following amendments be and they are hereby added to the Constitution of the State: Article XV. Section 1. The members of the General Assembly shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 16. That the following amendments be and they are hereby added to the Constitution of the State: Article XVI. Section 1. The members of the General Assembly shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

Section 17. That the following amendments be and they are hereby added to the Constitution of the State: Article XVII. Section 1. The members of the General Assembly shall be chosen for a term of two years, and shall be divided into three classes, so that one-third of the members shall be chosen every second year.

SPECIAL NOTICES.

Howard Association, Philadelphia, Pa. An institution having a high reputation for health and professional skill. Address: Surgeon, J. B. ROUGHTON, M. D., Essays for Young Men sent free of charge. HOWARD ASSOCIATION, may 3-3m No. 3 So. Ninth st., Philadelphia.

Mothers, Mothers, Mothers. Don't fail to procure MRS. WINSLOW'S SOOTHING SYRUP for all diseases incident to the period of teething in children. It relieves the child from all the horrors, such as swelling, crying, and health to the child, gives rest to the mother, and calls for "MRS. WINSLOW'S SOOTHING SYRUP." Price 25 cents. Sold by all druggists.

MARSHAL'S OFFICE.

City of Wilmington, N. C., June 28rd, 1873. To the Citizens of Wilmington: THE SEASON OF THE YEAR HAS ARRIVED when it is usual to adopt more than ordinary sanitary measures, to prevent the introduction and spread of contagious diseases.

Our City is present is fortunately free from any immediate cause of alarm; yet it is important that energetic measures be adopted by every citizen, with a watchful care over their premises, and giving assistance to the authorities, in every convenient manner, that the health of our other citizens may be preserved, and that the same may be preserved from any immediate cause of alarm; yet it is important that energetic measures be adopted by every citizen, with a watchful care over their premises, and giving assistance to the authorities, in every convenient manner, that the health of our other citizens may be preserved, and that the same may be preserved from any immediate cause of alarm; yet it is important that energetic measures be adopted by every citizen, with a watchful care over their premises, and giving assistance to the authorities, in every convenient manner, that the health of our other citizens may be preserved, and that the same may be preserved from any immediate cause of alarm; yet it is important that energetic measures be adopted by every citizen, with a watchful care over their premises, and giving assistance to the authorities, in every convenient manner, that the health of our other citizens may be preserved, and that the same may be preserved from any immediate cause of alarm;
