OUTLINES.

The French situation is unchanged, but there is a calmer feeling; the Marshal and the Left are reported as being more concil jatory. - Proposals of a peace conference are said to have been made. The Turks have about abandoned all hope of succoring Plevna. - Fighting at Rustchuk reported. - A great storm is reported in the Balkans. — Turks have abandoned Orchanie for strategic reasons. - A villain named Roper was hanged at Columbia, Tenn., in the presence of 2000 people, by order of Judge Lynch, for attempting rape upon a young lady. -Gen. Ord is expected in Washington to consult over the Texas border troubles. - Senator Sargent has returned; he has been absent in consequence of the suicide of his sister. - There is to be a court of inquiry over the loss of the Huron. -Lord Derby, Secretary of State for Foreign Affairs, received a deputation urging actual interference in behalf of Turkey; he said the Government saw no cause to depart from its neutrality, as he did not think Constantinople or the Suez Canal in danger. - Thurman moved in the Senate to substitute M. C. Butler; amendment lost by vote of Vice President; Salisbury moved to recommit the Louisiana contest to the committee with instructions to take testimony on various points; Hill, of Georgia, spoke at length. - New York markets: Money 4@5 per cent.; gold steady at 102;; cotton firm at 11 5-16@11 7-16c; flour without change; wheat 1@1c lower; corn le lower; spirits turpentine 341c; rosin quiet at \$1 70@1 75.

A report comes that proposals for a peace conference to settle matters between the belligerents have been made. The Turks seem to have no hope of succoring Plevna. There is a rumor that the Turks have made chuk and fighting is progressing. It is believed that this is an attempt to force the Russians to send troops from Plevna to reinforce the Czarwitch's army.

The news from France as a whole is more hopeful. MacMahon and the Republicans are reported as in a more conciliatory mood. MacMahon is credited with purposing to form cabinet acceptable to the Republicans in case the Senate does not stand by him. It is thought the Republicans will arge the President to return to the normal system of a government of a majority. A calmer feeling is said to be manifest. It is thought that the cabinet does not expect to hold office long. The Budget committee have reported unfavorably upon the special accounts opened by the De Broglie ministry. This wil check the attempt to expend money without the authority of the Cham-

MONDAY IN THE SENATE. Conover and Patterson

But when Edmunds sat down Pat terson arose, and the great throng listened almost with abated breath as Patterson turned savagely on his colleagues. As he warmed up his look was that of a hunted animal at bay. He denied the charges that he had made any bargain. He declared that he was voting for Butler because he believed that he was elected. Every body expected that he would make these assertions, but the excitement came when, turning upon Edmunds and his Republican associates, he de-

clared that they were now

ATTACKING HIM BECAUSE HE REFUSED TO DO WRONG AT THEIR BIDDING; because he refused to repudiate a government which their President and his supporters had declared to be legal. Snatching the telegram from the table, he announced that it was from the best Republican they had in South Carolina; that it was from a gentleman who spent as much money as any man in the State to secure you your seat, Mr. President (pointing to Vice President Wheeler) and Mr. Hayes his. There was a perceptible thrill at this and a demonstration of applause, which was quickly checked, and he proceeded to say that this man told him he was doing right. In conclusion, he defied them to read him out of the Republican party. AFTER PATTERSON CAME CONOVER.

His speech was the greatest surprise to the party of the day. It was short, and he read it without any effort at dramatics, but its sting was terrible. He gave as his reason for supporting Butler that their Pre-sident and his had affirmed the legality of the Legislature which elected Butler; that the Supreme Court of South Carolina had affirmed it; that he never heard of a Democratic State electing a Republican Senator, and did not believe this one had; that he could not oppose Butler without questioning the title of the President to office; that he was unwilling to do that. Then he reviewed Edmunds' course in the Pinchback case, and asserted that he was only following the leadership of the distinguished Senator from Vermont. to see why General Grant, who has No abstract can convey an idea of the now no official position, should be sentences. Much damage on a small scale was done, but nothing that cannot be easily repaired. We learn that the country about the junction of Eno, Flat and Little rivers was all under water, presenting the appearance of a raging inland sea. Fortunately all crops

