

AGRICULTURAL. CANADIAN METHOD OF PACKING BUTTER. A produce merchant of Montreal gives the Canada Farmer what is considered the best method of packing roll butter, and which may furnish useful hints to butter makers elsewhere. He says: I offer the following directions to my friends, which, if fully complied with, will enable them to realize the highest market quotations for their butter, instead of the lowest, as is most generally the case, which is not the fault of the consignee. There is nothing so unsalable as badly packed butter; but, on the contrary, if packed nicely, it sells readily, and generally from two to five cents per pound more than the same quality packed solid in drums. Use none but the very best new barrels, and be sure that they are not burnt or dirty inside. The end you intend for the head you should turn down, and take out of fine white muslin, the size of the head of the barrel (which will be the head when open). Commence to pack your finest and smallest rolls first, being sure to pack each roll on its smallest end. Be careful to select rolls that will pack snug, so that there will be no space for the rolls to shake about. Continue packing in this way until the barrel is almost full, then shake the barrel well (to settle the rolls), and then fill it as snug as possible. In packing the last one of the layers, pack all the rolls on their ends if possible; but if there is no room, it will not matter if they are packed on their sides, if they will pack snug and make a full barrel. The object is to have the rolls close and tight so that they will not shake and break. Each roll must be wrapped in a piece of white muslin or cheese capping; be sure and have it large enough to cover the roll entirely. The muslin should be soaked in strong brine before using it, and put on the roll wet. It is impossible to send rolls to market in good order without wrapping them in muslin, and no matter what the muslin will cost, it will more than repay the cost in the increased price the rolls stand packed with brine. Before heading up the barrel, pour on two quarts of strong pickle. Cover the last layer with a piece of muslin in the same manner as you did the head. Nail up the barrel. Be sure to drive three nails into each hoop. Then turn the barrel two or three times, so as to let the brine you have poured in work between the pieces. Mark the top in plain letters, "roll butter," also the gross weight, together with the tare of the barrel, address of the party to whom you send it, and the initials of the shipper. Rolls should be made in the oblong shape, and not weigh over three or four pounds.

QUESTIONS FOR DAIRYMEN. Every dairyman should have a printed list of questions posted in some suitable place on his premises where his family and those in his employ, as well as his visitors, will have opportunity to read frequently. We give some of them, but the list can be extended: Do your cows feed in swamps and on boggy lands? Have you good, sweet running water convenient for stock, and is it abundant and permanent in hot, dry weather? Have you shade trees in your pasture, or do you think that cows make better milk while lying down to rest in discomfort in the hot, broiling sun? Do you use dogs and stones to hurry up the cows from pasture at milking time, thus overheating their blood and bruising their udders? Do you cleanse the udder of cows before milking by washing their teats with their own milk and practice further economy by allowing the droppings to go into the milk pail? Do you enjoy upon your milkers to wash their hands thoroughly before sitting down to milk, or do you think that uncleanness in this respect is not important for milk that is to be treated for butter making? When a cow makes a misstep while being milked, do you allow your milkers to kick her with heavy boots, or to pound her over the back and sides with a heavy stool, accompanied by sandy profane remarks addressed to the cow to teach her manners? Is it fair to allow your "milk barn" or milk house reeking with the foul emanations of the pig sty, the manure heap, or other pestiferous odors? Good, fresh, clean water, and in abundance, is one of the most important requisites for milk cows, and it should be in convenient places, where stock will not be required to travel long distances to slake their thirst. If springs and running streams cannot be had in pastures, a good well, with a windmill and pump, makes an efficient substitute, and the waste water may, if necessary, be conducted back into the well, so as to keep up a constant supply of good, fresh water. Willard's Butter Book.

FOR KEEPING CIDER SWEET. Let the cider ferment until it suits your taste, then fill a barrel half full, nail a bunch of clean rags, to the inside of the bung, dip these rags in melted sulphur and set on fire; then thrust them into the barrel and drive in the bung. Roll the barrel about briskly for a few minutes, and then fill up and set away in a cool place. The cider will keep sweet for months, and, if bottled, for years.

THE ALBANY EXPRESS says that Fred W. White, of that city, had his watch stolen while visiting the Union Square Theatre, in New York. Soon after it was stolen, he was in his pocket, with this note attached: "Don't deal in warming pans any longer. Watch returned as stolen. Fry potatoes in the case. No use to me. Yours, JOHNNY THE LIFTER."

