WILMINGTON, N. C., WEDNESDAY, AUGUST 6, 1879.

The news from the West as to a the Richmond Ohristian Advocate will please make a note of this. revival of business is said to be cheering. The wave has not yet struck this portion of the Atlantic slope as yet. There is some improvement, doubtless, in the country at large, but it is comparatively slight. The business of the country had fallen so low it will take years to get back to a degree of prosperity that shall be satisfactory. Let it never be forgotten that the prostration of the country during the last six years is directly chargable upon the Republican party. Their financial wastefalness and peculations brought the country to the lowest depths of moral and financial roin.

One John W. Beveridge, of Richmond, got up a big swindle by which hundreds of people were victimized last Sunday. He advertised a grand camp meeting to be held at Mount Pleasant, seventeen miles from Richmond. Rev. Dr. Edwards, Rev. J. J. Lafferty and other well known Methodist divines, were to be present. Train after train went out crowded, when, lo! it was a bogus affair; there were no preachers, and it was a shameful stealing of heaven's livery with which to serve the Devil. An indignation meeting was held and Beveridge was denounced. The Methodists had no hand in the deception.

The Raleigh Observer says that Mr. T. Walthall has written to a gentleman of that place stating that ex-President Jefferson Davis' book will not be ready for some time. The newspaper scribblers are beginning to compare it in advance with Gibbon and Macaulay. It seems impossible for a Southern man to reach a lower plane of historical writing than the great masters. Great is

We are pleased to learn from the Raleigh News that Rev. Dr. Thomas E. Skinner was elected pastor of the First Baptist church, at Raleigh, by a vote of 139 to 32. He was for ten years or more its pastor, and did a great deal for it. He is a native of North Carolina, has a big heart, ood abilities, and is an earnest worker. He is probably 55 years

A False Report Let Justice be frome. The New York Herald, of a late date, has the following dispatch from Norfolk: SAILORS FROM A WEST INDIA PORT HUR BIED NORTH BY THE QUARANTINE AU-ING FOR THE NEW YORK HEALTH BOARD

["By Telegraph to the Herald !" ["By Telegraph to the Herald.]

"Norrolk, VA, August 3, 1879.—A
party of eight sailors, who arrived here last
night by rail, state that they have just come
from Wilmington, N. C., having arrived in
that city some days ago on the bark E. T.
Gregory, of Baltimore, from Navassa, with
a cargo of guano. The vessel was detained
at Quarantine, and the authorities would
not permit the landing of the cargo. In
this condition of affairs these men were
paid off and discharged, but the authorities
quickly hurried them North, Six of the
party promptly left here last night for New
York on the Old Dominion line. The two
others remained over, intending to go to others remained over, intending to go to Boltimore. They were arrested, had their clothing and effects burned, and were sent up the bay to-night."

In addition to which the Herald prints the following editorial reference:

The discharge of sailors who arrived at Wilmington, N. C., from a West Indian port, infected with yellow fever, and allowing them to scatter through the country, was an act that deserves the severest condemnation. They should have been uarantined.

Now, if the authorities of Wilmington had really acted as here intimated, they would, without doubt, have laid themselves liable to the severest censure; but the facts entirely disprove the allegations contained in the Norfolk telegram and the Herald editorial. The schooner E. S. Powell, the vessel referred to, had been twentyfive days out from Navassa Island, when she arrived in below, and remained five days longer at quarantine, because, being from a port South of Wilmington, she was required by the regulations so to do. There was no sickness at the Island, or on the vessel, although the latter, as a mere matter of form, in order to comply with the rules, was then permitted to pass by the city ad to the Navassa Guano Works, four miles above the city, where her cargo was discharged, and where it belonged.

The sailors employed on the vessel wished to go North, whereupon they were paid off. and went by rail, having ro other way to go, and this was after the vessel had been lying at the factory for several days. There has only been one case in which a sailor has arrived here from a vessel hailing from an interdicted port, and he was arrested and sent back to the vessel in twenty minutes after he had reached here.

As the articles in the Herald are likely to work to the injury of our port, and very unjustly so, we hope the necessary correction will be made.

Dr. R. S. Moran. The Brooklyn (N. Y.) Times, of a late date, has the following very complimentary remarks in reference to Dr. Moran, formerly of this city:

"The members of the First Reformed Church on Bedford avenue must be congratulated this year on their good fortune in securing, until the return of Dr. Potter in October, the services of Rev. Dr. R. S. Moran, of New York, Dr. Moran has preached for this congregation but two Sundays, and the impression he has made has been very marked. He has evidently a mind of high order, and instructs while he interests his hearers. He presents the ruths of Scripture with force and vigor. With a style peculiarly his own, and a rare wealth of diction, he describes the beauties of a godly life, its benefits upon the earth, and the reward that follows it in eternity. The sermons of Sunday were istened to by an audience which seemed charmed by them, and the increased num-bers attending the evening service showed hat the able presentation of the Gospel story by this new worker among us is to be crowned with success. As Dr. Moran's tay is to be but short at the most, those who wish to hear him should embrace the irst opportunity to do so.

Railroad Velocipede. A railroad velocipede is the latest invention, but nevertheless a simple one, and the only wonder is that it has not been in practical use long ago. It is thus described by an exchange: "Its weight is about one hundred pounds, and it has three wheels-two of which run on one rail of the track and one on the other. It has a seat for one man, thought might well carry two. It is very easily operated, and is run on almost the exact principle of the ordinary velocipede. With a strong muscular man to move it, it will make a speed of fifteen or eighteen miles an hour."