are housed. - Charlotte Observer: The funeral services of James F. McLaughlin, who met with such a sad and terrible fate in the South Fork creek disaster on Friday, were held in the Tryon Street Methodist Episco-pal Church Sunday morning at 10:30, in the presence of a very large congregation composed of people of all religious denom-inations represented in the city. —Congressman Vance, of the Eighth district, has taken the initiatory step in the direction of re-establishing the Charlotte mint. In those places from which we have up to the present time been able to obtain informa-tion, the work of the whole year was de-stroyed, and while we believe the loss will be very greatly overestimated there is no doubt that it is in the highest degree serious. At the same time we are glad to be able to say that no loss of life has been yet reported, and later information leads us to believe that no one was on the Seaboard bridge when it went down. At this time the waters are falling rapidly and by tomorrow we hope communication across the river will be re-established.

Tax on Drummers. The tax on drummers bids fair to become considerable item in the city treasury, now that a detective has been appointed by the Board of Aldermen to look after stragglers and carry them up to the Captain's office to settle. During the past three weeks there has been paid into the treasury on account of drummers the sum of \$203, previous to which time (during the present administration at least) nothing had been received from this source. The amount would no doubt have been considerably larger but for the flood, as it is known that Wilmington were prevented from reaching here on that account.

Our Hop Reporter. Our hop reporter left last evening about 5 o'clock for the purpose of joining in the coon hunt on Masonboro Sound. The shirt collar and pair of spurs that constituted his hunting costume struck us as the most appropriate and economical "rig" we had seen this season, not even excepting the airy at-tire of the "Dizzy Blondes." Last night the weather was highly favorable to coons and hop reporters, and we expect to see our H. The Cure of Diphtheria.

We find an article in the Scientific American for December 1st to the effect that Dr. E. N. Chapman, of Brooklyn, N. Y., has discovered an antidote to the poison of diphtheria, by which the percentage of deaths is reduced to less than one in fifty. while, says the article in question, "Statistics show that the percentage of recoveries in cases treated under the usual practice is about thirteen, or eighty-seven out of a hundred sufferers succumb to the fell disease. Diphtheria first appeared in this country in 1858. Dr. Chapman, in 1859, lost several cases, and became distrustful of the regular methods. He had been using alcohol in the cure of ship fever, and he determined though contrary to all rules, to try it in diphtheria. Te his surprise, several of his patients recovered. He then tried quinia, and found it acted well, but not so quickly. At last he settled on a combination of the two, alcohol and quinia, and with these remedies he claims that diphtheria is more amenable to treatment than many commo diseases. In an epidemic, such as diphtheria, all are affected by the morbific agent; but only a few yielded to it. Mature, vigorous persons have vitality enough to resist the disease. Children and weakly adults are its usual subjects. Dr. Chapman considers that there is, almost always, super-added a local and direct exciting cause, such as defective exercise, improper diet, dark rooms, damp houses, imperfect ventilation, and poisonous emanations from decomposing filth in privies, cesspools, sewer-pipes, etc. To such agencies the strongest constitution will soon succumb. The blood being deteriorated, its crasis is impaired and its vitality lowered; and then the sympathetic nerves, failing to receive due stimulus, waver in their efforts to carry

"All local treatment," he says, "is worse than useless. It exhausts the nerve force and induces greater injection of the blood vessels, thus favoring the exudation.

on the animal functions.

"Alcohol neutralizes the diphtheria poidues the fever and inflammation, destroys pabulum that sustains the membrane, cuts short the disease, conquers its sequetæ, and shields other members of the family from an attack. Upon the subsidence of the fever, as is usually the case in from twentyfour to thirty-six hours, a purulent secretion begins to loosen the membrane, and soon thereafter to detach it in flaky, ragged fragments. This process may take place, and recovery be possible, even when the larynx and traches are implicated. The membrane is seldom renewed, when this secretion is maintained by a steady use of the remedy. Alcohol is as antagonistic to diphtheria as belladonna is to opium, or quinia to malaria. Like any other antidote, it must be given promptly at the outset, or otherwise its potency will be lessened, peraps last altogether.

