These enumerators (one for every 4,000 inhabitants) begin their duties on the first Monday in June, 1880, and must finish before July 1st-thus requiring the work to be completed in less than thirty days. The compensation will be two cents for each inhabitant, two cents for each death reported, ten cents for each farm, and fifteen cents for each establishment of productive industry. Applications for appointments as enumerators should be addressed to the supervisors of the State when appointed."
