FRANCE.

Movements of President MacMahon-The Election in Calvados.

PARIS, Aug. 17. MacMahon has arrived at Le Mans and he met with an enthusiastic reception.

Complete returns from the election in the department of Calvados yesterday, by counsel for the Whitehouse side of the controversy, for an injunction restraining Rev. Chas. E. Cheney from preaching in Christ church and the organization from further use of the church property.

The case was argued for several days and was taken under advisement by the Judge. The court now decides that the objections to the form of the original bill were not well taken and are therefore overruled.

This decision embodies the following points: That the property, although originally taken in the name of trustees, was in fact taken for the benefit of all who should be attached to the discipline and worship of the Protestant Episcopal Church and not for the Lord Church party; that all churches in the United States are regarded in law only as voluntary societies.

Similar arbitrations, all arbitrators must be present at the hearing; that the court for the first trial of Mr. Cheney consisted of five assessors, and four only being present at the trial and final decision, it was not a court within the meaning of the church canon, and its action was void; that upon the second trial, the court had no jurisdiction over the subject matter and its decision was also void; that the Bishop had no power of sentence except in pursuance of the finding of the church court; and such finding being invalid, his sentence was also void.

Cheney was never legally deposed from the ministry. The bill is therefore dismissed for want of equity.