Alcohol does not act as a stimulant, nor induce any of its ordinary effects. Enough may be given to cause profound intoxication, in health, and yet there exists no sign of excitement or odor in the breath."

Quinia, says the paper, is an efficient alloy to alcohol. It energizes the ganglionic nervous system, and thus enables the organism to right itself and resume its func-

Dr. Chapman sustains his position by citing numerous cases in which this treatment was successful. He states that, in his long experience, he only knew of one case where a drunkard had diphtheria. He reperally gives the alcohol in the form of

Mayor's Court. The Mayer's "levee" yesterday morning

was more than usually well attended. Wm. Myers and Henry White, both colored, were arraigned for fighting near the corner of Front and Market streets on Tuesday afternoon. The former was ordered to pay a fine of \$7 and the latter \$3. Robert Johnson, colored, charged with disorderly conduct, was ordered to pay a fine of \$5, defendant to be committed until

Andrew DeBose, scolored, charged with disorderly conduct, was ordered to pay fine or \$5 and to be committed until paid. These two latter young men were concerned with others in acting very disorderly and boisterous in the neighborhood of Seventh and Harnett streets at 12 o'clock Tuesday night, to the serious annoyance of people residing in that vicinity.

The practice of the indiscriminate threwng of rocks and other missiles in the streets, indulged in to a great extent by the boys, is a dangerous one, as an instance of which it may be mentioned that there is a little white boy now suffering severely with erysipelas, caused by a blow he received on the side of the face from a rock thrown by one of his companions in a playful spirit; besides which, damage frequently ensues to property, such as the breaking of windows, &c., from this habit.

Hill's Manual. We have receided at the hands of the publishers, Wm. B. Shepard, 13 Astor Place, New York, a large quarto volume, entitled "Hill's Manual of Social and Business Forms," being an extended work treating on the correct method of writing any description of document. The various chapters in the book exhaust very completely in detail the following subjects, namely:

Penmanship, which is very profusely illustrated and accompanied by the finest of lithographic copies, along with explicit directions for self-instruction and the art of teaching.

Spelling, Punctuation, use of Capital Letters and the Rules of Punctuation are all treated quite at length.

How to Write for the Press forms an important chapter.

That portion of the book devoted to Letter- Writing represents nearly two hundred letters of correspondence, including Letters of Business, Applications for Situations, Letters of Recommendation, Introduction

Friendship, Love, &c., &c. Wedding Ceremonies, Wedding Cards, and Notes of Invitations to weddings, parties. &c., together with samples of a great variety of visiting, business and plain and ornamental cards, form a chapter that will

terest and days of grace.

Family Records are illustrated by a model Record of one family.

A Dictionary in the work contains over 11,000 words, giving spelling, definition and avoid the inelegance of repeating the same word several times in a sentence.

Short hand writing is so thoroughly illustrated as to make this chapter a complete self-instructor in this important art.

How to conduct public meetings accord ing to parliamentary rules, drafting resolutions, petitions to public bodies, form an extended and important portion of the book. The correct form of punctuating, letter-

ing and wording for sign painting, tombstone inscriptions and the purposes of engraving, is entirely new, and forms a valuable feature of the Manual.

The many alphabets, directions for proofreading, &c., are of especial service to literary people. The abbreviations, statistical tables, for-

eign words and phrases, dictionary of Christian names and of the language of flowers, are all important.

The rules for writing poetry, the rhyming dictionary, accompanied by the large number of choice poems, will be especially in-

teresting to people of literary culture. The book is printed in a style never surpassed, as a book of the kind, in this or any other country.

Thomas E. Hill, the author of this book was for fifteen years one of the most po pular teachers of penmanship in the United States, and more recently has been a very successful editor, newspaper publisher and business man, combining in an eminent degree the essential qualities of mind and experience which are necessary to prepare such a comprehensive work.

The book is sold only by subscription.