According to a recent author, Chinese women present a peculiar specimen of the daughters of Eve. They spend a great part of their time in gossiping, smoking and gambling. These accomplishments do not come by nature, but require years of assiduous training for the perfection which prevails in polite circles in China. They never dream of playing except for money, and when they have no visitors of their own rank to gamble with, they call up the domestics and play with them. Poorer women meet at some gambling den, and squander large sums of money, or run their husbands in debt, which they are unable to pay at the end of the year, and thus have an excuse for suicide. The married lady rises early, and first sees that tea is provided for her husband, as well as some hot water for his morning wash. Each lady has one or two maids, besides a small slave girl, who waits on the maids, and lights her mistress's pipe. A lady's hair dressing takes her attendants one or two hours. Then a white paste is applied to her face and neck, which is smoothed over and polished when dry. The cheeks and eye-lids are next touched with a bluish or rose powder, the surplus rouge remaining on the lady's palm, as a rose-pink on the hand is considered a great beauty. Then they dye the nails red with the blossoms of a certain flower, and finally they dress for the day. Many of them have chignons and false hair; but no hair-dyes are used, for raven locks are common, and golden tresses are not in vogue. Many ladies pass a good deal of time in embroidering shoes, purses, handkerchiefs, and before marriage nearly all their days are occupied in preparing for the dreary event of wedding a man whom they have never seen. After all, are the lives led by some of our American girls so infinitely superior to those of the fair Chinese? Comparisons are odious—but there's room for a great deal of thinking here!

COCOA BUTTER. This is a curious product obtained from the nut from which the well-known beverage is made. It is about the consistency of spermaceti, with a slight yellow tinge and an agreeable flavor. It is used both in medicine and the toilet, being esteemed a remedy for throat and lung diseases, etc. Physicians now recommend its use in scurvy and other fevers, as producing a cooling and refreshing effect upon the patient, and emitting an agreeable odor in the chamber. On account of its solid consistency it is more readily applied than either fat or oil, and is more easily absorbed by the skin. Furthermore, it is thought to afford the system a certain amount of nourishment. In severe fevers it is very beneficial.

Professor Tyndall strongly recommends as a refrigerator for firemen one made of cotton wool saturated with glycerine and charcoal. With one of this kind the Professor says he has remained in a dense smoke for half an hour where without it he would not have stayed a single minute.

VEGETINE WILL CURE SCROFULA, Scrofulous Humor. VEGETINE will eradicate from the system every taint of Scrofula and Scrofulous Humor. It has permanently cured thousands in Boston and vicinity who had been long and painful sufferers.

Cancer, Cancerous Humor. The marvelous effect of VEGETINE in case of Cancer and Cancerous Humor challenges the most profound attention of the medical faculty, many of whom are prescribing VEGETINE to their patients.

Canker. VEGETINE has never failed to cure the most intractable case of Canker.

Mercurial Diseases. The VEGETINE made with wonderful success in the cure of this class of diseases.

Pain in the Bones. In this complaint the VEGETINE is the great remedy, as it removes from the system the producing cause.

Salt Rheum. Tetter, Salt Rheum, Scald Head, &c., will certainly yield to the great alterative effects of VEGETINE.

Erysipelas. VEGETINE has never failed to cure the most inveterate case of Erysipelas.

Pimples and Humors on the Face. Reason should teach us that a blotchy, rough or pimply skin depends entirely upon an internal cause, and no outward application can ever cure the defect. VEGETINE is the great blood purifier.

Tumors, Ulcers or Old Sores. Are caused by an impure state of the blood. Cleanse the blood thoroughly with VEGETINE, and the complaint will disappear.

Catarrh. For this complaint the only substantial benefit can be obtained through the blood. VEGETINE is the great blood purifier.

Constipation. VEGETINE does not act as a cathartic to debilitate the system, but cleanses all the organs, enabling each to perform the functions devolving on them.

Piles. VEGETINE has restored thousands to health who had been long and painful sufferers.

Dyspepsia. If VEGETINE is taken regularly, according to directions, a certain and speedy cure will follow its use.

Faintness of the stomach. VEGETINE is not a stimulating herb which creates a fictitious appetite, but a gentle tonic, which assists nature to restore the stomach to a healthy condition.

Female Weakness. VEGETINE acts directly upon the causes of these complaints. It invigorates and strengthens the whole system, sets the secretory organs, and allays inflammation.

General Debility. In this complaint the good effects of the VEGETINE are realized immediately after commencing to take it; as debility denotes deficiency of the blood and VEGETINE acts directly upon the blood. VEGETINE IS SOLD BY ALL DRUGGISTS. FEB 18 1876
