- Through a rift in the clouds last night a stray moonbeam, tired of its long imprisonment, stole cautiously into the outer element and stealthily, tremblingly wended its way earthward. The absconding truant, however, was quickly discovered and snatched back in disgrace to its murky cell.

Almost a Fire.

Between 4 and 5 o'clock yesterday afternoon a message came to Mayor Canaday, who was at his office in the City Hall, requesting his presence home as quick as possible, as it was believed that his house was on fire. He and Janitor Howard sprang into a buggy and hurried to his (the Mayor's) residence, followed by City Marshal Robinson and Deputy Marshal Price. The result proved that they were not a whit too prompt in their movements. The fire was found to be among the wood work in the rear of the mantel-piece, which had to be cut away with an axe in order to reach the flames, which, when the air reached them, burst forth with considerable violence, but were quickly extinguished. The fire was caused by a defect in the chimney and but for its prompt discovery and energetic treatment would have no doubt resulted seriously. There was no alarm.

Arrest of a Magistrate.

A colored Magistrate from Long Creek was arrested by Officer Miller, of the police force, yesterday afternoon, and lodged in the Guard House. It appears that the functionary alluded to was obstructing the sidewalk in front of the Court House, or was so charged by the officer, who ordered him to one side. The J. P. replied that he was already to one side. The ,officer put his hand on him and gave him a push, whereupon the J. P. made some insulting remark to the officer, who immediately seized the Long Creek conservator of the peace and marched him to the Guard House, from which he was shortly after released on bail.

HAYES.—In this city, on the 13th inst., Docton Hayes, formerly of Enfield, N. C., but for several years a resident of this city, and an employee at the W., C. & A. R. R. evening in the act of stealing oranges from the store of Mr. J. C. Stevenson. He started to run, when a lively chase ensued, a dozen or more juveniles "going for him" Official Drawings of the N. C. Bene pell-mell. He kept the lead of them, however, until he had reached the corner of Front and Market streets, when he was overhauled, given into the hands of a police-

ship. As for shooting qualities, your gur shoots stronger and more even than any gun I ever shot. I have shown it to several good judges (including Arst-class gunmakers) and all agree that the action is very strong and durable, and that the gun is one of the best they ever saw. I have made some very ong shots with it, using only 81% drs. of powder, which is all your gun requires. I have shot it at a targat according to the rules of the Turf, Field and Farm trials, and the average of 6 shots at 40 yards is: Left-pattern, 169; penetration, 38 right-pattern, 175; penetration 39; using 314 drs. powder. Now I am sure such a gun is seldom met with, and am very proud to be the owner of it. But the real test of your gun is in the field-there it excells all others, killing cleaner and handsomer than any gun I ever saw, as you assured me they would. Both paper and metal shells work splendidly. Gentlemen, I have to offer you my very best thanks, and will recommend your

guns to all my friends. Yours Respectfully, HENRY LORIOT.
