The three steam fire engines, the "A Adrian," the "Little Giant" and the "Cape Fear," were out yesterday to test the new hose, consisting of two thousand feet, recently received for the use of the Fire Department. The Cape Fear broke down and could not participate in the trial.

The new hose (known as the Paragon hose), was manufactured by the Eureka Fire Hose Company, of New York, and through the entire length of two thousand feet not a drop of water leaked from it. Not only should she endeswor to please in address and in apparel, but, whenever possible, in complexion and in feature as well. Facial embellishment is to a lady as proper, and oftentimes as necessary, as are the adornments of her raiment, the artificial graces of her conversation, of her demeanor, or other meretricious attractions upon which depend so much of her dominion and influence ever man. The woman who permits herself to become unlovely, who resigns herself hopelessly to the ravages of time, and the spoliation of her charms, visits upon her friends and admirers a sorrowful regret, that it becomes her to avert to the latest day. Of this social duty it may trathfully be said that she can best acquit herself by the use of Gouraud's Olympian Cream.
