A Rumor of Troops for North Care Jiam. Special Dispatch to the Raleigh Sentinel. RICHMOND, VA., Nov. 2.

I learn there is a rumor in Wash ington that troops now massed at Columbia, South Carolina, may be thrown into your State, some twentyfour hours previous to Tuesday's election. It's to intimidate. Let our people stand firm, and let this outrage, if perpetrated, only stimulate them to an earnest determination to elect Tilden and Vance.

WILMINGTON, N. C., SUNDAY, NOVEMBER 5, 1876.

We are glad to learn that the election of Henry G. Williams, editor of Wilson Advance, who is Democratic candidate for the Senate, is assured. He is a very astute politician and has legislative experience.

Col. Kenan closed his canvass in Columbus county, speaking at Williams' township yesterday, and passed through this city last night, on his way home to vote. He gives encouraging news, and is certain of a Democratic victory.

The Fentinel says:

"Our electors for the State at large Messrs. Fowle and Leach, have done noble service in the campaign. They have been almost constantly in the field from the beginning of the canvass, and have alternated East and

Some of our contemporaries claim Granville. That is almost too good to be true. The Radical majority ranges from 400 to 600. Davis, owing to his extraordinary popularity, was only beaten 204. There is a split among the Radicals and our Kirk war. chances are greatly improved.

Bonfires lighted the streets last night and the crowd flocked to Metropolitan hall to hear Judge Merrimon. He was at his best for almost an hour, but the condition of his throat was such that he was compelled to bring his masterly address to a close. At loud calls from the audience Judge Fowle and Col. Tom Fuller made brief addresses .- Senti-

The Raleigh News, referring to the canvass in Burke, says:

"When the caudidates had finished, ex-Sheriff J. T. Patterson, a Republican of character and influence, arose and publicly withdrew from the party. James I. The News uses truthful words in the following sentence in regard to honest Jo Davis:

In Joseph J. Davis we behold one who is indeed what the poet tells us s "the noblest work of God." Men of his unsullied character, his fixed moral principle, his undefiled conscience and firm purpose to perform duty in every station of life, are sadly need at Washington. - We gather the following interesting facts concerning North Carolina minerals from the Sentinel. It says: "Professor Kerr has just returned from a trip into McDowell, Burke and Catawba countier where he has been engaged in looking up iron ores and gold mines. Dr. Powell has just opened some new iron beds on the Catawba and is manufacturing very fine forge iron. They have reopened the old Shuford gold mine near Catawba station. and it is worked quite successfully. In the same neighborhood within a few miles of the gold mine is the largest bed of black lead in the State. It was worked last year by a company who put up machinery for preparing it for market.

-- Another New York party has opened the manganese mines near Lenoir. In the South mountains there is a good deal of gold getting just now in the old Brindle Town mines. All the people at work through that range of mines are getting in the aggregate upwards of one hundred dollars a day. At the time of the discovery of the California mines there were a thousand hands working in those mines and got out several millions of dollars, Over on Black mountain in the mica mines, the other day, Professor Kerr found some very remarkable crystals of feldspar. One weighed not less than six hundred pounds, the largest crystal on record. They are now on the way to the State museum. On Ivy, in Madison county, the Professor found bed of iron ore of very fine quality.

Our Bar and River Improvements. Regarding future operations for the im-

provement of the Cape Fear River and Bar, the specifications issued by Maj. Wm. P Craighill, Engineer in charge, says it seems desirable during the present fiscal year to farther contract the area of outflow at the New Inlet to as great an extent as the state of available funds will permit. The greater portion of the work for the contraction of the Inlet, and the only portion for which proposals are now invited, will consist in simply dumping stone upon the "apron' and its extensions. For this purpose about 45,000 cubic yards of stone will be required; but this amount will be increased or diminished, as the price of the stone permits or requires. The plan at present contemplated is to bring the structure up to low water mark, with a slope of one foot on the inner and one or two on the outer or seaside; but the Engineer in charge does not confine himself to this particular plan, and will require the stone to be distributed over the apron and its extensions at such points, in such proportions, and with such slopes, as shall seem to him to be proper at the time of delivery. He will not, however, require any stone to be dumped above ordinary low water mark. It is probable that a considerable addition to the base of the apron at certain points will be necessitated. The extent of this addition can only be determined as the process of filling goes on. Vessels bringing stone by sea will find anchorages commodious and safe in all weathers, both behind Zeke's Island and in the river near Federal Point, at either of which points the stone can be discharged on lighters brought alongside for that pur-

The large quantities of naval stores, cutton and lumber shipped from Wilmington to Northern ports offer remunerative return freights, and would seem to make this a particularly favorable point for the shipment of stone, when so many vessels

are continually coming in light. DAIHAU A copy of these (specifications has been left with the Secretary of the Chamber of Commerce for reference, by parties interested, or they may be seen and explained (Monday) night. Several prominent speak-ers will address the meeting, which will be the last before the great struggle comes off. by calling on Mr. Henry Nutt, Chairman of the Committee of the Chamber of Com-merce on Bar and River Improvements.
